Business summary

#### Italy adds Euronote \$895m to famine soar to relief \$1.22bn

Italy stunned the United Nations conference on the famine in Africa by amouncing a L1,900hn (\$895m) new facility for aid to countries "stricken by emergency needs" throughout the world.

The pledge, delivered by Sig Francesco Forte, Italy's Minister francesco Force, trany's sumsuer for European Affairs, comes on top of Italy's unexpectedly large contribution to a new fund for long-term developments in Africa launched by the World Bank last month.

The new money will he spent over the next 18 months and most of it is likely to go to Africa. Page 18

#### Gulf war agreement

Iran said it would accept a United Nations call to stop attacks on civilian Gulf war targets and Iraq ex-pressed readiness to halt the raids.

#### Portugal blasts

The FP-25 left-wing urban guerrilla group claimed responsibility for seven bomb blasts directed at foreign economic interests in Lisbon and farming town of Evora, Portugal. No one was hurt.

#### Sikhs released

Akali Dal, the Sikhs' main political party, from nine months' detention.

#### China repels attacks

China said it had repulsed more than 20 Vietnamese attacks supported by heavy artillery barrages in the past three days.

#### Airport clash

Seven police were hurt and four protesters temporarily held after 500 demonstrators fought police near Frankfurt airplat's controver-stal near principal and protesters. sial new rinway.

#### Nyerere visit

tour-day visit which will include in protest against retirement and talks with Dutch Government lead- compensation terms.

#### School boycott

About 20,000 pupils boycotted 39 schools in South Africa after a weekend of riots in which six black

#### Africa aid 'bar'

South African said it had been prevented for political reasons from attending a United Nations conference on emergency aid to African countries suffering from drought.

#### Chinese crackdown

At least 104 policemen have been killed in the past 18 months during China's crackdown on violent crime and corruption.

#### Oil warning

Ali Jaidah, former SecretaryGeneral of the Organisation of Pemanufacturer, launched two powmanufacturer, launched two powmanufacturer, launched two powmanufacturer, launched two powmanufacturer, launched two powunless producers outside the group agreed to reduce output.

#### Tax fighter freed

Mogens Glistrup, Danish anti-tax campaigner and founder of the right-wing Progress Party, was Page 19 freed from jail after serving half his SIME DARBY, Malaysian plantasentence for tax fraud.

# **Dollar tumbles** as markets' confidence ebbs

BY PETER MONTAGNON IN BASLE AND PHILIP STEPHENS IN LONDON

THE DOLLAR fell sharply yester-day against other leading currec-cies. It closed in London at DM 3.3385, down 7.4 pfg, while sterling gained 2.15 cents to \$1.0890.

trading in New York, with the dol-lar at DM 3.3350 and sterling at \$1.0910. The dollar was near to its London closing levels of FFr 10.20 and SwFr 28475.

Foreign exchange dealers said that the dollar's drop had been trig-gered by lower U.S. interest rates, but they also reported a more general weakening of confidence in the U.S. currency.

In Basie, senior central bankers said that their recent intervention against the dollar had been more successful than initially appreciat-

Speaking after an assessment of Bank for International Settlements, they said it had forced the markets to realise the risks in always pushing up the dollar.
We have succeeded in stabilising

the dollar at a lower level," one leading central banker said. The bankers acknowledged, however, that sales of dollars on such a massive scale as last month, when

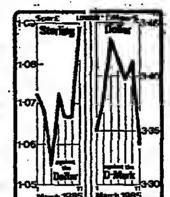

around \$3%bn was thrown on the market, would be hard to repeat. Few European countries have the resources to continue intervening so heavily. Some such as Switzerland which did not participate in the sales, also questioned the usefulness of concerted intervention.

The bankers warned that if the dollar rises further there may therefore be no choice for European countries but to fall back on a further rise in interest rates. This would be a particular blow to West Germany's Bundesbank, which took the lead in organising

the intervention and would be very

reluctant" to raise German interest

rates because of fears that such a bank intervention in the currency move would undermine the economic recovery. Sterling's rise against the dollar and against most other European currencies meanwhile raised hopes in London of an early cut in Britain's base lending rates, perhaps to coincide with the Conservative Government's budget next Tuesday.

terday to a level which, if sustaine would suggest a cut of at least 1/2
point in the 14 per cent base lending rates charged by British banks.
The Bank of England, however, their intervention strategy at the left its money market dealing rates unchanged yesterday, making it clear that it wants to ensure that the current optimism in financial markets is durable before it leads

interest rates lower. The UK authorities are aware that a similar bout of confidence early last month quickly evaporated after a renewed surge in the dollar's

The D-Mark was helped yester day by support in Sunday's local elections for one of Bonn's coalition partners, the Free Democratic Party, and the low poll for the Greens. News of the death of Soviet Presi-dent Konstantin Chernenko and the election of Mr Mikhail Gorbachev as General Secretary of the Soviet Communist Party had little effect on currency trading.

The price of gold, once a sensitive barometer of East-West tensions, was hardly influenced by news from Moscow and closed at \$291.05 an ounce, virtually unchanged from Dealers said there was no central

Warning that the dollar would sooner or later fall steeply, one cen-tral banker said: "It should be in the interests of the U.S. to build up reserves of D-Marks, yen and other

# Chernenko: classic bureaucrat who made it briefly to the top

FROM THE day in February Chernenko's upward path. 1984 that Konstantin Ustinovich On his mentor's death in Chernenko, then 72, took over November 1982 Chernenko was as General Secretary of the Soviet Communist Party, be was widely considered a stop-gap. He presided over a return to a more collective style of leadership in the Kremlin; this masked yet another phase of the Soviet succession struggle in which younger men jockey for position in the long generational transition that started in the last two years of Brezhnev, persisted through the hrief Andropov era, and continues today.

corruption that followed, the Brezhnev association seemed almost as great a liability as it had earlier been an asset. But the early death of Andropov after only 15 months nominally in power had given younger contenders like last two years of Brezhnev, persisted through the hrief np their own power bases and connections. Chernenko, who finally won presided over a return to a more

Without the flair of a Brezhnev or the intellect of an Andropov, Chernenko, the sixth Soviet leader, was an able organiser and administrator, in sum a classic bureancrat. Virtually his entire career was spent in the central party apparatus, and he rose to the top without ever running a ministry or a major region or sector of the economy. It is e reflection of the complexity of the modern Soviet state that his knowledge of the highways and hyways of the bureaucracy should have been considered qualification enough for the

highest post. Inck played a part in Chernenko's rise, particularly in his 32-year-long association with Brezhnev. It was Brezhnev who brought Chernenko to Moscow (1965), made him his effective "office manager" (1976), put him in the Politburo (1978) as his "chief lieutenant" and patiently groomed him as his successor. The subsequent illbealth of Kirilenko and deeth of Suslov (January 1982) re-

Mr Rajie Gandhi, India's prime minister, will make his first visit to Moscow since his decisively outmanoeuvred by Andropov. For a time, during the crackdown on laxness and corruption that followed, the

Chernenko, who finally won through as the compromise choice, had doggedly pursued his way up the slippery pole of Kremlin politics. His ambition was once described by Brezhnev as "restless," and Chernenko compensated for his unprepos-sessing public performances and lack of executive government experience with assidnous behind the scenes cultivation of the party hierarchy, both in Moscow and in the republics and with a prolific number of written publications. With many variations on the

catch-all theme of ideology which Chernenko made his speciality, these writings showed the man to be e "look before you leap" conservative, but also a cantious proponent of more consumer welfare, of greater democracy and consulgreater democracy and consultation inside the party and of detente abroad. These were the very much Brezhnevite themes. Yet they were not the hallmarks of Chernenko's tenuer as party leader, which was easentially a balancing act. He presented the results were and the Reagan administration and the Reagan a

shooting down of a South Korean airliner, and, second, hy the collapse of arms control negotiations in November 1983 when the Soviets pulled out of Chernenko's only clear ally in talks with the U.S. in protest the Polithuro was Prime Minet new U.S. missile deployister Nikolei Tikhonov, ments in Western Europe.

Yet, within 18 months of that with the West. walk-out, the Soviet Union is today resuming negotiations in Geneva with the U.S. on a broader front than ever before, not only about medium and long-range offensive nuclear micellar but also short space.

It would not be surprising if Chernenko, who was part of the Soviet delegations signing the 1975 Helsinki accords and the 1979 Salt 2 treaty and a man closely identified with Brezhne-vite detente, used his influence to get some return to dialogue

Chernenko's writings and speeches, particularly before be became party general secretary, showed a consistent hope thet arms control agreements with the West would allow resources missiles but also about space to be shifted to the consumer and earth-based defensive sector. In 1979, for instance, he systems.

- said he wanted a Sait 3 agree-

the Marshal's apparent con-tempt for many of his civilian peers and superiors—it was Ogarkov who asked U.S. negotiators in the Salt talks not to reveal certain Soviet military reveal certain Soviet military data in front of the civilians in the Soviet delegation—and the Marshal's embarrassing public calls for more money to match new U.S. bi-tech conventional weaponry, it seems likely that Chernenko had key allies in moving against e soldier who had apparently grown too hig for his army boots. The Marshal's dismissal also conveniently removed him as a top contender for the post of contender for the post of Defence Minister, when the long-time incumbent Marshal Usinov, died at the end of 1984. But, despite all this, there was little real softening in Soviet foreign and defence policy under Chernenko. In his public pronouncements, Chernenko halanced—no less than his Polit-buro colleagues—calls for re-newed detente and arms control with attacks on the Reagan administration and stress on Soviet military might. With the notable exception of returning to arms negotiations, the Soviet Union gave the strong impres-sion of continuing on "anto-

Belorussia. Much of the initial betchetwork was done under Andropov, and some sentences were lighter under Chernenko than they would bave probably been under his predecessor. But, in his attitude towards dissidents and foreign cultural influences Chernenko was, it anything, more repressive than Andropov. The compaign Andropov. The compaign against Western jeans and pop music was stepped up and new laws made it an offence to give

a foreigner general economic information or unauthorised transport or sbelter.
On economic reform, Chernenko seemed simply content to follow in the direction in which Adropov had pointed— towards limited autonomy for managers in certain sectors, but with no drastic overhaul of the central planning system. He told the first planum of the Central Committee which he addressed as General Secretary in April 1984 that the search was on for "new forms and structures of economic scripty," but made it clear that no hasty or radical changes would be made. By the end of 1984, some 12 per cent of the economy was said to be affected by the management reforms.

ment so that "e considerable part of the resources currently accurately on "Andropov-pilot." accurately on "Andropov-pilot." accurately on "Andropov-pilot." This was nowhere more evident than in domestic affairs.

The Andropov brand of The An

computing in particular, as a counter to U.S. inspired export controls by Western countries. But there were no structural changes to give substance to the summit's call for greater integration and more "direct reletions" to enterprises across national boundaries: one of the obstacles to the latter being Chernanko's unwillingness to grant Sowiet enterprises any autonomy that diminished the

control of Gosplan, the state planning organisation.

Thus, Chernenko does not leave the Soviet Union much different from when he assumed power. Nor is his modest legacy likely to last long. He deplored the lack of respect that leaders like the erratic Khruschev had had for the party in rapidly rotating party "cadres" and won not inconsiderable popularity by promising the party hierarchy security of tenure. The ironic result was that he himself appointed few of his men to key posts unlike Andropov, and indeed Brezhney to Chemenko's own benefit, had

# Burt promises 'new ideas' for arms talks

BY ROBERT MAUTHNER, DIPLOMATIC CORRESPONDENT, IN BRUSSELS

for European Affairs, said intended to take the initiative in the arms control negoti-ations with the Soviet Union starting in Geneva today on both strategie and interrange nuclear

"We definitely have new ideas," Mr Burt said after chairing a meeting of Nato's Special Consultative Group, in which the U.S. regularly consults its allies on inter-

mediate range nuclear force (INF) negotiations. Washington's tactics in the

MR RICHARD BURT, U.S. negotiations would be to utistrategic missiles the controversial issue of Pre-

sident Ronald Reagan's Strategle Defence Initiative (SDI), the so-called Star Wars The U.S. and the Soviet Union decided in January that the arms control nego-

tiations in Geneva should take place in three separate groups, devoted respectively to strategic weapons, INF and SDI. Moscow has made clear that unless the U.S. is pre-pared to give up its Star Wars research programme, agreement on the other two issues.

appeared to indicate that the new U.S. proposals on long and medium-range nuclear missiles would be sufficiently generous and flexible to persuade the Soviet Union to abandon the linkage between the three groups.

"There is a strong feeling of confidence that our strategy will prevail," Mr Burt said. He added that U.S. negomuch flexibility before in tiators had never had so

arms control talks. In a statement issued after

the meeting of the Special Consultative Group, Mr Burt said that he had reaffirmed the U.S.'s commitment to Nato's basic criteria for an equitable and meaningful agreement, while stressing its readiness to build npon "the readiness to build npon "the inherent flexibility of our earlier initiative in Septem-

ber, 1983." The SCG members welcomed the opening of the new negotiations and experessed full support for the U.S. approach. They noted that the U.S. position in Geneva would offer ample room for serious negotiations towards an equitable and verifiable.

U.S. negotiators face an uphill task at Geneva. Reginald Dale reports

# Seachange for nuclear strategy

THE U.S. comes to the Geneva negotiating table with the most ambitious aims of any American Administration since the dawn of the nuclear age. Not only does it seek unprecedented reductions in, as opposed to limits on, offensive nuclear weapons—it ultimately foresees a world in which all nuclear weapons will be obsolete.

have been heavily to the The Administration has the insistence that star wars must be stopped now. If not, Moscow fears it presents to settle for any be argued that all three depend on the Soviet Union agreeing in Above all, as Mr Paul Nitze, Geneva to restrain, if not strike first without fear of retuctions, something that Moscow has said thet it can never previous agreements "have intercontinental strike force asset."

weapons will be obsolete.

To get from here to there, Washington is proposing to turn the entire concept of nuclear deterrence on its head, in a monumental move from offence to defence, from the doctrine of "mutual assured destruction" to whet President Ronald Reagan calls "mutual assured" mutual assured to whet President Ronald Reagan calls "mutual assured security." To convince a hitterly bostile Soviet Union of the need for that change will he Washington's over-riding

objective.
While a more conventional agreement on strategic or inter-mediate range missiles may not be ruled out further down the road, Mr Robert McFarlane, Mr Raigan's National Security Adviser, has left little doubt about the U.S. opening position. Unless Moscow grasps the con-cept of stralegie defence, he said on Friday, there will be no basis for trede-offs.

no basis for trede-offs.

The hardliners in the Reagan Administration, who have usually set the tone of arms cootrol policy, do not believe that U.S. positions should be drawn up in the light of what is negotiable with the Soviet Union. The touchstone is American strategie interest—if he cannot have what he calls a good agreement, Mr Reagan would rather have none at all. He believes that, thanks to He believes that, thanks to American technological pre-eminence, failure to agree would cause the Soviet Union more problems than the U.S. Past arms control agreements, the Administration's view,

Washington is proposing to turn the entire concept of nuclear deterrence on its head in a

rested for the past quarter of a century.

To restore the balance, as Mr McFarlane sees it, the U.S. bas three options. It can attempt to reduce the Soviet offensive systems to equal levels in negotiations, it can try to match them, and it can try to defend itself-mailer them.

monumental move from offence to defence, from the doctrine of mutual assured destruction to what President Reagan calls mutual assured security'

t forces. It is pouring equal amounts of resources into defence, including its own star wars programme, and has failed to comply with both the spirit and letter of past agreements.

Against this, the U.S. bas fielded hardly any new offensive systems and done virtually nothing about defence. The Soviet Union bas not only upset the offensive balance, but is actually shielding its forces to "on which deterrence has rested for the past quarter of the century.

building up its offensive forces to counter star wars without without welling for the weapons to be deployed.

Mr McFariane replies that such a response to star wars without welling for the weapons to be would be "hopelessely self-defeating" if the U.S. sticks to the criteria it has set itself for deployment. These are that the space-based elements of any defensive system must be relatively invulnerable and that it is cheaper for the U.S. to add to its defences than for the Soviet Union to expand its offensive forces are wars without welling for the weapons to be would be "hopelessely self-defeating" if the U.S. sticks to the criteria it has set itself for the union be a response to star wars without welling for the weapons to be explored.

Critics of star wars believe Critics of star wars believe that neither criterion can possibly be met, but that there will be so much momentum behind the programme that the weapons will be deployed any-way. Certainly, the Soviet position in Geneva is based on

never accept if the boot where on the other foot). If the Soviet Union develops star wars first, Mr Reagan sald in an interview

Mr Reagan said in an interview yesterday, Moscow would be able to issue "an ultimation to the world."

The way round this, in the U.S. view, is to phase in the ephoyment of the new defensive systems, probably by both sides, in a way that would not tempt either of them to strike first while the transition took place. Whan the U.S. talks about negotiating in the future on star wars deployment, it does not mean talking about limiting or abolishing the system, but about how best to introduce it. As it was progressively deployed, was progressively deployed, offensive missiles, and with them the concept of mutually assured destruction would be

phased out.

It is this thet will be at the heart of the U.S. aproach in Geneva. Many Americans outside the Administration believe that it is unrealistic, if not dangerous. It remains, however, President Reagan's vision and be is a true believer. It demands an historic—and vastly expensive—change in Moscow's demands an historic—and vastly expensive—change in Moscow's entire nuclear strategy. It does not seem, in Mr Reagan's eyes, to be susceptible to compromise.

# UK ban on milk imports faces European Court test

A FULL SCALE legal confron-

European Court of Justice for the ban, which it says is an illegal restraint on trade.

Britain argues that the embargo is necessary on health grounds. In its recent reply to the Commission's "reasoned opinion" on the han—the first step in EEC legal proceedings— the UK made it clear that it intended to fight the case.

A FULL SCALE legal confrontation between the UK and the European Commission over Britain's ban on imports of pasteurised milk is expected to begin this week.

The Commission will decide formally at its weekly meeting tomorrow to take Britain to the European Court of Justice for the We think we've got a case, and therefore it's worth fighting, said one British diplomat yesterday. "The UK experience with the European Court has been rather unhappy but we haven't lost every case."

But the issue has revived memories of Britain's efforts to defend its previous ban on the Community."

"We think we've got a case, limports regardless of the origin.

"We're a little bit surprised that Britain has chosen to defend this case," said a Commission official, "Milk is a product that is widely traded across frontiers in the rest of the Community." defend its previous ban on imports of ultraheat treated (UHT) milk, which were defeated in the European Court

The British dairy industry is also surprised at the decision by Mr Michael Jopling, Britain's defeated in the European Court more than a year ago.

Britzin argues that the health risks involved in importing pasteurised milk are greater than in the case of UHT milk.
But the Commission does not accept that this justifies a blanket ban on all fresh milk

# EEC nations feel their way through the car pollution fog

BY PAUL CHEESERIGHT IN BRUSSELS

The assume that when they have finished they will have set technical standards for making the air cleaner than it is now

EUROPEAN Community countries are moving into a crucial phase of political and technical negotiations about cleaning up car exhausts without any very clear idea of the precise results they can achieve.

Establishing a European motorway conditions. Much of the blame attached to European driving and its role in the formulations which will not be mation of acid rain is related to mittle June, or just scorching up and down motor-before West Germany plans to introduce fiscal incentives to introduce fiscal incentives to Yet there have existed, since encourage the purchase of cars 1970, EEC exhaust standards with the converter.

Because West Germany cannot produce a European stan-

#### Oslo undercuts **BNOC** price for Brent

By Fay Gjester in Osio

NORWAY'S oil industry yesterday published guideline crude oil prices which show Brent blend crude at 55 cents a harrel less in the fourth quarter of 1984 than the British National Oil Corporation (BNOC) price for December.
The so-called "norm" prices

are fixed every quarter in Norwegian kroner, for taxation pur-poses, by the official Petroleum Price Council. They assume 30-day credit. The equivalent dollar value, published simultaneously, is based on average rates of exchange during the quarter.

The fourth quarter norm prices put Brent blend crude, FOB Sollom Voe, at NKr 248.70 (\$28.10) a barrel

# French shift to right confirmed

THE SUBSTANTIAL shift to the right of the French electorate was confirmed yesterday with the annoncement of the results of Sun- have been reduced to a rump in the day's local elections which showed that the right-wing parties won 57.8 per cent of the votes, against 41 per

This marks a reversal of the situation in the parliamentary elections in 1981 when the left gained 55.6 per cent of the vote after M Francois Mitterrand's presidential victory. But the right's score on Sunday was in line with its performance in the European elections in June when it also gained 57.5 per cent of

The immediate political question reised by the result is how much proportional representation Presient Mitterrand feels he can introduce into the voting system to pre-vent a right-wing domination of the National Assembly as a result of next March's parliamentary elec-

On the basis of the existing single-seat majority voting system. the Socialists on Sunday would National Assembly, leaving M Mit-terrand in an isolated and possibly

M Mitterrand's hope is to build a new centre-left majority in a di-vided Assembly after 1986. He received support towards this goal in yesterday's results which showed some fragmentation of the right. Independent and moderate right-wing candidates gained 12.9 per cent of the vote, while the extremist National Front won 8.69 per cent.

untenable position at the Elysée.

But most political analysts were yesterday agreed that proportional representation could be of only limited value against the size of defeat reflected in Sunday's poll.

For M Mitterrand's strategy to be credible, the Socialists - as the pivot of a new coalition - would also need to obtain closer to 30 per cent of the vote than the 26.5 per cent PERCENTAGE OF VOTES IN FEIST

OF and NPR leat right

that they and the radical left won

Several senior Socialist leaders. including M Pierre Bérégovoy, the Finance Minister, who also hold elected local posts, will have to stand in electoral run-offs in the second round of the election next

The Communists have announced that they will stand downagainst Socialist candidates who were in the lead in Sunday's poll but the terms of the Communist declaration suggest only luke-warm

The National Front made its deepest inroads in the departments bordering the Mediterranean coast and in the northern cities - both areas where immigration is high and the Front's racist campaign

found an echo. In the Var, for example, M Jean-Marie Le Pen's party scored 20.24 per cent of the vote - rising to a record of 31 per cent in one district of Toulon - and in the Bouches du Rhone, 19.46 per cent.

Although the Front's national score of 8.69 per cent was down on the 10.9 per cent it won in the European elections, most observers put this down to the fact that it was represented in only three quarters of the cantons that went to the poll and that it is a new movement.

It is accepted that the Front has established its claim to be taken seriously as a national party – and one that poses dilemmas for the parliamentary opposition hostile to its extremism.

# Inter-German contacts begin

CONTACTS between East and West
Germany at the highest level for many months will begin today

Honecker, the East German leader, man president said a recent statement to the Bundestag by Herr Helmany months will begin today many months will begin today when Herr Martin Bangemann, Bonn's Economics Minister, begins talks with the East German leader-

Herr Bangemann was recently elected chairman of the liberal Free Democrat Party, the coalition partner of the Christian Democrats. Herr Bangemann will meet Herr Günter Mittag, East Germany's economics chief, in East Berlin today for talks on expanding East-West German trade, which rose to a record DM 15.4bn (\$4.53bn) last year.

Tomorrow he will meet Herr Erich

The West German Economics Minister will then visit the Leipzig

East-West Trade Fair for a me with Herr Horst Soelle, East Germany's Foreign Trade Minister. Last weekend Herr Honecker played down a heated controversy tween West Germany and the Warsaw Pact countries over alleged

"irritations." During a meeting in Leipzig with Herr Hans-Otto Brantigam, West Germany's permanent representative to East Germany, the East Germany.

"revanchism" in Bonn by calling it

cellor, on the inviolability of all European borders had helped to "calm down" the issue.

This recent statement will have a highly beneficial effect on our mutual relations," Herr Honecker told the West German envoy.

Herr Honecker said his country was prepared to expand trade with West Germany, which he said would help to create "favourable conditions" for the development of

# EEC factories become busier

munity are becoming busier, but time arrangements. even if the scope for greater produc-tion were taken up, the effect on un-employment would not be very cent in January, marginally higher

Greater business was particular-ly evident in plants in the UK and France, Danish and Dutch plants have little excess capacity, despite the substantial increase in investment since the start of 1984. In France, Luxembourg and Italy, a significant amount of slack is expected to remain.

Relatively stable raw material prices and moderate wage settlements have helped to keep costs under control.

#### Polish leader attacks talks on debt

By Christopher Bobinski in Warsaw

GENERAL Wojciech Jaruzelski, the Polish party leader, has sharply criticised the country's 17 main Western government creditors for "intro-ducing new demands and in a sense going back on the spirit of agree-ment in Paris Club debt refinancing talks last week.

His comments on the Paris Club talks are unusual. Mention of the issue at the highest level shows the measure of Polish concern at developments in the talks.

The general, speaking to Party members in the Polish Baltic port of Szczecin, especially attacked the West Germans for leading the "assault" at the Paris Club meeting which was devoted to refinancing payments falling due this year.

At issue is the Polish request to the Western governments for some \$1.7bn worth of new trade credits this year which, the Poles say, are essential if the terms of a negotiated agreement on retinancing payments that fell due between 1982 and 1984 are to be carried out.

The agreement has been merely initialled, and the Poles say they will not sign unless new trade credits are granted.

# Where others stop, we start.

It has become the fashion in recent times for a lot of other software manufacturers to try and do a little too much at once.

Rather than offering a very good spreadsheet package, a very good word processing package and a very good graphics package, they wrap the whole lot up in one.

And it sells. But to whom?

Does it sell to businessmen who know that to produce the very best software, whatever the subject, you have to be utterly single-minded in your pursuit of excellence?

Does it sell to people who understand that performance is far more important than packaging?

We think not.

And it's for this vital reason that we have ploughed a different furrow.

In producing Multiplan, our spreadsheet, Word, our WP package, Chart for graphics and Project for project management, we have designed the best there is.

The most powerful, the most thorough and the easiest to operate.

And kept them separate. Of course they work together.

You would expect them to. But only by choosing Microsoft can you be sure you're getting the ultimate in business software.

With facilities that have not been minimised to make room on the disk for other things.

And we think that's the most important point of all.

What do you think?

# MICROSOFT Right. First time.

take up the relay for the next Mr Mu stage of the Middle East peace initiative that he launched in Cairo just over two weeks ago. But there is little sign that Mr Reagan is yet ready to run with the baton. Indeed, the U.S. view is that the Arabs must do a few more laps around their home track first.
It is not that Washington is

totally unsympathetic to Mr Mubarak's latest plan, which calls for a dialogue between the U.S. and a joint Jordanian/ Palestinian delegation to prepare the ground for direct Arab-Israeli peace talks. The Administration does not share the view of some more cynical, pro-Israeli members of Congress that Mr Muharak is simply making peaceful noises because he wants more American aid. There are, seen from Washington, good reasons why the moderate Arabs should be serious about wanting progress. The U.S. presidential elections, which

Mr Mubarak is clearly in-creasingly concerned that creasingly concerned that extremist and terrorist movements pose a growing threat if the moderates cannot show results on the Palestine problem. From Egypt's point of view, Mr Mubarak believes that a broadening of the peace process to include other Arabs would finally vindicate his country's Camp David policy of conting a second of the process of the peace of the seeking o separate deal with Israel.

Most, if not all of this analysis is shared by Washington. But from the Reagan Administration's viewpoint, the momentum now gathering in the Arah world following last month's agreement between King Hussein and Mr Yasser Arafat, chairman of the Palestine Liberation Organisation, on a framework for peace negotiations, has come o little too soon. too soon.

Reagan: cryptic hints in Washington's probably over-

optimistic assessment, could perhaps be achieved by the antumn To those who reply that the time never seems to be ripe for Israeli concessions—or for U.S. pressure for them—Washington believes there is no point in holding negotiations ot all unless the Israeli Government

Mubarak: at a crossroads

to torpedo it if necessary. Washington's immediate prob-iem is what to do about Mr Mubarak's specific proposal for a U.S. / Jordanian / Palestinian dialogue. It does not want to compromise its long-standing principle of refusing to talk principle of refusing to talk trace to get in the PLO until it recognises tance to get im Israel and accepts UN Security. Mr Shultz is store to prospect of an exchange of his much-trump the prospect Palestinian/Jordanian delegation would almost certainly include PLO members, and does not was and Mr Arafot, while accepting the last, by implication results.

Some kind of fudged solution could possibly be contrived on the delegation, but the U.S. does not want to provoke a prema-ture row with the Israelis on the issue at this stage. It believes that the Arabs can and must come still further to meet its position and that its policy of playing hard to get is bearing

After all, Arab leaders are now flocking to Washington appealing to Mr Reagan to take the initiative and Mr George Shultz, the U.S. State Secretary, believes they can be drawn further. That is why the State Department keeps dropping coy, if cryptic, hints about U.S. readiness to re-engage in the peace process if the conditions are right. If, however, the U.S. engages itself too soon, it is afraid that the Arabs will relax and make no further

efforts at compromise. There are, however, other reasons for Washington's reluctance to get involved too soon. Mr Shultz is still feeling sore

clude that ofr the time being the Middle East may simply be a hopeless case that does not matter very much after all. The oil crisis is over, the Soviet Union is preoccupied elsewhere and there is little likelihood of a new war in the region. The Reagan Administration, after all, once thought Lebanon mattered, that it was vital to U.S. interests, then walked away and nothing too serious hap-

Mr William Quandt, a senior fellow ot the Brookings Institu-tion and one of Washington's foremost Middlo East experts, believes that the Middle East may now be fading as a U.S. strategic pre-occupation in much the same way that South-East Asia did before it. The Middle East is now only the third or fourth most pressing U.S. foreign policy issue, well behind Central America, he

says. Today's opening of the Geneva arms talks will certainly attract far more national atten-The U.S. presidential elections, which normally put a completo hold on anything smacking of U.S. pressure on Israel, are over: Mr Shimon Peres, the little more time, First, tho new Israeli Prime Minister, is viewed at least privately by the Arabs as somowhat more amenable than his predecessors and, perhaps most importantly, tion than Mr Mubarak's visit to Washington—and arms control

#### Motorola chief warns on 'offshore deployment'

By Louise Kehoe in San Francisco

U.S. manufacturing

THE sector is being forced into

greater offshore resource deployment because of Washington's erratic trade policies," says the head of one of the country's major electronic multinationals.

Mr Robert Galvin, chairman of Motorola, said that the company had not been successful in persuading the Government to adopt corrective policies.

Motorola "will continue to increase the allocation of our product development and manufacturing resources to non-U.S. sites that provide better competitive condi-tions." he said in the company's annual report released

Motorola's threats are not without teeth, for the com-pany has announced mans for a major semiconductor manufacturing plant in Taiwan, with an initial investment of \$48m (£43.6m) possibly rising to \$100m.

Mr Galvin said U.S.-based dustries suffer a significant disadvantage to competitors located elsewhere, particularly in the Asia-Pacific region.

The value of the dollar, the cost of capital, direct and in-direct costs of labour were influential factors. Competition itself was generally tilted with easy access given to foreign participants in U.S. markets "while U.S. producers continue to confront a variety of impediments to participation in corresponding foreign markets," be said.

Motorola, with worldwide sales of \$5.5bn last year, has a history of trade disputes with Japanese electronics concerns and is promoting a temporary import surcharge of 20 per cent of the promotion of the property of the promotion of the property of the p 20 per cent on manufactured imports.

The company recently filed an anti-dumping action against Japanese manu-facturers of cellular car telephones, claiming they were being sold in the U.S. below

Two years ago, the com-pany won a judgment against Japanese makers of pocket pagers, who were found to have illegally damped products on the U.S. market.

Bernard Simon in Toronto examines a long-standing licensing row

# Drug groups press for protection

dian Government is likely to Canadian manufacturers to pro-come to a head soon when duce their patented prescription of the local pharmaceutical canada's laws normally pro-

industry. Eastman Commission, eaded by a Toronto economics professor, bas a wide hrief to review official policy on pharmaceuticals, and much of its report is expected to deal with ways of expanding local re-search and development.

But most interest in centred on the commission's view of the contentious "compulsory licensing" system that has eroded foreign drug makers' patent protection and dampened many companies' enthusiasm for doing business in Canada.

The compulsory licensing controversy will be raised by President Ronald Reagan when be meets Mr Brian Mulroney, the Canadian Prime Minister, in Quebec City on March 17. The British Government, as well as the EEC bave intsr-ceded on behalf of the multi-

national pharmaceutical companles in the bope of persueding Canada to soften, if not abolish, compulsory licensing of drug production.

The Commission's recommendations, which are still secret, were handed to the

A 16-YEAR-OLD dispute he-tween multinational pharmaceu-tical companies and the Cana-maceutical suppliers to licence maceutical suppliers to licence Canadian manufacturers to pro-

> tect patent holders for 17 years, but the compulsory licensing system enables local companies to apply for manufacturing rights within two or three years of the drug coming on the

More than 300 licenses have been granted since 1969 for been granted since 1969 for such well-known drugs as Smith Kline Beckman anti-ulcer Tagamet and, more recently, Miles Laboratories' Adalat, prescribed for cardiac problems.

Mr Ian Anderson, who beads
the Canadian subsidiary of
Fisons of the UK, says that local

manufacturers "only pick off the easy targets. They don't go for the smaller-volume products." The multinationals' complaints are growing louder as the practice of compulsory licensing expands. Almost half the applications from Canadian generic manufacturers in the

past 16 years have been submit-ted since mid-1983. Adalat was licensed to a local company just 30 months after coming on to the market, and Canadian manufacturers have begun applying for licences on

generic manufacturers is to wait a few years to allow the foreign company to establish the product in the market.

U.S. and European drug companies are also concerned at recent moves by generic manufacturers to export cheap, Canadian-made medicines to other countries with weak patent laws. Saudi Arabia and some African countries are mentioned as examples.

A few multinationals have demonstrated their displeasure tangibly. The policy prompted Hoffman-La Roche of Switzer. land to close a manufacturing facility outside Montreal three years ago, and contributed to Ayerst Laboratories' decision to move its main research and development centre from Canada to the U.S. state of New Jersey.

SmithKline's Canadian subsidiary has threatened to halt production and cease registerng new products in the co if the system is not modified. According to Mr William

Robson, president of Smith Kline's Canadian subsidiary, compulsory licensing now accounts for 87 per cent of sales and the company's products in Canada. Mr Robson told the Eastman Commission that "it has been tempted simply to abandon our fully-integrated operation in Canada and resort to import-

decided lightly since the country is estimated to be the world's ninth biggest market for pharmaceuticals. The Canadian prescription drug market is worth roughly C\$1.2bn (£800m)

Some observers say ent is unlikely to dismantle the compulsory licensing system altogether. A possible compromise may be an increase in the royalty fee paid by local

The Canadian authorities recently from new licence approvals for 120 days in an effort to persuade generic manufacturers to agree to a

The generic drug companies arguments strike a sympathetic note among Canadians con-cerned at the high level of fereign centrel of local industry and the limited amount of research and development and raw materials synthesis carried out by foreign pharmaceutical companies in the country.

According to the Canadian Drug Manufacturers Associetion, which represents the interests of the generic industry, compulsory licensing belps create a viable indigenous pharmaceutical industry, pro-motes competition, and holds down medicine prices.

In a 1983 study, the associa-tion estimated that Canadian secret, were handed to the begun applying for licences on fully-integrated operation in Canada and resort to importing.

Introduced in 1968 in an effort to reduce local medicine prices,

#### **Quito likely** to sign 20 oil search contracts

By Robert Graham ECUADOR EXPECTS to sign up to 20 oil exploration contracts over the next two years. according to the Ecuadorian Off Minister, Sr Javier

This would mean minimum investment in exploration of \$1bn (£980m) by foreign companies, he sid. Sr Espinosa was in London last week talking to oil com-pany representatives to stimulate interest in Ecuadorian oil exploration following a major liberallya-

tion in the laws governing

Sr Espinosa saw representa-tives of 15 companies, including BP, having the previous week talked with 27 different companies in Houston, Texas.
Ecuador, one of Oper's smallest producers, carrently has an output of 279,000 b/ds, but its reserves are depleting and new discoveries are needed to sustain existing levels of exports and med domestic demand.

The Ecuadorian Government is heping to capitalise on renewed interest by the oil companies in the Pacific. Coast countries of Latin America, following the disappointing results of the oil exploration programme in China.

So far, 16 companies have bought the country's latest oil information package cost ing \$50,000.

At the end of January, Occidental signed the first of the new risk contracts offered by the Government. Sr Espinosa says he expects a similar contract to be signed within a month by Exxen, also for acreage in

the Amazon, and later, another with Belco. After this, the Government plans to offer four blocks in each round of hidding since it does not have the resources to cope with more simul-taneously. The minimum investment will be \$50m. "We must enter aggressively into exploration," Sr Espinosa said. "We need to

double our reserves in order to keep up our current level of exports through to the year 2010."

Z

#### Eximbank's Mexico, Brazil Jamaican ethanol plant special credits to expire

WASHINGTON-The U.S. Ex- about 27 per cent of the port-Import Bank's special trade credit programmes totalling \$2bn (£1.8bn) for Brazil and Mexico, launched with considereble fanfare in late 1983, are scheduled to expire et the end of this month.

Neither Latin American country has made much use of the special arrangements, which totalled \$1.5bn for Brazil's purchase of U.S. exports and \$500m for Mexico. "It looks like they will not be

extended," an Eximbank official

Until last December 31, the

amount available Mexico has made use of about \$28.8m, or less than 5.8 per cen of the \$500m trade credit guarantees.

However, U.S. officials do not regard either the Brazilian or the Mexican programme as a failure. The special arrangements

authorised when the inter-national financial community was worried about the ability of both countries to deal with external debt problems, pro-vided "psychological induce-ments" for commercial bankers Eximbank provided loan and to continue lending to Brazil export insurance guarantees and Maxico, an Eximbank offitivity for Brazil, or AP-DJ

# faces U.S. market blow

Ecuador is currently sell-ing its crude at \$26.50 per barrel on 30-day contract.

In just 26 years, Hitachi has sprung to the forefront of circuit technology. From the production of simple transistors for pocket radios, to the development of integrated circuits for data processing, to very large-scale integrations (VLSIs) for . super-computers, wa've been providing the know-how and products that mark the Electronics Age.

#### We taught a rock to remember

Today, the results of Hitachi research are in use all around you. Microchip memory devices that store over a million bits of rapidly accessible information on a single 1/2 cm² slice of silicon, one of Earth's most abundant minerals. Tiny microcomputers that can control the operation of "intelligent" elavators, locomotives and powar-generating equipment. Microcircuitry found in key-type telephones, high-speed printers, display terminals and other electronic office equipment, too.

Hitachi's semiconductor experts are now perfecting methods of etching micron-wida circuits on water-like silicon bases to increase chip capacity. They are combining microelectronic design and electron/photo lithography with robot-assisted production processes to ensure a steady supply of high-quality

microchip components.

In fact, we are constantly coming up with innovations and new applications. One of them is our super-cooled Josephson junction logic circuit, featuring the world's fastest switching speed of just 5.6 billionths of a second.

These are just a few of tha ways in which Hitachi puts advanced technology to work for you. Creating practical tools that meet your needs... and those of professionals in business, manufacturing, and virtually every other field you can name.

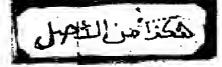

#### Even better is yet to come

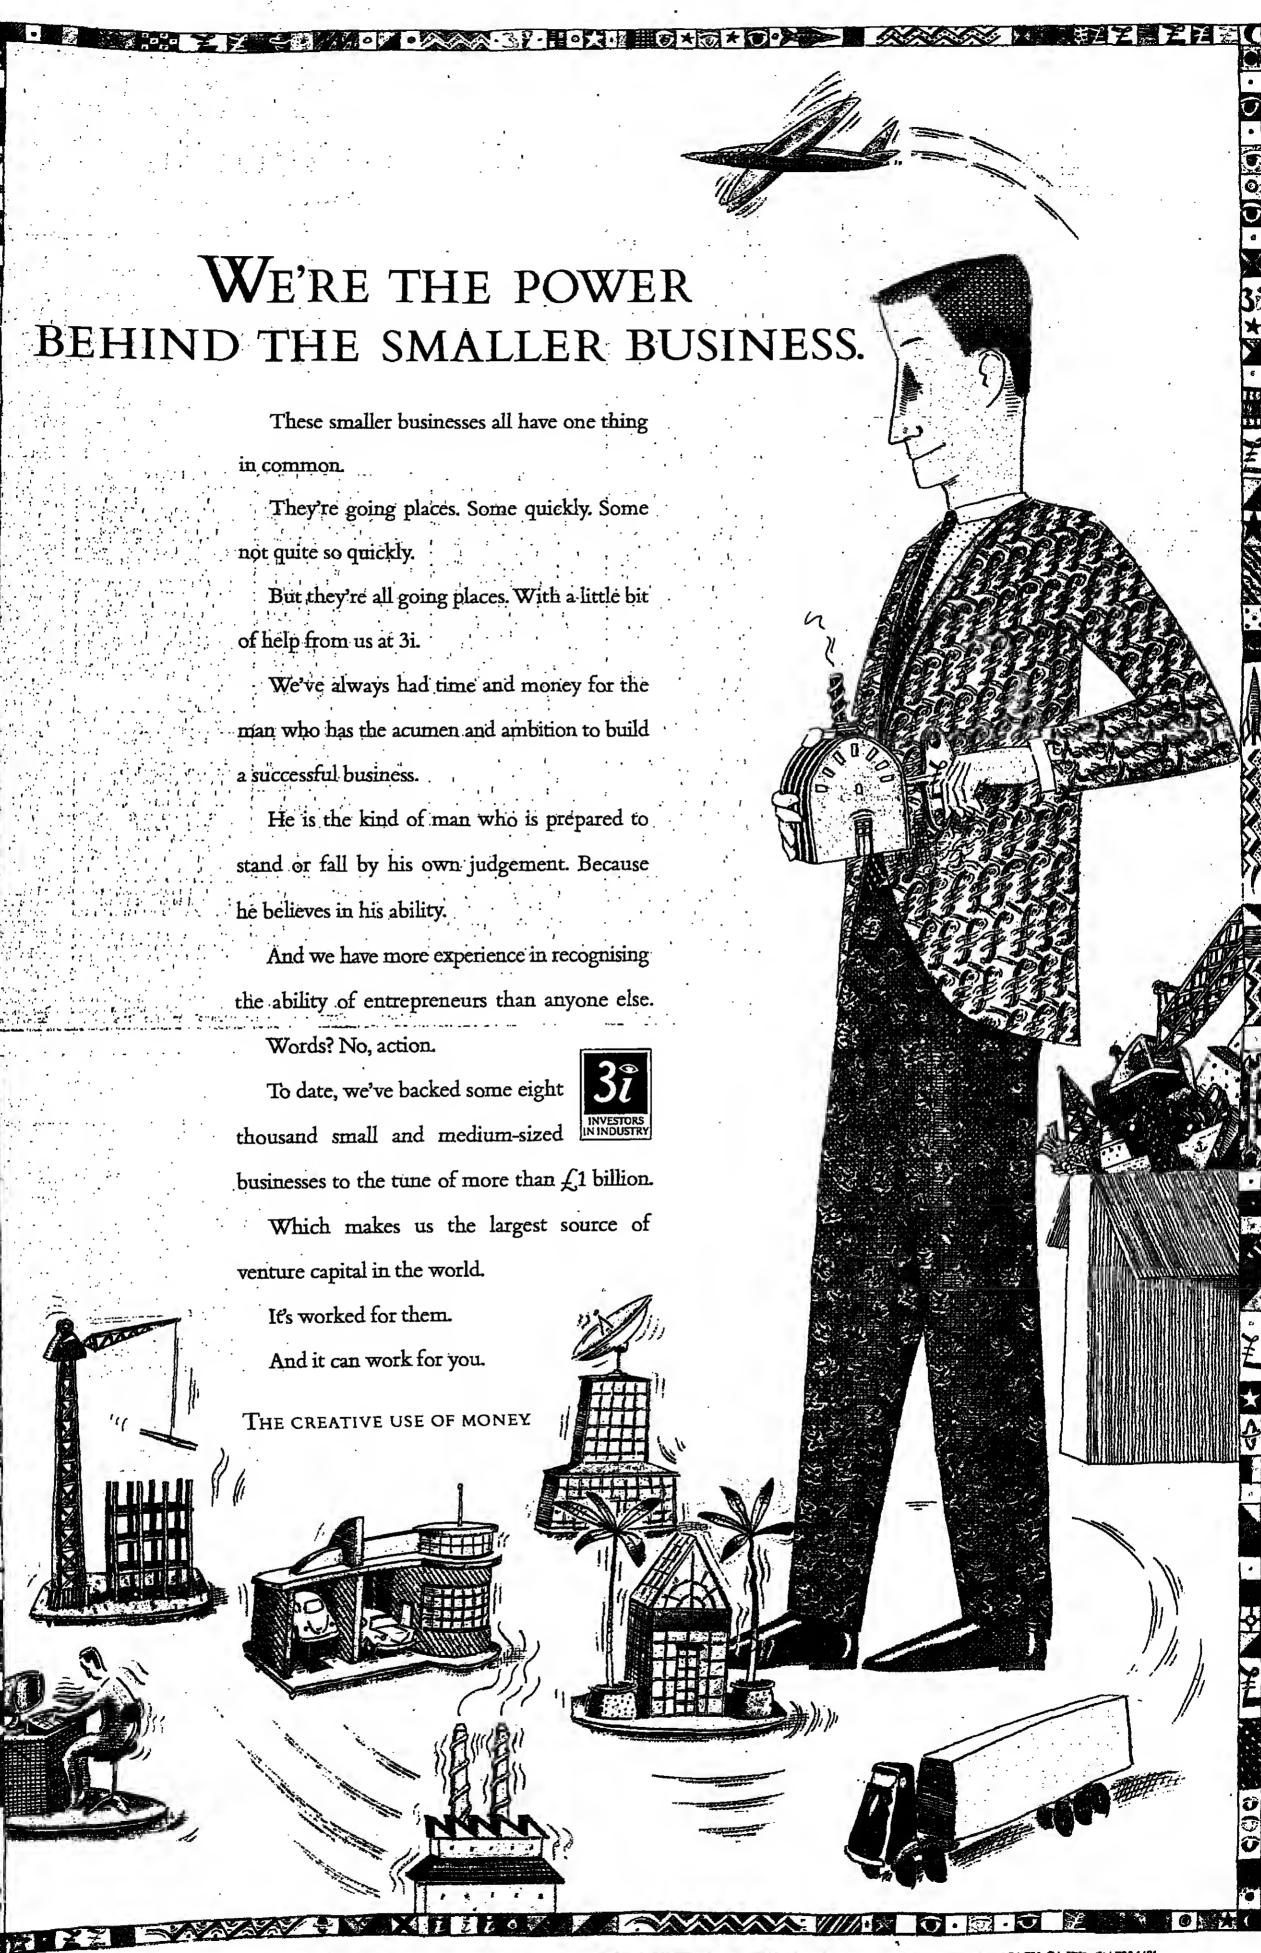

Our vision of tha future includes personal computers and TV-telephones no larger than pocket calculators. Automatic transportation systems that handle traffic control for antire cities. Homa robots that "think" for themselves. And much, much more.

We'd like you to share in the benefits of our scientific research, covening the next generation of lasers, sensors, and other electronic devices. For improved business efficiency. For a higher quality of life. Two goals we've pursued for 74 years as part of our commitment to a better world through electronics.

WE BELIEVE MICROCHIPS ARE THE BUILDING BLOCKS OF FUTURE SOCIETY

Salmarine and Rennies Holdings Limited

- ce with the Accounting Standard AC 110 the Selfen Group accounts for its shere of the profit of compenies according to the equity accounting method, providing the Group's interest in the equity disted company amount to 20% or more of the issued capital of the company.
- The comparative figures for the heli year ended 31 December 1983 and for the full year ended 30 June 1984 have been prepared from the financial information provided by the relevant companies. These results have been restated in order to provide as eccurate a comparison as possible.
- Salmen was formed to merge the operations of Salmarine and Flaraties with effect from 1 July 1994 and much progress has been made in the structuring of combined operations. Formal shareholders' epproval was secure on 20th and 27th November 1994.

It is pleasing to report satisfactory financial results notwithstanding the normal damption of a merger and the poor community. This confirms the synergy between the two Groups which was referred to in our merger recommendations. The economic climate continues to worsen but our Group is well belanced and equipped to hendle distribut times. It is not possible to forecast the full year's financial result with any degree of accuracy but the Group's large to site a total dividend of 76 cents per Satien share subject to the cavealthat results must be affected by any further deterioration in economic conditions.

- The Safern Group's policy is to cover foreign loans where these have not been specifically raised to finance dollar denominated assets. This policy has been followed in the period under review.
- 4. The Group's term borrowings at 31 December 1984 were FIS81 000 000 (30 June 1984 FI459 000 000).

Declaration of Interim dividend No. 1
Notice is hereby given that a divident of 26 cents per share has been declared. This dividend for the half year ended 31
December 1984 is payable on or about 12 April 1985 to ordinary shareholders registered in the books of the Company
at the close of business on 29 March 1985.

CAPE TOWN 1 March 1985

IN THE SPRING of 1973 executives at Eastman Kodak, the U.S.-owned photographic products company, heard an internal talk on labour relations. "Today our biggest fear," the speaker told them, "is the international trada union movement. Its long-term objective is to have full collective bargaining with multinational corporations." porations."
Twelve years on, that seems laughable. International bargaining remains a distant union dream, while the growth of multinationals' sophistication has outstripped tha desperate efforts of mions to match their strength. Little impact has been made by Governments, let alone unious, on companies' freedom to open and close plants, switch

A French protest—near Montheon—against lay-offs by the multimatical lyre compa

Despite the hostile climate, however, unions are still trying to take on the Goliath.

to take on the Goliath.

Unions representing Ford workers in Britain, West Germany. Spain, Belgium and Portugal are threatening to support industrial action "np to and including occupation" if Ford closes a Furnment when

Ford closes a European plant.

A rare success has been achieved in saving a Coca-Cola bottling plant in Gnatemala

cotting plant in Gnatemaia City from closure after a 12-month occupation and a cam-paign by the International Union of Foodworkers which

involved strikes at Coca-Cola plants in Sweden, Norway and Mexico, along with short stop-

plants across Europe. Shopfloor representatives have been trying to develop international links, with mixed

and Merck.

hoth manufacturing and service employment. In Britain, one in every two people in manufacturing works for a multinational company.

Eyen Scandinavian employers are giving international bargaining the cold-shoulder. Danish, Finnish, Icelandic, Norwegian and Swedish employers' federations have drawn up a code which urges companies to keep even consultative meetings within national boundaries, and not to accept institutionalised contacts with institutionalised contacts with international union bodies. If that is the attitude of the liberal Scandinavians, it will hardly be softer elsewhere.

Unions claim that multinationals are not only integrat-

pages in Italy and a consumer boycott in the U.S. boycott in the U.S.

• At Kodak itself, a "European Kodak Workers' Conference" has been pressing—unsuccessfully—for talks on investment plans and lobbying the EEC to investigate the company in ing production between countries, but becoming more sophisticated in their ability to shop around for cheap labour.
American Airlines and Bank of
America, for instance, ship
cartons of data forms to
Barbados and Brazil to be keyed investigate the company, in response to fears that Kodak is systematically running down into computer terminals, and then relayed to central records offices by satellite. Clerical workers cost \$1.60 an hour in Barbados, compared with \$9 an results, in companies like Unilever, Philips, ICI, Talbot hour in New York.

Smith Corona, the U.S. office equipment maker, has taken shopping around a step further: and Merck.

It is hardly surprising that unions, on the retreat even within their own countries, have failed to scare the multinationals. But companies are South Korean women with "im-

hoth manufacturing and service employment. In Britain, one in tries, preventing union access to every two people in manufacturing works for a multinational company.

Even Scandinavian employers

Even Scandinavian employers

against country.

The union response takes two distinct forms: international trade secretariats like the International Metalworkers' Federation, and networks being set up by shophoor activists in a growing number of companies.

The international secretariats are industry-based confederations of national unions, mainly founded around the turn of the century. They cover 15 incus-tries, including mining, metal-working, chemicals, agriculture. The food, transport, and white-collar workers.

Their activities range from providing information to transferring funds in support of strikes, and they have set up 60 "world company councils" in companies like Unilever, Ciba Geigy, Ford and General Motors, There have been some successes—like Coca-Cola—but even supporters admit the secretariats' record has been mixed.

Critics say they are burean-cratic and cumbersome, and that many lack shopfloor involve-

Multinationals now employ 45m people—40m in the main industrialised countries, where they account for one-third of strikes, threatening to move up—are the unofficial networks.

Their long-term alms are: to ex-change information; take soli-darity action, such as banning overtime in the event of dis-putes in other countries; coordinate campaigns; and carry out regional or company-wide pargaining. But it is a slow process.

That in itself can be a headache in companies like Unilever, which has more than 300,000 workers in 75 countries. The Unilever Workers' Information Network has held meetings of British, Dutch, Belgian, Indian and Pakistani workers, but arranging interpreters and translators is a monumental

The Ford of Europe's Workers' Committee has been striving to get beyond the information staga. It claimed one success in 1983 when—after pledges of solidarity—Ford did not try to raise output at Dagenham, England, to compensate for lost production caused by a strike for shorter hours and more jobs at Genk, Belgium.

Amsterdam lorry plant, in spite of refusal to accept transferred work by trade unionists in the UK.

Conflicts of interest between workers tend to plague solidar-ity efforts. The progress of an international committee at Talworkers are dosing jobs.

Rowntree Mackinson stream at Halifax. England, found to pledges of a common heart had CGT stewards in France and not enough to stop the Songar running flown employment. Halifax and increasing bridging to the Songar Rose and Song

in theory, unions can use codes issued by the Organisa-tion for Economic Co-operations and Development and the Engrand national Labour Organisation a a lever on multinational These urge them to show a postive attituda to union work, pro-

vide information on the whole company, promote job security, and not threaten to transfer output abroad during strikes.

But they are non-hinding, and unions say they are widely flouted. The most they are justificated. The most they are justificated to to generate publicity, as Britain's Trades Union Congress tried to do over the closing of a Caterpillar plant, and Dunlon's sale of UK manistres. of a Caterpillar plant, and Dunlop's sale of UK manufac-turing operations to Sunitémo

of Japan.
What really alarmed, the multinationals—and provoker strong opposition in the UKstrong opposition in the TK—were two proposed compaisory measures by the EEC: the Fifth Directive on worker representation and, especially, the Yredeling Directive, which would give information and compaint ion rights to workers in multinationals.

nationals.

The original Vredeling plan would have applied to companies with at least 100 employees in more than one subsidiarys in the EEC. Information would have had to be provided every six months. Decisions "sub-stantially affecting" workers would have had to be communicated 40 days before implem cated 40 days before implemen-tation, and consultation held "with a view to reaching agreeand more jobs at Genk, Belgium.

But for the most part, the history of the Ford committee, as of others, has been one of trying to strengthen international links in response to failures. In the early 1980s it failed to stop Ford closing its amperedum lorry plant, in spite them introduced a clause ching. been introduced; a clause giving. workers access to central management has been dropped; and mandatory consultation prior to decision-taking has been changed to consultation before actual implementation.

Patrick Blum on issues arising from profit-margin cuts

# Austrian banks try self-regulation

AUSTRIAN BANKS have decided to limit cut-throat competition by self-regulation in the latest of several attempts to improve profit margins. If the move fails, there will be, many bankers believe, no alternative to direct Government interven-tion and changes in the banking

Austrian financial institutions suffer from some of the lowest, profit margins in their field in Organisation for European Co-operation and Development countries in the last open and the second countries of the last open and the Co-operation and Development countries. In the late 1970s and early 1980s, operating costs soared, while provisions against foreign lending strengthened considerably. Several domestic developments further aggravated matters By 1983, the banks' capital base had deteriorated to the extent that the ratio of capital to lending had fallen to 2.5 per cent from 3.8 per cent in 1973, reaching about half the level 20 years earlier.

The agreement, taking effect

The agreement, taking effect this month, seeks to regulate lending and borrowing rates, curb "unfair" advertising practices. tices and to establish sanctions against breakers of the agreement. No loans are to carry times the interest below the rate at prepared. which the Government borrows. This rate currently stands at

Rates paid on deposits are to be structured more closely in line with the maturity of the deposits. For the time being, the minimum rate is 4 per cent, the maximum 6.5 per cent. The one exception is for five-year term deposits, which may be as much as one percentage point below prevailing long-term bond rate, now at 81 per cent.

Advertising interest rates will be banned. Banks breaking rules introduced will face fines of up to Sch 300,000 (US\$12,500) to be decided upon by a special arbitration court.

Whether the pact will work is open to question but agreement is widespread that something had to be done. There are several problem areas.

The most important has been the impact of the 1979 "Deregulation just went too banking law which, in effect fast," says Dr. Hans Haumer, transformed all credit institu-tions of any size into universal one of the leading saving banks on the West German and banks. But Austria's banks tions of any size into universal one of the leading saving hanks on the West German and Swiss models. The new law were beset by other problems. abolished controls on interest Just as the initial rush rates and on setting up new appeared to be subsiding, the branches, releasing an expan-Government entered into a prosionary impetus which cut into profit margins. The results bit deeply.

recent np-date to an original study made in 1980 by the OECD on cost and margins in banking shows that profit before tax for Austria's joint stock banks fell by over 22 per cent, from Sch 1.53bn in 1979 to Sch L19bn in 1980. It recovered slightly in the following two years, to Sch 1.51bn (\$63m) in 1982, still lower than before the law was introduced. Total operating costs (staff costs and other operating costs)

rose rapidly—increasing by 33.3 per cent between 1979 and 1982 for the commercial banks, and by 37.6 per cent between 1978 and 1981 for the savings banks. Much of this can be attributed to the expansion of branch networks. The number of branches run by the commer-cial banks grew from 515 in 1979 to 700 in 1984. Savings bank outlets increased from 835 in 1978 to 1,145 in 1984.

cent on January 1 of last year came with a sharp fall in savings and a marked lack of enthusiasm in the capital market. Dr Haumer Savs that

although savings have picked up since 1983, they do not cover for loans. In 1984 saving deposits increased to Sch 52bn including interest credited of Sch 37m. In 1983, savings deposits increased by Sch 28bn but, disregarding interest payments worth Sch 36m a reduction resulted. worth The tax caused other problems. Herr Klaus Peschek, senior Bankverein, Austria's largest bank, says that the tax played a major role in encouraging steep increase of the so-called industrial clearing-companies

lending their surplus liquidity directly one to the other, rather than involving the banks, The procedure avoids the interest tax, which is leased only on interest paid by credit in-stitutions. By resorting to industrial clearing, companies can borrow short term money at theaper rates or get a better return on their lending by short-

circuiting the banks.

For the banks it has meant a considerable loss of business and revenues. Accurate statistics are not available, as com-panies do not disclose their transactions, but Herr Peschek soon to have a political discus-believes that at its highest point sion about the law and swift

Industrial clearing seems to have declined in recent months, possibly as a result of the reduction of the interest tax to 5 per cent by Dr Franz Vranitzky, the Finance Minister appointed

in September. The move was designed to help the flagging capital market and ease pressure on the banks, but it is still too early to assess its impact. Dr Vranitzky and Professor Stefan Koren, the Austrian National Bank President, have also exerted some pressure or the banks to put there own general manager and chief bouse in order. Although some financial officer of Creditanstalt senior bankers say that the recent agreement was not dic-tated by the Ministry, it is an open secret that the Finance Minister was eager to see some changes made to banking

> Dr Haumer believes that the he says, "that it will stick, for a time at least, because the Finance Ministry and the Nat-ional Bank want it to work. Everybody realises that things couldn't go on as they were."
> But not everyone is as opti

mistic. Similar agreements have broken down before. The next few months will be a test. If banking practices improve, there will probably not be a case for changing the law. He says: "If not then we can expect very

# A LEADING SWISS BANK ASSESSES THE OUTLOOK FOR SWISS FRANC INVESTMENTS.

witzerland, Inc. is alive and well. Despite the fact that attention often tends to be focused on other markets, the country affords excellent investment oppor-

With its relatively small size and diverse population, Switzerland - one of Europe's major capital markets is truly international in outlook. For example, of the 30 largest Swiss corporations, 25 are multinationals, some of which generate only a small share of their business within the country.

Yet Switzerland reflects the traditions of a sound currency, good labor relations, fiscal realism and a stable political climate - all of which contribute to sound prospects for exports and company earnings. Indeed. because of the convergence of a number of factors, the Swiss franc should be of special interest to the international investor.

#### Bank Julius Baer

As one of Switzerland's most experienced and prestigious private banking institutions, Bank Julius Baer is well positioned to provide professional analyses of trends in key international markets - including expert recommendations on current

opportunities in Swiss francs. The Bank's international commitment rests on a cen-

tury-old tradition, based on the conviction that excellence of service is the basis for lasting relationships with its clients.

#### "The International Investor"

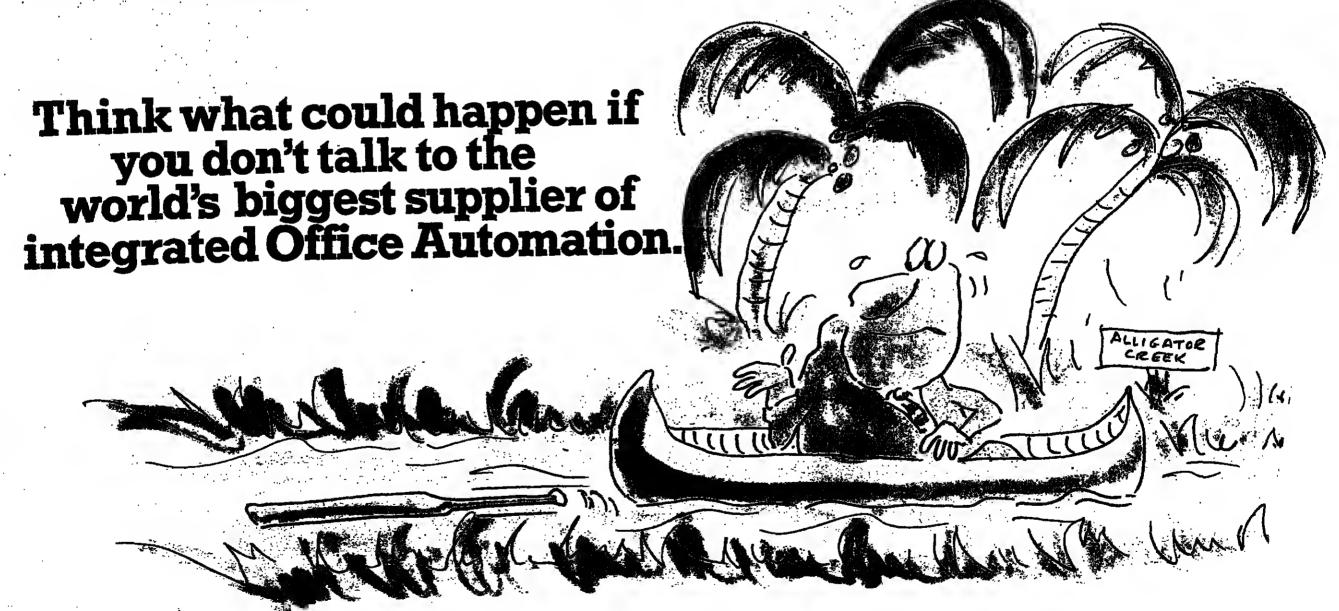

Timely, in-depth information has always been crucial to a successful investment strategy.

To provide the investor with reliable guidelines for decision-making, Bank Julius Baer publishes the quarterly "International Investor," which supplies valuable background information. The current issue takes a close look at the degree to which the serious international investor should include Swiss franc assets in a wellbalanced multicurrency portfolio.

We invite you to write today for a complimentary

BCOB BANK JULIUS BAER For the fine art of Swiss banking.

If you make the wrong decision choosing an Office Automation system you can end up feeling

very vulnerable. So Data General suggests a few important criteria to help you judge.

First, is the system really integrated?

The Data General Comprehensive Electronic Office (CEO) offers you word processing, electronic mail, information retrieval, personal computing and data processing. In fact, it's the only fully integrated OA system on the market.

Will it interface with other supplier's equipment?

CEO does: it will interface with most other equipment.

Anything from your mainframe to your personal computer.

#### Does it have a consistent user interface?

The CEO has the same set of function keys for everything from word processing to data processing.

It's the only OA system to offer a completely consistent user interface.

#### Does it allow for interruptions?

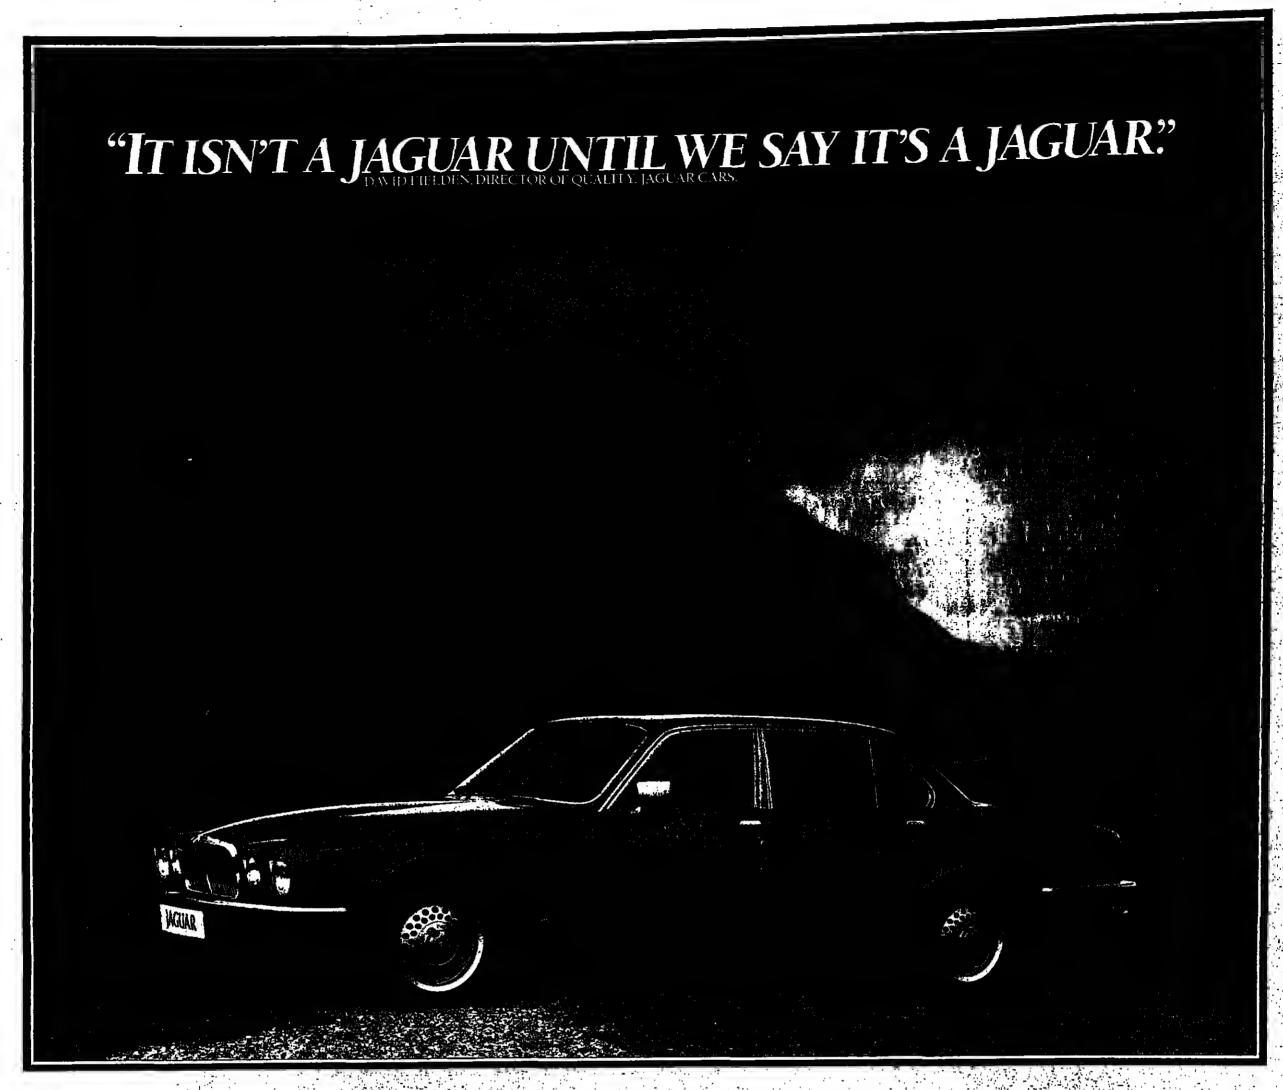

When you're working on one job, you often get side-tracked by requests that need urgent attention.

CEO lets you suspend work on one job to carry out another. Then you can go back to the original task exactly where you left off.

Of course, instead of comparing dozens of OA systems to see if they can equal the Data General CEO system, there's a much simpler alternative.

Choose the Data General CEO. And let others fight it out for second place.

"During the build process, the car passes through 44 major checks before it is finally passed for sale."

This calls for eye and experience, and painstaking attention to detail.

Not unnaturally, it takes time, but it's the best way there is to ensure quality, which in turn ensures success.

And at Jaguar Cars our demand for both is absolute.

You could say it has become an attitude of mind. One that involves everybody. From every one of the purple who build the cars, to every one of our suppliers. From foreman to top-management.

It means that our cars are not just checked out at the end of the assembly line, they're checked throughout every part of the manufacturing process.

Every component is tested during development and tested again during production.

We test through thousands of hours of continuous usage: way beyond the normal life span of component or car.

We use specially constructed rigs to test the performance and endurance of everything, from power steering gear to electric aerials. From eliminating the squeaks from an ashtray, to ensuring brake efficiency from maximum speed.

We have more cars on environmental test in more places than ever before. In extremes of climate and in the most extreme of conditions.

From temperatures as high as plus 52°C in the deserts of the Middle East, to minus 40°C below freezing in the arctic conditions of northern-most Canada.

A Jaguar must be able to undertake the hottest, coldest, fastest, roughest tesis that can be devised by man for machine and overcome them.

rism

A Jaguar must be able to run anywhere in the world, and perform to the levels of engineering excellence for which it is famed.

This is why, every month, we interview more than 100 Jaguar drivers from the UK and from as far affeld as Australia and the USA. We ask for their comments, note them, and act upon them.

Our 'customer tracking' research is one of the most important sources of information about our customers, our products, about Jaguar and our dealer network worldwide.

This feedback is more immediate than any service information. And it enables us and our dealers to get back quickly to a customer, when necessary, to satisfy him completely.

This is not only good customer relations, it's good business sense. It allows us to monitor improvements and helps us get our cars right.

It means, too, that we can ensure that Jaguar owners everywhere continue to relax in the quiet ambience of walnut and leather.

Then, and only then, are we prepared to call a Jaguar a Jaguar."

AUSTIN ROVER, the volume car

subsidiary of the state-owned BL

rehicles group, has boosted con-

siderably the UK content of the

model it makes under licence from Honda of Japan – the Rover 290 series – and has launched it

nn the Continent for the first

Today it introduces a version of the small Rover with its own 1.6 litre "S" series engine first used in the Montego launched last year. The Rover 216 model will have a UK content (by ex-

factory value) of 83 per cent, compared with 79 per cent for the Rover 213, which has a Hou-

da engine imported from Japan.

market

parts in

The local content statistics are important because Austin Rover hopes to do well with the Rover 200 series in France and Italy -where first deliveries are being made this week. These countries restrict imports of Japanese cars.

The Rover 200's predecessor, the Triumph Acciaim, initially had problems with the Italian authorities before they acknowledged that it was an "EEC" car.

The enlarged Rover 200 series will be introduced gradually to other major Continental ear markets after the launch in France and Italy. Triumph Acclaim sales on the Continent were about 10,000 a year, and Austin Rover expects the Rover 200 to do better.

Under the terms of the deal Honda collects more than £30m a year from the arrangement.

# GENERATING BOARD MAY SWITCH SOME BUSINESS TO ROAD AND WATERWAYS Rail may lose coal contracts

British Rail.

to press home their bids.

BY WALTER ELLIS AND JOHN LLOYD

هكذ من المحمل

THE CENTRAL Electricity Generating Board (CEGB) - which is known to have been greatly impressed by the efficiency of road hauliers during the miners' strike is now looking seriously to road and canal operators as long-term transporters of coal to power stations, alongside British Rail.

It has been known for some time that the CEGB is unhappy about its reliance on British Rail for most of its coal. Yesterday, however, the board said it was essential that it should enjoy security of supply and that all options were now being considered in the light of the "given failure of British Rail nver the last

An official of the CEGB said: "We need to supply electricity and en-sure supplies to customers at the most economical price. This could mean lorries, of course. It could mean canals. It all depends."

The board is concerned about the fact that railway unions would not even sanction the transport of coal from areas which were working during the strike. Most of the coal that was moved over the 12 months of the dispute was shifted by lorry, and Sir Walter Marshall, chairman of the CEGB, is reliably understood to have been delighted both hy the attitude of the companies and driv-

out on strike and negotiate for an amnesty for 180 men in Scotland sacked during the dispute. prices charged - in some cases as tions. It cannot be excluded that the much as 50 per cent below those of railway board is hoping to use the

However, he was under great which was certain to have been an pressure from the London Labour acrimonious affair, has been put back until next week.

The key problem for Labour is how to regain the propaganda initiative over rate-capping. The public splits and failure of councils to deliver their pledges of defiance who dropped the no-rate line, parti-cularly Mr Ken Livingstone, the ernment ministers. Mrs Margaret

leader, have always urged councils leader had been destroyed, and Mr Livingstone admitted yesterday Mr Larry Witty, the Labour Party that the Thries had been in effecgeneral secretary, was to the fore tive control in County Hall during the rates dehate.

The chaos poses a severe prob-lem for the eight rate-capped London boroughs which have agreed not to set a rate. They, and not their ratepayers, are liable to hand over the sums due under the GLC and ILEA precepts whether or not the borough has a rate.

Meanwhile, two High Court judges decided it would be "useful" to continue the hearing of a case in which the GLC and ILEA are chal-

# Shattering news from SKF.

Some years ago we spoke about 'the ultimate bearing'. The rolling bearing that would not fail through fatigue.

There was no way the ISO standard for predicting bearing fatigue life could explain this. Yet observations show – that given the right conditions — a bearing can last indefinitely.

Which tended to shatter our theory of the 40s a bit — our bearing life

formula is still the basis of ISO and bearing industry standards today. We were faced with a sizeable gap between theory and modern performance. A question-mark we were committed to resolve as technol-

ogy leader in the industry. Not surprisingly we had to take into account the radical improvement in material properties and manufacturing techniques. And a

deeper understanding of lubrication and sealing.

Of course the many complicated factors could only be integrated

using the advanced computer techniques at our disposal.

So theory and reality were finally harmonised.

We had created a new rolling bearing theory.

Some of our findings were presented in the U.S. last October.\*

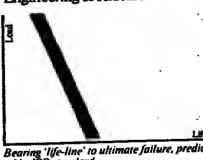

Now we are busy transforming the findings into design, manufacturing and application practice - at our Engineering & Research Centre in the Netherlands, with its hightech testing and computing

facilities. On the surface the effects may not seem exciting. Accurate prediction of bearing performance is one. Another is the downsizing of bearing design, retaining the required reliability for a given application.

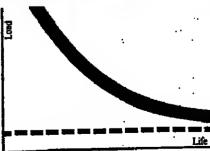

The exciting bit is the exist-ence of a load limit, below which a bearing in the right environment will never show fatigue.

The really formula-shattening news is that we understand why.

\* Presented at the San Diego Lubrication Conference of the American Societies of Mechanical and Lubrication Engineers.

Bearing 'life-line' to ultimate failure, predicted by ISO standard.

Bearing 'life-line' turning towards the infinite. New SKF theory provides an explanation.

# Consumer groups attack plans for state industries

in strongly worded comments on volve the Government appropriating financial reserves which belong to consumers and which are needed

The gas council says: The pro-posals would limit the gas indus-try's freedom to exercise commer-cial judgment in the conduct of its affairs and would give ministers virtually unfettered powers to es-tablish and adjust the financial framework within which British Gas would be required to operate.

The paper is sprinkled with ritual references to consultation, but in the end it would be ministers who designed to enable the Government to milk cash from profitable nationalised industries, particularly gas and electricity, if necessary by forcing up prices beyond a commercially instiffable leading to the council is leading to the council, the unitarity supply, is opposing the scale of powers proposed for ministers in setting financial targets and, by implication, tariffs.

But the council is leading to t ing up prices beyond a commercially justifiable level."

The gas paper refers to recent believes a move of government, action in forcing table as it become the state of the state market conditions and principles.

GOVERNMENT plans to stan- legal framework of requiring nadardise and tighten financial control of nationalised industries will drive up gas and electricity prices beyond levels commercially justifiable, consumer watchdog bodies for both industries said yesterday.

In strongly worded comments on the continuation of the hypothesis and tighten financial targets which "would legitimise the earning of large surpluses by the industry well in excess of those required for the continuation of the hypothesis.

the Government's recent consulta-tion paper on nationalised indus-tries, the National Gas Consumers' Council and the Electricity Consum- capital would be "a quite improper committand the Electricity Collision to the Treasury of money ers' Council say the plans will indiversion to the Treasury of money the Government appropriate accumulated by electricity consumers over the years.

The proposals, says the electricity council, "are totally contrary to the interests of electricity consumers. In effect these retained in trust for the future benefit of consumers. In effect these retained interests of electricity consumers. In effect these retained interests of electricity consumers. "The council believes very strongsumers who have contributed to the industry's finances over the years."

The Government has also run into opposition on its proposals from some chairmen of nationalised industries, notably Sir Denis Rooke, chairman of British Gas, who has taken a similar line against the plan as the National Gas Consumers Council.

Within the electricity industry, however, there is a greater range of opinion. The Electricity Council, the

# With a saving of just £1,000, this exporter went out of business.

When faced with the choice of whether to take out export credit insurance or not, our friend decided to pocket the cost of a policy and run the risk.

True, he saved £1,000.

Unfortunately his buyer went bankrupt, turning that little saving into a big mistake.

As export credit insurers we can't guarantee that things won't go wrong.

But we can guarantee up to 90 or 95% of an exporter's money if an overseas customer or country fails to meet its obligation to pay.

If you're in the export business, then you know about the risks.

If you're not insured against non-payment, then maybe that's a risk we can remove.

We know at least one man who'd agree with us, but he's not in business any more.

£1.000 represents a typical premium for comprehensive short term credit

#### London Galleries/William Packer

# Open eyes, open minds

Abstract or figurative, academic or avant-garde, old fashioned or the latest thing: the hoary antitheses of common prejudice persist, to keep futile dehate stuttering on and eyes and minds closed to so much comparative stimulation and critical pleasure. We all have our preferences, of course, and these may change or moderate. Art comes to us in many forms. There can never he anything 50 truly exclusive to one form of expression that, having won our attention, it rules out an interest in achievement of another kind.

another kind.

Artists know this perfectly well. There is always at least as much in common experience and practice to hring them together as there ever is to divide them in cultural conditioning or historical distance. There need be nothing false in the interest the most modern painter takes in how Poussin set about it, or Titian or Piero, or the most remote of the Japanese masters, 10 centuries

But the public takes issue, contradiction. The curious thing ruling out enjoyment here by

pleasure there, refusing to entertain the possibility of a connection—Mondrian and Remhrandt, Picasso and Velasquez, Bacon and Bonnard: surely not? Two of our most respected living painters, one of the middle generation, the other more senior, are currently the more senior, are currently the subjects of important exhibitions in the West End. It would he interesting to know how many visitors to the Peter Greenham retrospective at the Fine Rooms of the Royal Academy (until April 8) are prepared to make the excursion round the corner to Cork Street to see the latest work of his some-time pupil, John Hoyland, in the Waddington Galleries (until March 30).

The exercise is not one of drawing spurious or far fetched connections hetween work that remains manifestly quite distinct, but rather of making the point that a fundamental sympathy may exist across an apparent divide, and that to move from one side to the other need entall no compromise or contradiction. The curious thing in this case, is that the older

ro take him merely as a por-tralt painter, however, is to mistake him altogether. Where in this exhibition we find him most bound by the accepted conventions of the portrait, we find him most compromised

And so it is, mutatis true in such cases, the smaller work work is so large, the all conscience — has the more images so positively, even anthority.

And so thick and raw. Here to the work of Nigel Hall now

artist, portrait and landscape painter Greenham, grows in-creasingly interesting for the manner of his painting, for the touch end gesture than only then accrue into some kind of representation, while the nominal abstractionist seems to be teasing himself, after nearly 30 years, towards imagery referred directly to an external source. Greenham is near retirement as Keeper of the Royal Acadamy Schools, where he has taught one way and another for some 30 years. Inevitably, his personal reputation has long been clouded by so close an association with an institution itself notoriously idiography.

tion itself notoriously idiosyn-cratic, sometimes unfashion-able, and much misunderstord. In recent times some of the rudest things said of the Academy have heen about the portraits to he found in its summer show; and it is the portrait in particular thet has been his abiding preoccupation, and reliable employment besides. As the says ao wryly, he must be the only successful portrait painter whose paintings are never anything "like," at least in any popularly acceptable

find him most compromised and unsuccessful. His real achievement nad integrity are to he found elsewhere. When working on his own terms he displaye the noderstanding that grows out of the experience of an extended confrontation and consideration. Were they hung consideration. Were they hung together, his paintings of his wife, Jane Dowling (whose own paintings and drawings augment the show) would make the point. The paint lles quietly on the surface, the image more suggested than established, mark set gently against mark, close toned, delicately made yet fat and rich with oll and pigment. Thus we see the stuff of the image, what the work is in itself, and begin to read the secret history of Its making, hefore ever it resolvee into the character of the sitter, like the character of the sitter, like the genie let out of the bottle. Painting is painting, and it is what we find in the painting itself that is beautiful with any nominal similarity to its subject all but irrevelant.

Peter Greenham: American Boy, 1966

assurance as any tentative flick or run of Greenham'e hrush. Hoyland's work letely has change dramatically in its for-

mat, and these new roundel images, like plates seen from above, or planets with their moons about them, and figured with strange contents and atmospheres, are possessed of much richer and more modelled form, and a deeper ambiguous space. It is work confidently in transition, and who can tell where it will lead. As is often true in such cases, the smaller work — still large enough in all conscience — has the more

too, though there is as yet no reference in the work to anything hut the painting itself, the principal concern is with the economy of the activity. From Hoyland's hand a rich gohhet of acrylic paint emeared lightly across the canvas is invested with as much ambiguous assurance as any tentative flick at Juda Rowan, in Tottenham modelling, and more graphic too. There is still the sure sense of composition; but now to sculpture may seem perverse, but then Hall has always been consclously pictorial in his work in the sense that to work within the disciplines imposed by the relief, as he has always mines. The drawings, meandone, is to accept a more fixed point of view from which to consider each piece, and to make great play with the contradictions that lie hetween actual and illusory, pictorial He is also showing several drawings, which stand for a side

of his work that until now he has kept rather a related yet distinct activity. But with this show, perheps, the gap is closing. The drawings are no less positive or self-sufficient hut the sculpture itself is moving back towards them. The

mines. The drawings, mean-while, have the weight and presence of paintings—which is what in fact they are hut for the niceties of conventional description—and they have about them the aura of development, real experiment and incipient change: which sug-gests, the manifest accomplishment of the reliefs notwithstanding, that Hall's true etrue and substantial in engagement for the moment lies sion of the whola work. with them. Who knows what changes, of medium and material, scale and content,

relief is shallower, the con-formation closer and more ever, and yet waiting perhaps dense, more intuitive in its for the music to change.

# After Idomeneo, Lucio Silla and Mitridate, the Zurich Mozart cycle staged by Jean-Pierre Ponnelle and conducted by Nikolaus Hernoncourt has dem Serail. But far from escaping opera seria and Europe through the eyes of the Enlightenment, the latest addi-

Nigel Hall in his studio

tion provides atrong reminders of both. Ponnelle presents Entführung as an entertainment for a prince of the Ancien Régime, who enjoys the services of his court orchestra during the overture end then proceeds to assign everyone a role in the little romantic drama he has devised to show absolutism in its most favourable light. Pet Halmen's rich costumes are cunningly and swiftly adapted and the prince, as well as carry-ing out the functions of patron and artistic director, acts the part of the Pasha. The two proscenium hoxes in the court theatre aerve handsomely ae castle turrets and a backdrop depicting a Turkish palace and gardens is substituted. For the final chorus, the court reclaims

#### Zurich Mozart cycle

#### **Andrew Clark**

The idea succeeds hngely—in spite of the usual Ponnelle mannerisms. It is the compensating stylishness and detail, evidence of a richly inventive mind that has never been seen near its best in Loudon, that sweep all reservations aside, bringing this untiringly melodious Singspiel a sophisticated elegance it is accorded rarely

hy other directors. To be fair, much of the success is due to Wolfgang Reichmann (Ponnelle's Moses three years ago in Munich), who justifies the Pasha's unusual prominence with a stage bearing and delivery as masterful in silence as in speech. Matti Salminen's Osmin is also perfectly cast, a likeable old fool whose giant size and pon-derous tone do not preclude acts of unusual physical and vocal agility. With no shortage of comic gifts and a voice to match the tessiture of the role, this was a major performance.

Gosta Winhergh, now established as a Mozart tenor of gracious but not yet effortless style, sang Belmonte, and Lillian Watson was at her best as Blonde. The Constanze was Ulrike Steinsky, who was heard with the Royal Opera in Los Angeles but seemed quite inexperienced here: the voice began to command attention only in Act III; by which time, of course, her arias had passed. It was a mistake not to dress

the Mozart Orchestra of the Zurich Opera House in the costumes they wear for the costumes they wear for the three other operas in the cycle, especially as the four concertante players in "Martern aller Arten" join the soprano on stage. That apart, the orchestral contribution is as exciting as hefore, a reminder that this is as much harmonicourfe cycle as Pon-Harnoncourfe cycle as Pon-nelles. Harnoncourt shows the keenest ear for nuances of phrasing and counterpoint and.

in the ensembles, takes rhyth-mic muscularity and textural ruggedness to an extreme. Else-where, there is a well-contrasted stiliness and elevation, of which the final quartet in Act II was an outstanding example.

This cycle has far too much distinction to be allowed to lapse when C. H. Drese, its motivating force, leaves Zurich next year to take up his appointment as director of the Vlenna

The trie of Peter Frankl. György Pauk and Ralph Kirshbaum offers guaranteed re-wards and their programme on Saturday drew such a house that the Wigmore Hall was reduced to aelling the Press seats. Fauré's late Piano Trio, the greet Schubert Trio in B-flat and pungent concert-duets hy Janacek and Bartok: all played with such lively sympathy as to make an evening of continuous pleasure, and to make any small reservations seem purely theoretical. I only wish that the trio would choose a manage-

shle name for itself. Detsiled comment is slmost unnecessary, for every performance was warm, relaxed, full of imaginative detail and a model of friendly, ensemble-playingexcept for a slight, persistent overweighting of the piano in the actual sound of the duets. Both Janacek's Pohddko (with Spelling whose output was very limited, cold for £8,800.

threatened—just a little—what must nonetheless he the leeding roles for the string solos. Per haps it was just a matter of placing: I fancy that the half-rotunda above the Wigmore platform is unhelpful to a soloist who sits too fer offcentre, as Peuk and Kirshhaum did. But Psuk brought all his idometic panache to Bsrtók, snd Kirshhaum's mezza Janacek fairly breethed fresh insights.
The Schubert trio was red

meat to the Franki-Pauk-Kirsh-haum team, and they went at it with communicative glee, relishing every tune. There and also in the Fauré, the only niggle I wanted to register was that the music wasn't always moved along as expeditiously as it might usefully have heen. Faure's Trio, leisurely and lovingly exployed, was taken at broad tempi, which risked let-ting the characteristic late-Faure penchant for enharmonic sequences sound indulgent

# Coming in from the cold

THE LATE John F. Kennedy is said to have wondered what would happen if the Soviet Union ever had a leader who campaigned on the slogan "Let's get this country moving." That was over 20 years ago. Today, after the deaths of three Soviet Presidents within three years, Mr Mikhail Gorbachev, the new leader, might

have that opportunity.

Mr Gorbachev is 54, one of the youngest memhers of the Politburo, with some experience of agriculture as well as the wider economy, and with some exposure to the West. He can expect to he there for some years to come, gradually bringing in his own, younger team. The era of the Soviet gerontocracy may be over.

In that sense, his accession should be universally

welcome-welcome in the Soviet Union itself which needs a new broom that can come only with a new generation, and welcome to all those countries who have to deal with Moscow, including the West in general. For too long there has been an impression of drift with the most visible sign of the Soviet presence in the world heing military power, and very little else. The Soviet leadership seems to have acknowledged this weakness by moving so quickly to appoint Mr Gorbachev—as it did not when the septuagenarian President Chernenko succeeded President Andropov

last year.

It is important to recognise, however, how drab the inheritance is. Not only has the economy failed to take off; the Soviet Union is also a country virtually without friends. It has troubles in Afghanistan. It must keep a wary eye on eastern Europe. The relationship hetween Peking and Washington is closer than the relationship hetween Washington and Moscow. Japan has developed into a technological giant in its own right. Not even the most distressed countries in the third world now look to the Soviet Union as a model. The Russians were pushed out of Egypt and Indonesia long ago. Even those countries still nominally communist, such as China and Hungary, are seeking new economic directions which have nothing to do with the Soviet example. East Germany, once Moscow's most loyal ally, makes no secret of its desire for closer relations with the Federal Republic. take off; the Soviet Union is also a country virtually

#### Balance of power

Soviet claims to heing a superpower rest solely on military strength. Yet here, too, the country is in danger of being out-matched by American technological superiority: hence the Soviet concern at President Reagan's Strategic Defence Initiative. Looking at the world as a whole, the Soviet Union is essentially on

the retreat, or has at least stopped advancing: the balance of power has changed in America's favour.

If one takes the principal trouble spots, it is notable how everyone is looking primarily to the U.S. for a solution. In the Middle East Mr Yassir Arafat of the PLO and King Husseln of Jordan, having huried some of their differences are speking an American some of their differences, are seeking an American move. President Mubarak of Egypt is pressing for the same in Washington this week. In southern Africa probably the Americans alone can provide the impetus for a settlement in Namibia; and it is striking that the Americans are now showing a sharper interest in South

Soviet Union is no longer even remotely one of equals this places a heavy responsibility on President Reagan to use his power wisely. Mr Denis Healey, the British shadow Foreign Secretary, wrote recently of the danger of the Americans opting for a "policy of global unilateralism under which they intervene all over the world without trying to win the consent or understand-ing of their allies or of the countries in which they operate."

Such is American power that that danger is real. In the absence of rivals, the U.S. has the choice of seeking to impose its own way on the world or of going for co-operation. The former is a feasible option: the U.S. could probably do what it likes with Central America, at least for a while. It could ignore the quest for a settlement in the Middle East, saying that it will have nothing to do with the PLO. And it can probably live without arms control because its own technolive without arms control because its own technological edge will keep it ahead of the race. The notion of American global superiority is not far-fetched.

of American global superiority is not far-fetched.

A more responsible approach, however, would be to return to a concept of balance and of seeking a security system based on mutual agreements rather than unilateral power. There was, after all, a time, not so long ago, when the U.S. and the Soviet Union were able to talk to each other and to settle prohlems together. The Berlin agreement of the early 1970s was on: example. So were the beginnings of West Germany's Ostpolitik and, not least, the first strategic arms limitation agreement.

#### Mutual suspicion

For all sorts of reasons detente went out of fashion. There was Watergate in the U.S., the ill-fated presidency of Mr Carter and the feeling that America must again flex its muscles. There was the Soviet intervention in Afghanistan and the ageing of the Soviet leadership. The relationship between Washington and Moscow became one of intense mutual suspicion.

As it happens, President Chernenko has died on the eve of the start of the new arms control negotiations in Geneva. Those talks will go on, and it is notable how ready the Russians were to begin them once President Reagan was re-elected for a second term.

Yet arms control, even if achievable, is not enough. The new regime in Moscow should open the way for an attempt at much wider co-operation. Rarely can the circumstances have been more propitious. Diplomacy is again under way in the Middle East. There may be a chance for mediation in the Iran-Iraq war. There is room for a resumption of detente in central Europe.

None of that may come ahout. What is important is that it should be tried and seen to be tried. President Reagan and the rest of the West need to show Mr

Gorbachev an open door through which there can be co-operation. Never before has there been such an opportunity to put East-West relations on a new footing.

The new leadership, of course, will need time to consolidate. But it is the start that matters. A Soviet Union that is an ailing giant and isolated into the bargain could be a very difficult country to live with. It could be done. Maybe there could even be a pax americana with the world reduced to one superpower in a sea of troubles. But that should be the position of last resort. For the moment Mr Gorbachev should be encouraged to bring the Soviet Union in from the cold.

THE DEATH of President Konstantin Chernenko, and the immediate succession of Mr Mikhail Gorbachev, as General Secretary of the Communist Party, creates s

new opportunity for change and reform within the Soviet Union. Mr Chernenko, 73-years-old, belonged very much to the era of leaders who had survived Stalin and the war to prosper during the long rule of Leonid Prephery

Mr Gorbachev, on the other hand, only 54 in e politburo whose average age is 70, was a child during the great purges and e teenager during the war. He only joined the Communist Party the year before Stalin died.

In Mr Chernenko's brief year in power, the two men's physi-cal appearance seemed almost to symbolise the different generto symbolise the different generations. President Chernenko, unsteady on his feet and speaking with halting delivery, was a marked contrast to the brisk Mr Gorbachev. In his final eppearance on television last week, Mr Chernenko supported himself on the back of a chair unable even to raise e hand to take a bouquet of red flowers an official was trying to band an official was trying to band

But the difference between them is much more than a ques-tion of age or health. The trauma of the purges and the war marked off the generation which experienced them from their successors, creating a poli-tical generation gap which has nampered reform.

The selection of Mr Gorbacher The selection of Mr Gorbachev as general secretary of the Communist Party, much more important than the Presidency of the Soviet Union, will not entirely end this dilemma. His authority will still be circumscribed by other members of the Polithuro such as Mr Nikolai Tikhonov, the 79-year-old Prime Minister, who shows no inclina-

Much more than a question of age or health

Indeed, Mr Gorbachev's status as heir apparent to Mr Chern-enko has always seemed a little enke has always seemed a little dubious. The majority of the dorber members of the Polithuro had been appointed by Mr Brezhnev. The Central Committee of the Communist Party, as an agricultural specialist in the key 300 member body outside which there is so little political life in the Soviet Umion, has an everage age of 66 and dates very much from the same era.

THE OPPOR

Yet there is also a general recognition within the leader-ship that change in senior per-sound and economic reform are essential and it is bere that the new leadership will have most impact. Indeed, the reforms which Mr Yuri Andropov, the Soviet leader from the end of 1982 to early 1984, started to make did not cease during Mr Chemenko's rule even if they lost some momentum.

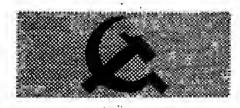

The heart of the economi problem is the twin failure of agriculture and industry. Soviet agriculture, always backward and consciously exploited to provide cheap food for the cities, has been slow to moder-Although it receives onethird of all capital investment, grain imports have surged in the last 10 years and the Politburo has seen its money swallowed with little return.

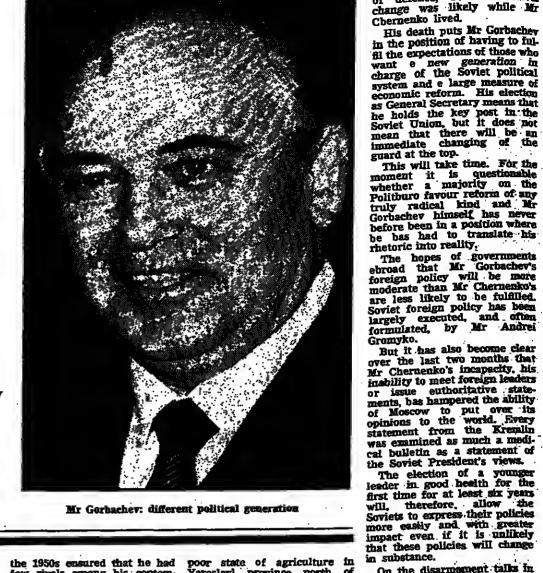

The original success of Soviet economic development

After Chernenko

# Gorbachev: the Kremlin's break with the past

creating e powerful heavy indus-trial sector should never be the sudden death of the Central underrated, But in the 1970s, et Committee Secretary in charge trial sector should never be underrated. But in the 1970s, et the very moment that the Soviet Union had achieved parity in nuclear missiles with the U.S., it became clear that neither sector of the economy could make the transition and raise productivity and quality as an abundant labour supply and cheap raw materials ceased to be evailable.

It was this failure that originally pushed Mr ginally pushed Mr rbachev to the fore. Although

of Agriculture brought him to Moscow.

Moscow.

He arrived at a crucial moment in the last years of President Brezhnev. For the Soviet Union his rise bad been extremely fast. Under Mr Yuri Andropov, the fact that Mr Gorbachev was not part of the ancient regime was e distinct bonus, and one of which he was quick to take advantage.

As Mr Andropov's health deteriorated in 1983, Mr Gorbachev liaised between him and the Politburo. The very fect that so few of the younger generation of leaders had been promoted by Mr Brezhnev in

the 1950s ensured that he had few rivals among his contem-Mr Gorbachev became, and

has remained, the most eloquent advocate of economic reform on the Polithuro, emphasising that people needed to "sense a direct connection between their labour and their pay." He said that agriculture needed reorganisation as much as investment. Reorganisation in turn meant

changes in senior personnel in the party and government ministries. Powerful positions have often had the same occupant since the end of Mr Krushchev's era. Yesterday's Pravda carried a long and highly critical account of the

poor state of agriculture in Yaroslavi. province north of Moscow, which the Communist Party daily used as a scarcely veiled attack on the party leader in the area, who has held his post since 1961. Such longevity, regardless of performance, is not uncommon. It is hardly surprising that

It is hardly surprising that both Mr Andropov and his proteges were resisted, all the more so when it became plain that Mr Andropov was ill and unlikely to be leader for long. His death left a curious interregnum which ended yesterday. Mr Chernenko became General Secretary of the party, but with Mr Gorbechev established as bis Mr Gorbechev established as bis heir-apparent. Much suthority was also held by senior figures

#### THE OPPORTUNITIES FOR THE SUCCESSOR.

FOR EASTERN EUROPE. the coincidence this year of the preparation of new five-year plans throughout the Soviet bloc and the renewal of the Warsaw Pact treaty makes Mr Gorbachev's succession all:

Mr Chernenko ducked a golden opportunity at last year's Comecon summit, the first for 15 years, for basic improvement in trading relations between the Soviet Union and its six East European wateres. pean pariners, Peland, Bul-garia, Czechoslovakia, East Germany, Hungary and Germany, Hungary and Romania. The achaic commercial barter and bureaucratic organisation of indus-trial production across borders in the Soviet bloc, which are the hallmark of Comecon, were left in essence un

All that Mr Chernenko demanded, and got, was a

better return for Soviet energy and raw materials in terms of higher quality East European industrial goods. Building on that, the reform-minded Mr Gorbachev still has some time to make up for lost reform opportunities in Come-con as the Soviet Union and East European countries to the to concert their 1986 90 national plans later this year.

Renewal of the Warsaw Pact could also present Mr Gorbachev, if he chose to take it, with an opportunity to give somewhat greater say in alliance decision-making to the East Europeans. The treaty will, it seems, be ex-tended for 20 years with no change in its text and formal institutions.

While it seems unlikely that the Soviet Union will share its decision-making monepoly on nuclear policy, it is also true that the War-

saw Pact as an organisation has evolved over time and that the recent disquiet in East Germany and Czechoslovakia over playing host to new Soviet missiles might make it soviet missies might make it appropriate to give the East Europeans some of the inflicance in muclear matters that they have gained in conventional military decisions.

The selection of Mr Gorbachev will be widely welcomed

in most of Eastern Europe, particularly in Hungary, which has so far proved the most adventurous in pursuing economic reform and will now feel that it can continue with the act of encouragement of the top man in the Kremlin. Indeed, Mr Gorbachev's

victory will also give a push to internal economic reforms wherever else in Eastern Europe — Bulgaria, Poland, East Germany—it is being attempted.

power in the Kremlin is also likely to set East European parties looking at their own succession. Bulgaria, East Germany, Czechoslovakia all have leaders aged over 70. They have now been given food for thought on two commised way of handing on power, in the Soviet bloc, for instance, has led to the inefficiency, not to say unseemil. efficiency, not to say unseemil-ness, of old men carrying on in office until their last gasp. Second, the arrival in the General Secretary, by some years the youngest leader in the Soviet bloc, may help to speed transitions of power in Eastern Europe.

David Buchan on his success in doing this that Mr Gorbachev will now be judged inside the Soviet Union.

#### Moscow plays night music

By mid-morning (Greenwich Mean Time) yesterday sufficient evidence had filtered out of Moscow to convince western chancellories thet the Soviet president, Konstantin Cher-nenko, was dead.

The BBC World Service was sure enough of its information to amounce Chernenko's death on its 11.00 GMT World Service English language bulletin-hours shead of the official Soviet news.

Duty staff st the 300-strong BBC monitoring service at Caversham near Reading were aware as early as 22.00 on Sunday night that there was the likelihood of a death among the Cremlin's senior ranks. Their first indication was the

abstitution of solemn music on some Russian radio channels in place of the usual trailers of programmes for the next day.

Devid Owen, the BBC's tussian services, was sufficiently intrigued to stay up all night listening to Russian radio

You watch the pump end and

#### **Men and Matters**

As the night went on he was impressed by the growing tive. quantity of solemn music. As paying most of the radio output is directed to Russian listeners clearly they were being prepared for something.

Owen edmits he was surprised when Russian television opened up at 0800 Moscow time yesterday with a male announcer in casual tweeds, and a woman announcer wearing a bright blouse and a gaily contrasting tie.

Perhaps the Russian TV staff had not been warned to adjust their wardrobes. But within an hour another

announcer appeared in a black suit, and the radio stations were concentrating upon classical

Digging deep

The good news is that Japanese engineers have this week com-pleted the world's longest undersea tunnel, boring almost 54 kilometres between the northern islands of Honshu and Hokkaido. The had news is that Hokkaido. The had news is fhat it took almost 21 years to dig. cost £2.5bu, and appears to be of little practical use to anyone. The blasting of the final section of the Seikan Tunnel on Sunday saw the project finally brought in at three and a half times its original budgeted cost. Worse still transport patterns. Worse still, transport patterns have changed radically in Japan since the first earth was turned beck in 1964.

In that time, the state-owned Japan National Railway's share of passenger traffic has fallen from one half to one quarter, and its share of freight has slipped from one third to one attempt.

So original plans to run a pair of high-speed "hullet-

stations and monitoring TV train" tracks through the tun-channels. Tokyo, no longer looks so ettrac-tive. JNR would find itself paying Y90bn e year to amortise the tunnel's construction costs, in order to run e train service which might itself lose Y10bn annually. 'Still, such figures are rather

small beer to JNR, which already has e total debt of over Y20 trillion (million-million), roughly equal to the external debt of Mexico. And, indeed, e compromise may yet be reached. With government officials keen that the tunnel should be seen to be used somehow. JNR is now likely to begin a conventional service in 1987-88, in the bope of losing less money that it would be using bullet trains.

#### Goode buy

Michael Waring, 38, the Sonth African businessman who has taken the reins at Goode Durrant & Murray, the London trade finance and banking group, started out with ambifather persueded him to belp with a family husiness trip to Japan and "1 got hooked," he

After e two-year training spell with a Swiss commodities trader, Waring went hack to the family's agricultural trading business in South Africa.

He spent the 1970s expanding turnover from R5m to R250m and turned a company dealing solely with South African farmers into one doing more than half its deals between third countries.

In 1978, Waring became e director and shareholder of Finansbank, then South Africa's only independent merchant bank, but five years later he sold his holding.

He has lived in London for three years and, for the past 18 months, has been looking for e home for his funds. Now be bas found it in e 29 per cent stake in Goode, and became chief executive. Goode combines the banking and trade financ areas with which Waring is familiar. He plans to expand trade finance—now mainly con-centrated on South Africa—into Australasia, and to develop Goode Durant Trust, its London licenced deposit taker.

#### In training

Jamaican-born Linbert Spencer, community liaison officer for Greater Manchester Council takes over next month as chief executive of Project Fullemploy which, with the support of more than 900 British companies, is now training over 1,000 young edults a year from inner city areas in commercial skills.

If the Government maintains its backing — ebout half of the £1.8m annual resources — the project's co-founder. Petrick Coldstream, says Spencer could lead the scheme into another expansionary phase.

Spencer, aged 36, was appointed to his present post after the Moss Side riots, and enjoys a high reputation for his work in inner city communities. He is a member of Prince Charles' Royal Jubilee Trusts' council, and the Archbishop of Canterbury's commission urban priority areas.

Fullemploy now has 12 training centres in London, Bristol, Glasgow and the West Midlands; and it plans to open others shortly in Manchester, Liverpool and Bradford More than 70 per cent of its

trainees, so far, have been placed in full-time employment Eight out of 10 are from ethnic minorities, 60 per cent had no previous qualifications, and just under a quarter had criminal convictions.

Spencer says: "Fullemploy's work has been a great success—hut there is still a great deal more it could do."

# Business expansion scheme

From Mr R. Mully From Mr R. Mully

Sir,—It is to be regretted that you have joined (leeder, March 7) in the chorus of indignant voices calling for the dignant voices calling for the firms which have had to estabsion scheme (BES) in the diarles from getting off the

There is no doubt that a sub-stantial proportion of BES capital has been channelled into capital has ocen channelled into relatively safe, second-stage company financing; a tightening of the rules to exclude assetbacked investments in, for example, property development

is certainly needed.
This should not, however, obscure the important role which the BES has played in improving the climate for equity risk taking and the supply of venture capital to small husinesses. It remains a principal source of funds for investments in the problematic £50,000 to In the problematic 250,000 to £100,000 hracket. As such, the BES bas a caucial role in overcoming the chronic undercapitalisation problems which bave long been a feature of the small

Rather than wholesale abolition, therefere, existing rules need to be modified to encourage greater emphasis on high technology and start-np investments. For example, investmenta at present only qualify for tax relief after the company being being the start of the company to the company company being backed hae traded for four months. This means that businesses cannot marginal rate, be financed under BES when in Richard Mully, the development stage. Further, 37 Hillcrest Road, W3.

#### Valuable source of knowledge

From Mr P McGregor.

Trom Mr P McGregor.

Sir.— Mr Andrew Tessler.

March 1) is wrong to say
IEDO is not trying to convince

are reached. But they have a value. It is sad that nothing more has so far been achieved. The last serious lost opportu-(March 1) is wrong to say NEDO is not trying to convince NEDU IS not trying to convince organisations one by one, of the need for greater productivity...etc. When I left there were probably 25 to 30 specialists employed to do just that, and the held meetings to going out to hold meetings to discuss with managements and employees how a better performance can be achieved. Before arrived at the NED Office I found that some of my more enterprising colleagues had ment treats it as something more than a platform.

The NED Office is not an executive hody, but it is vastly knowledgeable. It draws on the experience and opinions of hundreds of managers and trades unionists, and is itself well provided with access to information and the ability to aiready begun to try to reach out in this way, and the pro-gramme has been greatly expanded so that it uses up the greater part of the discretio-nary budget. But what proportion of the firms in the country-can be reached in this way? So: information and the ability to deploy it. But it can't make anyone listen, least of all the Government, which is strongly disinclined to listen to any facts they have also to be taken in. groups with mutual concerns. competition often followed by disinclined to listen to any facts reports back to individual firms which do not clearly support its by those who have been on a own current line. The Office mission). The cost of a really can produce extremely valuable substantial outreath would and not partisan work which it run into millions, but the fact is hard to see who else could that such a programme cannot produce.

The whole NEDC/EDC/ be contemplated should not. The whole NEDC/EDC/ NEDC set-up is a greatly under used resource. What it can competition often followed by efforts which are being made.
I guess Mr Tessler is mixing deliver will depend very much np the NED Council, the sec-torial EDCs, and the NED Office, when he accuses NEDO upon what the Parties — but especially the Government decide that they want from it.

The Council has failed to do what some had boped. Those who are not able to sit in on the discussions may undervalue successful.

#### The constitution of Pakistan

From the Minister (Information), Embassy of

Sir,-I refer to the write-up (March 5) on the constitutional amendments in Pakistan by power to ratify or return for Alain Cass and M. Aftab. Some review to the federal legisla-

points need clarification.

The National Security Council
will not be dominated by Presciples and the case, it re-submits a returned dent Zia and his generals as suggested. It has a civilian majority and it is only an admajority and it is only an advisory body to meet in time of national emergency and its advice can be accepted or rejected by the Federal Government. Among its 11 members will be four military men and seven civilians, i.e., President the provincial Governor but the provincial chief minister will be appointed by the Governor Zia (who would retire from the provincial chief minister will be appointed by the Governor but the provincial chief minister will be appointed by the Governor but the provincial chief minister will be appointed by the Governor but the provincial chief minister will be appointed by the Governor but the provincial chief minister will be appointed by the Governor but the provincial chief minister will be appointed by the Governor but the provincial chief minister will be appointed by the Governor but the provincial chief minister will be appointed by the Governor but the provincial chief minister will be appointed by the Governor but the provincial chief minister will be appointed by the Governor but the provincial chief minister will be appointed by the Governor but the provincial chief minister will be appointed by the Governor but the provincial chief minister will be appointed by the Governor but the provincial chief minister will be appointed by the Governor but the provincial chief minister will be appointed by the Governor but the provincial chief minister will be appointed by the Governor but the provincial chief minister will be appointed by the Governor but the provincial chief minister will be appointed by the Governor but the provincial chief minister will be appointed by the Governor but the provincial chief minister will be appointed by the Governor but the provincial chief minister will be appointed by the Governor but the provincial chief minister will be appointed by the Governor but the provincial chief minister will be appointed by the Governor but the provincial chief minister will be appointed by the Governor but the provincial chief minister will be appointed by the Governo Zia (who would retire from the army when be lifts Martial Law), the chairman of the Joint Chiefs of Staff Committee, the three Services chiefs, the Prime Minister, the chairman of the Senate and the four provincial

Chief Ministers.

As in many other federal parliamentary constitutions, the President will appoint the Prime Minister who will have to secure a vote of confidence from the National Assembly within two months. Assembly also provided for in Pakistan's Parliamentary Constitu-

As for the powers to appoint the Prime Minister and the Governors of the provinces and covernors of the provinces and to dissolve Parliament, such powers are enjoyed by the President in many federal Parliamentary constitutions, including India's. Pakistan's 1956 Parliamentary Constitution gave the powers to the President. The recent constitution amendments empower tutional amendments empower tution bas been fully retained. tutional amendments empower tution has been fully retained. the President to dissolve the Qutuhnddin Aziz.
National Assembly on his own 35, Lowndes Square, SW1

# Gloved against contagion

From Mr I. Little

Sir,—The problem of svoiding the smearing black type of the first upon one's fingers has been solved by one of the City's eminent merchant bankers. He, eminent merchant bankers. He, the manager of n banking the exalted columns of your newspaper, he dons his gloves and escapes this dreaded contagion of the written word. Perhaps some readers have devised other forms of self-protection?

Isin Little.

Flat 6. and largest institutions, prefers Flat 6, always to carry with him a pair 14, Wetherby Gardens, of hlack leather gloves. Prior SW5.

to reading the exalted columns

#### Conflicts of interest

From the Chairman, Wider Share Ownership Council Sir,—Whether or not "corporate ralders" are better ordered in Germany and Japan, you do well to draw attention (March 8) to the undestrable develop-ments in the U.S. and the dan-ger of e worsening situation

relief is currently allowed only Whatever may be said in favour of contested takeovers, they invariably produce or exacerbate conflicts of interest favour direct investments in single projects, because they hecome clighle for tax relief immediately. The high costs associated with attracting investments to single projects, bowever, makes small capital injections under £90,000 impractical between management and share-bolders. What is insufficiently appreciated is that this epplies on both sides. The basic analysis is that in such takeovers (a) the directors and executives of the "victim" company stand to lose while their sharebolders stand to gain, (h) the directors always brings.
and executives of the "predator" company stand to gain, 94 St Paul's Churchpard, ECA.

while their sharebolders usually stand to lose. As you imply, therefore, one should always specify in these matters the party about which one is talking rather than refer to company."

The focus of publicity, of course, is always on the "victim" company, and especially so in the U.S., where threatened managements beve developed a formidably arsenal of defensive weapons, culminating in the "poison pill." But temptations are also to be noted on the other side: the interest of directors and executives always tends to lie in expansion, whereas the shareholder is concerned only in the profitability which expansion by no means

#### Ethics and the civil service

From the Secretary of the Cabinet and Head of the Home Civil Service

Sir.—I forbear from com-menting on Sue Cameron's article on ethics and the civil service (March 5), but I should like to correct one mistake of

If I had made the observation

she attributes to me, that offi-cials were "likely to leak because of discontent about career opportunities," that would indeed (as she says) have been insulting to the civil service. But I have never said that, and I do not for a moment belleve it. (Sir) Robert Armstrong.

#### Too much time in the red

Sir,-I have been looking at the dotty posters used by British Rail to extol the punctraining the first that the principality of trains. As a regular traveller on intercity services I am concerned and puzzled that I seem to spend so much time on the red dots.

To be within five minutes of scheduled time has become so noteworthy that I wish I had maintained full records during

Most of the problems seem to arise from signal faults and similar failures, and one is in-clined to wish that resources expended on the development of the dubiously viable HST had instead been concentrated on huilding greater reliability into the infrastructure.

Delays now suffered by 125s would carry even greater rela-tive penalties when suffered by HSTs running at faster nominal schedules. I meet few fellow sufferers who would not prefer to travel reliably rather than (intermittently) slightly faster.

# Need for a defence industry

From the Director, Electronic Engineering Association
Sir.—1 refer to your leader
(March 6) dealing with the

difficulties in connection with the defence budget in which you query the necessity for a UK defence industry. Whatever the merits of the AWACS decision may have been, it should not be allowed to detract from the absolute need for a defence industry capable of supporting the weapons systems in service with our armed forces. So far as technological spin-off is con-cerned, there are a vast number of areas in the electronics in-dustry which could be listed to illustrate that it exists far more widely than is generally sup-posed. The movement of electronic engineers from one department and one company to

another in itself provides a from military to civil and vice-

All this should in no way detract from the principle of value for money and internavalue for money and interna-tional collaboration, which the electronic capital goods industry fully supports. We must, how-ever, beware of taking the latter policy too far. Our demon-strated ability to support, rein-force and elaborate in the equipment being used in the Falklands conflict emphasised the need for a strong UK industhe need for a strong UK indus-trial base in order that we can retain our ability to pursue nur national interests independently from the views and pressures of others. D. H. Gardner.

8, Leicester Street, WC2.

#### Obsessed by burglar alarms

From Mr B. Bligh

Sir,—The arguments put forward by Sir John Curtiss (March 8) that the British armaments industry is good for technology and good for employment are so plausihle; but are they?

The fact is that our two most successful competitors. Germany and Japan, have very little arms industry and do no research into weaponry.

The British case is analogous to a bouseholder who is obsessed with hurglar alarms. For the past 40 years he has spent the best part of his income and ingennity on anti-theft devices to the detriment of the bealth of his family and the education of his children. The water supplies and sewer-

age for his house are in a deplorable state. Many of the burglar alarms were expensive and inoperable (bine streak, TSR2 and many others). Furthermore some of the devices are so horrendous that if they are tripped off, they will not only main the burglar, they will destroy the house! will destroy the house!
Any householder who acted
like this would be regarded as
foolish and irresponsible to his

family. Britain's economic decline will never be halted until we change our priorities; stop investing in weapons and start investing in those features which truly improve our quality of life. B. R. Bligh,

4, St James's Avenue, Hampton Hill, Middlesex.

#### World trade in textiles

From the Director of Studies, Trade Policy Research Centre

Sir -So far as the treatment of Hong Kong is concerned, Dr Neundoerfer (March 6) en-visages two sorts of competitive suppliers: "ostensibly liberal" countries (whatever that may mean, when applied to Hong Kong) and countries with dis-torted policies. According to Dr Neundoerfer, we should not trade freely with the latter because of their distortions, and we should not trade freely with the former because they trade freely with the latter. That is known as Catch 22.

On the effects of the multifibre arrangement on the European Community, Dr Neundoerfer asserts that the MFA is a is possible to compete protectionist arrangement which has virtually no effect on prices, I, Gough Square, EC4.

but "a very substantial tariff rise " would be required to replace it. That is known as having one's cake and eating it. On the "guaranteed market access" for "really poor developing countries" under the MFA, tell that to Bangladesh, recently the victim of restrictions on exports of shirts to the UK and France. Observing this treatment of a "really poor developing country" while reading Dr Neundoerfer's argument that it would be inappropriate to protect ourselves by an erga other industrialised countries, I conclude that what be is really saying is that free competition is fine so long as the competi-tion is with those with whom it

EVERYTHING, they say, bas a price. But the proposed privat-lation of the Royal Ordnance factories could turn out to be one of the most troublesome exercises so far in the Government's efforts to aell off state

assets.
The chief worry is the comhave on investors.

investors who might buy Royal their hands on the issuc.

obstacles besides the associa-

Royal Ordance plc, previously constituted as a trading fund, was formed on January 2 from the 400-year-old Royal Ordnance factories organisation. # City prepares to bite the bullet

By Lynton McLain

was banned. The party was three months later than planned, thanks to vigorous opposition to Government plans in the House of Lords, a taste of the difficulties that lie ahead. To some extent the Government has only itself to blame for the potential prob-lems. By submitting to parllementary pressure to sell Royal Ordnance in a stock market flotation, it closed off less controversial options, such as selling the arms works one by one to industry.

Royal Ordnance is for the moment vested in the name of Mr Michael Heseltine, the Defence Secretary, who is seek-ing to raise between £300m and £350m from the sale.

The real work of trying to sell the munitions works is in the hands of City professionals.

Lazard Brothers, the merchant bank, has been appointed to advise Royal Ordnance and N.

M. Rothschild is advising the Conserment. Government. Coopers and Lybrand has been appointed as auditor. Wolff-Olins, design con-Royal Ordnance is seeking a sultant, has already re-designed less warlike image as it prepares the Royal Ordnance corporate

image. Of the greatest concern to

the whole range of its products. United Kingdom orders, for the army, Royal Air Force and Royal Navy, accounted for 63.5 per cent of the £481.91s. turnover of Royal Ordnance in 1983-

"Competition policy," bowever, bas repleced "preferred source" as the guiding criteria for defence equipment purchases by the Ministry of Defence.

The current hidding for the Army's new armoured personnel cerrier, the MCV-80, illustrates the point. GKN Sankey designed the vehicle end is to produce the first 250 vehicles with two further production contracts for total of 750 vehicles to be announced sometime this year. The Royal Ordnance tank factory at Leeds might, in the past, have been expected to get the order to fill excess capacity. ROF Leeds, however, bas bad to tender for the orders in competition with GKN Sankey. Vickers and Alvis, part of United Scientific Holdings, All the companies bave spare capacity.

Royal Ordnance will beve to fight for more exports in all its investors is the Government's products, in a world market decision to end its policy of where developing countries, "preferred source" for muni- such as Brazil and South Korea, the Royal Artillery band was tions for the UK armed forces, are emerging as low-cost sources ordered to leave its brass That gave the Royal Ordnance of ammunition and fighting

always been the ROF's strong

At the end of December 1978, well over half the total ROF order book related to one large contract with Iran. The cancel-lation of this contract in March 1979 was "devastating," according to Grieveson, Grant, stock-brokers. ROF profits collapsed from £40m in 1977-78 to £942,000 in 1980-81, a period when the company was also hit by industrial disputes.

The state ordnance factories have built munitions and fighting vehicles to the traditionally high standards demanded by the British armed forces, where one shell for a main battle tank costs up to figure 1 tank costs up to 2500. But these standards and prices might not be acceptable in the export markets which Royal Ordnance will be forced to tackle more vigorously from

If the Government sticks to its timetable for the sale, Royal Ordnance will have only one full year of trading results, the 1985 calendar year, to prove itself in a more competitive and commercial environment.

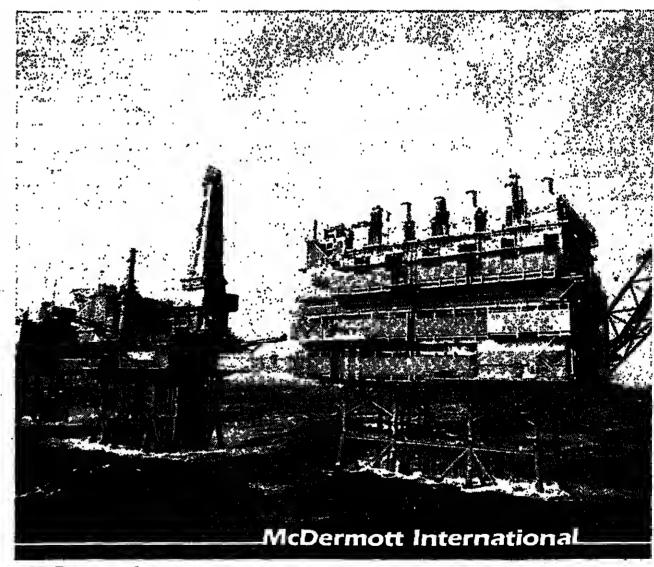

Impending privatisation, some say, could encourage ROF to go for non-traditional products in its search for financial results less dependent on its UK home hase.

"Up to now, Royal Ordnance designers bave bad to design to the order of the British forces. This has bad the effect of pushing to one side the ROF's research initiatives," one City stockbroker said. "With commercial freedom, the ordnance factory at Radway Green, Crewe, the main bullet factory for small arms, might be better-off making lipstick

Royal Ordnance factories took over responsibility for the applied research, design and development of their products from the Ministry of Defence research establishments on April I, 1984. This included the transfer to the RO explosives division of the facilities, work and almost 1,000 staff of the Propolicate Evaluations and the Propellents Explosives and Rocket Motor Establishments at Westcott and Waltham Abbey and of the Summerfield site

operated under an agreement with IMI Kynoch, These changes bring together most of the UK's rocket motor industry and capability in explosives and propellents technology. Royal Ordnance says they bring its explosives divi-

sion into "world class." Back in the City, bowever, much has to be done before the privatisation can go smoothly. If I telephoned a dozen fund managers and asked If they would he prepared to put their usual amount into Royal Ordnance next month, I would be told to get lost," a City defence analyst said. "Institutions have simply not made their minds up. Royal Ordnance remains an

McDermott's experience pays off during North Sea winters.

With an effort spanning three Narweglen winters, McDermott's North Sea Divisinn menaged the febricetinn, instellatinn, and hookup af e three-pletform drilling and production complex for the Valhell Fleid.

As the project neared completion, McDermott turned in e pece-cetting nerformance: For the first time in the windswept North Sea, a major hook-up wes campleted camfortably ahead of schedule.

Mnre than 20 milling manhnurs nnshore and nne million nffshore were scheduled via a transoceenic computer network that included a satellite link from the nffshore site. This was the first auch computer application in North Sea marine construction. And to maintain Valhall's ambitious schedule, work offshore continued yeer-round. For more than 30 years,

McDermott engineers end techniclans have kept pece with the demend for better technologies. Right now, using skill, semisubmersibles, end aeteilites, McDermott's North See Division is mastering the northem frontiers of hydrocarbon development. Let McDermntt's experience and

WEST GERMANY'S Free Demo- foe, bas shown that the Greeo tide on Germany's left is not irreversi-ble. The failure of the protest party to secure representation io the Saarbrücken assembly is its poorest electoral result anywhere

This in turn raises a second question, which will dominate the counsels of the rudderless SPD in the months ahead: does the way for-ward lie in an unmistakable shift to the left - in other words to aim at the "majority to the left of the centre," advocated by Herr Willy Brandt, the former Chancellor and SPD chairman (and Herr Laiontaine's political meotor)?

Underlying this strategy is the belief that the SPD will thus be able to absorb the bulk of Green voters something that "Oskar" decisively achieved in the Saarland. The problem is, will the theory be vindicated elsewhere in the Federal Republic?

Sunday night - to the alarm of those who dread a leftward beot SPD, spurred by Herr Lafontaine, returning to questioo German commitment to the ouclear deterreot

thought.
But the star right now is withou doubt Herr Lafontaine. On Sunday, for all his record of scaring the wits out of West Germany's Nato allies, and now his achievement in show ing that the Greens are not invinci ble, he plainly had other, more im

mediate things on his mind. The main task for the first SPD premier of the Saarland will be to breathe new life into a flagging lo-cal economy, hit by the difficulties of Arbed Saarstahl, the steel concern, which in turn have contributed to a regional unemployment rate of over 14 per cent.

Herr Lafontaine feels the problems with personal acuteness. He was born into a coal mining and steel family, his mother was once secretary in the company itself. Since then he has started at everything he has turned his band to, be it football, study, or now politics.

His critics accuse him of pigheaded intellectual arrogance, but oo his home territory, Sunday proved that the Saarlanders just want the best available. And the region certainly needs it.

however, can only strengthen the conviction of Green "fundamental-ists" that serious dealings with the

Social Democrats will only spell

their own slow death. Chancellor Helmut Kohl too, was

ently reviving FDP to the other.

James Buxton in Rome adds: Italy's L1,900bn fund to confront the problem of world hunger was approved by parliament a few days ago in response to pressure from both the left and from sections of the Christian Democrat Party.

The money was already in the aid. budget but was put into a special fund to be managed with reduced bureacratic procedure to enable it to be spent very quickly.

In the past few years Italy has steadily increased its spending on aid as a percentage of gross domes-tic product, having formally been one of the smallest aid doners in operation and Development (OECD) countries. But it has had difficulty in developing the aid-giving food from reaching areas under ing organisation quickly enough to cope with the funds becoming avail-

#### UK oil pricing attacked by MPs

THE BRITISH Government is actively supporting the Organisation of Petroleum Exporting Countries (Opec) in the defence of an artifi-cially high oil price detrimental to investment and employment pros pects in the UK, the all-party Ener

gy Select Committee of the House of Commons said yesterday. "Collaboration with the Opec car tel, tax cuts financed from windfall North Sea revenue and the cushion ing of oil companies from market realities are all secondary to the long-term well-being of the UK and its Western allies," argues the report, which is fiercely critical of the

Government's oil policy. The spur to the Committee's report on the Government's oil-price policiy was the spring supplemen-tary estimate for £20m (\$21.33m) to cover losses made by the British National Oil Corporation (BNOC). The losses were incurred because BNOC, at the Government's request, has been prepared to pay more for North Sea oil than the free

market price. The committee held a similar investigation when the Government last December asked for a grant of £45m to cover BNOC losses. In its second report it again accuses the Government of not openly admitting that its policy is to prop up oil

prices in support of Opec.

Mr Ian Lloyd, a Conservative MP and chairman of the committee. said yesterday: "We are not just sheltering under Opec's umbrella. We are supplying one of the ribs of that umbrella. It appears that the Government keeps the closest possible continuing contact with Open This is indistinguishable from the

peration of a cartel." The report argues: "No one is eves that the British Government does not involve itself in setting BNOC's price, but for reasons which remain opaque, minis-ters have been unwilling to admit

It adds: "In the light of all the evifar as the setting of the official price is concerned, the Government has been playing the key role, and that it should openly acknowledge

Having satisfied itself that the Government has been supporting Opec by taking the decisions to maintain oil prices maintain oil prices above spot-market levels, the committee goes on to claim that that policy is itself damaging to Britain's economy.

The committee yesterday said it was "satisfied that the net effects of oilprice reductions of the order of 10-15 per cent once the economy has had time to adjust, will be a modest but very welcome net increase in total employment.

The Government has claimed that BNOC performs a useful role in stabilising oil prices in the short term. The committee says, however, that it "is not convinced that as presently constituted and as it currently operates, BNOC can per-

# Noises on the Ericsson line

THE LEX COLUMN

November's third-quarter statement had alerted the market to the prospect of poor 1984 results from Ericsson and yesterday the Swed-ish electronics group proved as

good as its word.

The information systems division has turned sharply into loss, leav-ing group income before tax and ap-propriations 11 per cent lower at SKr 1.57bn. The shares, which were being picked up by every Erisa fund worthy of the name only two years ago, closed in Stockholm at a bum-ble SKr 259.

The striking reversal in Ericsson's fortunes is reminiscent of the problems at STC although, in marked contrast to the British company, Ericsson is manfully shoul-dering the blame itself.

The group was caught out by components shortages in both tele-communications and information systems last year, on top of which it suffered design and software difficulties. The upshot was a rising order backlog and a level of working capital which made the year-end balance sheet look unappetising even by Swedish standards.

Ericsson is adamant that it has put the information systems division straight but the uncomfortable impression remains that the breadth of the group product range is leaving both its management and its finances rather stretched.

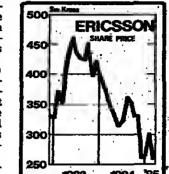

In common with other electronics companies Ericsson is on a treadmill of rapid growth - last year it invested SKr 4.5hn in fixed assets and R&D - the only alternative to which seems to be lost competitive edge. However much Ericsson spends someone across the Atlantic is always spending more.

The strategy of integrating teleommunications and computers is by now uncontroversial, but the stock market evidently has doubts about its likely success. Even if the group climbs back to the 1983 level of earnings this year, the current share price will represent less than 8 times earnings.

#### House of Fraser

Even in adversity, Lourho is nothing if not original. Yesterday it imparted a new meaning to the reverse takeover by selling enough shares in House of Fraser to give the Al-Fayeds control and then sug-gesting that it was still intent on making an offer itself.

Lonrho has never been intimidated by long odds but even so skilful a tactician as Mr Tiny Rowland must be daunted by the prospect of making headway against a 51.03 per cent shareholding and the im-

lacable opposition of the House of

Only Sir Gordon Borrie and Mr. Norman Tebbitt now stand between the Al-Fayed brothers and the pearly gates of Harrods. After being subjected to eight years of irritation most surprising if the Government did not opt for the path of least resistance and grant both parties leave to proceed.

No competitive issue is at stake in the Al-Fayed offer so the Monopolies Commission has no more of a role to play in the matter than the Milk Marketing Board. In the unlikely event that Mr Norman Tebbitt, the Trade and Industry minister, decides to investigate the cred-entials of the Al-Fayeds or indeed the beneficial ownership of their shares, his department should take on the job itself.

Official clearance would leave Lonrho with very few options in-deed. The most it could hope for would be a 10 per cent stake, sufficient to preserve House of Fraser's public company status; annual re-ports and all. Since Lonrho would be guaranteed to receive no dividends from its investment, however, that course of action has precious little to recommend it.

A deliberately obstructive policy would at this stage only lose Lourho the institutional interest which it has recently aroused. Having pulled his tanks off the House of Fraser lawn. Mr Rowland would be best advised to lead them in an orderly formation back to Cheapside

for sale one day and he could buy that instead.

#### Dollar

Foreign exchange dealers spent could offer in reply. most of yesterday blowing any re-

in London, at least, there seemed to be more short than long positions

For the first time since last au tumn dollar holders appear to be nervous not just about central bank intervention but also about the

state of the U.S. economy.

Recent surges in U.S. money supply have not provoked any explicit tightening by the Federal Reserve, which monetarists at least will take as bad news for inflation. If the Fed does not tighten now it may soon find its hands tied by the real economy, where the current round of statistics seems to show growth slowing from last year's frenetic

With a weaker dollar and three-mooth sterling interbank at just 13% per cent, the UK clearing banks must now be under some pressure to shave a token ½ per cent off base rates before the budget - particularly if today's money

tial and

supply figures are respectable.

Given the Government's prodigious funding during banking February there is every reason to sin-

#### Entrad/Tootal

Entrad's latest blast at shareholders of Tootal does not add greatly to the sum of knowledge. Entrad's marketing expertise in the Pacific Basin remains no easier to value than the strength or not of Tootal's brands in the UK, and the bid will surely not be decided on evidence of poor communications and defective

orthography at the Australian sub-sidiary of the defending bank.
As it is, the market and the friends of Tootal are having no difficulty keeping the company just out of reach of Entrad's offer at 70p a

share - by a penny, to be exact.

Any Tootal shareholder inclined to accept his company's claim that Entrad is some sort of cipher does learn of a group with a truly Australian level of balance sheet gearing, but one able to persuade Citibank to put up funds for the accountable.

quisition.

The prospect of another rights is sue to remaine the acquisition, as occurred after the Bradmill purchase, is scarcely the affair of Too-House. Chase, is scarcely the affair of Too-After all, the Dorchester may be tal shareholders. Whatever the disis signailing that Entrad should go higher, and if Entrad does decide to end the phoney war and add 50 or so, it is hard to see what Tootal

A forecast of increased 1985-86 maining froth off the dollar. Compared with Friday's close it fell months will carry little more conmore than 7 pfennigs against the D- viction than promises of increase in Mark and 2p against the pound and an uncovered dividend.

## **UK** banks back Cairo sewer plan

By Joan Gray in London

SAMUEL MONTAGU, the London merchant bank and the Midland Bank, have agreed to supply an additional £85m (\$92.6m) ECGD-guaranteed project line of credit to the Arab Republic of Egypt to finance completion of the first phase of Cairo's oew sewer system.

The £85m agreement, signed by Samuel Montagu and the Egyptian Government in Cairo yesterday, supplements the £100m credit for the project provided by Montagu and the Midland.

It will be allocated to Britisbsourced procurement for the sewer project. Additional local funds - be-lieved to be well in excess of £100m will be provided through the Egyptian Governmeot's Ministry of Housing and Utilities for locallysourced labour and materials.

British companies working oo the Cairo sewer project include Lilley Construction, GEC Electrical Projects, and the joint venture of Tarmac, Balfour Beatty, Cementa ioo, Edmund Nuttall and Arab Contractors which woo a £100m

contract for the project in January. The latest £85m will be used to ficance both completion of contracts cootracts needed to finish the first

# Saudis may swap oil for Mirage fighters

BY OUR TRADE STAFF

SAUDI ARABIA and France are Saudi talks would almost totally inunderstood to be close to concluding a \$2bn countertrade deal in which Saudi oil would be traded for French jet fighters, according to Peroleum Intelligence Weekly, the U.S.-based petroleum industry

Industry officials in Paris reported in January that France was ne- craft. gotiating the sale of advanced Dassault Mirage 2000 fighters. A sale of 45 aircraft was being considered as well as ancillary equipment.

The Freoch bid emerged after

hopes faded that Britain would be able to sell £1bo in Tornado attack aircraft and Hawk trainers to the Dassault confirmed last night

that talks were continuing but gave no details. Panavia, which builds the Tornado, was not available for comment last night, but the Petroleum Intelligence Weekly report is the first suggestion that the Franco-

volve barter. the crude deliveries are expected to

The publication understands that stretch over three years at a rate of about 70,000 barrels a day. If the deal weot through, it would be the second time in the last year that the Saudis have exchanged oil for air-

Last summer the Kingdom con cluded a \$1bn deal with Boeing of the U.S. to trade 34m barrels of oil, delivered over three months, for the latest Boeing 747 jumbo jet aircraf:

The publication said a deal deted at \$2bn would equate to 73m barrels of oil, given the official price of \$27.33 a barrel for the Saudi export mix with deliveries to be at

The oil-producing countries of the Middle East are increasingly using oil in barter and countertrade deals.

# Al-Fayeds hold 51% of Fraser store group

Continued from Page 1

a total cost of £29.4m after Lonrho had decided to sell its important strategic 29.9 per cent in Fraser to

the Al-Fayeds. Wheo Lourho sold its shares last November it feared that the Monopolies and Mergers Commission would rule adversely against its own hid plans for Fraser. Ironically the Commission gave Lonrho clear-ance to hid for Fraser last week. Ahead of that decision the Al-Fayed family produced their offer of 400p per share in cash for the 102 stores of the Fraser empire in an effort to beat Lonrho with any offer. Two of the Al-Fayed brothers, Mohamed and Ali, together with

Earlier Lonrho had said that in their advisers from Kleinwort Ben view of the "strong possibility" of son, the UK merchant bank, had a the Al-Fayed bid being referred the 90-minute session at the Office of directors of Lonrho had decided to Fair Trading today to argue their sell most of the group's 6.3 per cent case against referral. They were in Fraser. The shares were asked whether they had got the acquired at the end of last year for money to bid, whether it was theirs, need to pay it back in due cours

Lonrho has already made its own submissions for a Monopolies Commission investigation in an effort to gain time to mount their own bid campaign. The brothers and their edvisers argued that there were no commercial or competition grounds for a referral. Their UK investments were in shipping and proper ty, including a building in London's Park Lane and a castle in Scotland.

If Lonrho withdraws from the fray now it will bring to an end one of Britain's longest corporate battles.

# Is your bank between you and a hole in one?

AT Commercial Bank of Knwait we believe a bank is only as good as the service it offers its clients. Does your bank, for example, present a full range of facilities especially designed for your particular industry? Are its foreign exchange techniques up to scratch? To the extent of package contract financing and the protection of exchange risk? And are its prices competitive? Keen even? We make sure ours are. Which explains our reputation as the most progressive of all Kuwaiti banks. We were, for example, the first bank in Kuwait to establish a direct link to the Reuters

(now we're among the world's top ten users). Similarly, we were the first to introduce an automated system which turns round letters of credit in 24 hours. First to link all our branches by computer. First to establish a foreign exchange dealing room. First to offer our clients strong, reliable contacts in 89 countries worldwide now backed-up by our New York

branch and European Representative Office in London. The list goes on. And already, major companies in Japan, America and Europe — as well as the Middle and Far East — have taken advantage of our quite exceptional range of hanking services. To them, it's the equivalent of scoring a hole in one.

#### Southwest **Airlines** buys rival

By Our Financial Staff

SOUTHWEST Airlines, the Dallas carrier, has entered an agreement to buy Muse Air, its struggling rival, in a complex cash and paper

Each of Muse's 4.6m shares will has a market capitalisation of about

For Southwest, the proposed acquisition will eliminate its major competitor and give it a virtual monopoly in its Texas markets Muse Air competes with Southwes in almost all the cities it serves from Dallas' Love Field airport and Houston's Hobby airport.

The transaction will mark the end of Muse Air as an independent carrier The carrier has never returned an annual profit since it was founded by Mr Lanar Muse and his son, Michael, in 1981. It has more than S100m in debt and last year reported a loss of \$17m on revenues of \$101m.

Muse has not been able to wrest much traffic away from Southwest on the routes in the south-western U.S. where the two carriers com-

#### Loss mounts at French Shell

PARIS - Shell Française said yes terday that deteriorating refinery margins, oil market weakness and stiff competition caused its 1984 loss to widen to FFr LO7bn (\$103m)

from FFr 298m a year earlier. Consolidated sales totalled FFr 33.3bn, up 7.5 per cent from a year earlier. Bolstered by a rise in export activity, the company's oil sales rose to 144m tonnes from 142m tonnes in 1983. French sales were stack, and Shell's domestic marke share declined to 10.7 per cent from 12 per cent in 1983.

The sales increases were largely offset by a decline in refinery mar gins, which led to a FFr 822m net consolidated each flow deficit in 1984 Shell had a cash flow surplus of FFr 45m in 1983.

INFORMATION SYSTEMS DIVISION PLUNGES INTO LOSS

# Ericsson holds dividend despite 10% downturn

BY KEVIN DONE, NORDIC CORRESPONDENT, IN STOCKHOLM

munications and electronics group, suffered a drop in profits of 10.7 per cent last year and fell beavily into loss in one of its most important business areas, information sys-

The group is maintaining its dividend at SKr 9, but the profit performance has deeply disappointed investors. The share price has virtually halved in recent months from its 1983 peak of SKr 483.

In Stockholm yesterday it was trading at around SKr 259, although it staged a small recovery later in New York

Group profits before taxes and allocations to reserves dropped to SKr 1.57bn (\$163m) from SKr 1.76bn in 1983.

Sales climbed by 16 per cent to SKr 29.38bn from SKr 25.24bn in 1983. Foreign exchange movements accounted for some 1.5 percentage

points of the increase. The value of new orders booked last year rose faster than sales to SKr 33bn from SKr 26.14bn in 1983,

an increase of 26 per cent. Public telecommunications, the traditional core of Ericsson activities, provided no less than 87 per cent of group operating profits - at SKr 1.93bn, up from SKr 1.65bn in 1983 - on sales of SKr 9.7bn, a third

of the group's total turnover. Information systems, which hold the key to the hoped-for transformation of Ericsson from a supplier chiefly of public telecommunications equipment to a more broadly-

THE FREEZE on Swedish dividend payments imposed for 1984 earnings is to be lifted for 1985 profits, according to Mr Erik As-brink, under-secretary at the Finance Ministry.
In an interview with the Swed-

ish news agency, TT, he said that the Finance Ministry had no plans for extending the freeze.

Many Swedish corporations have reported record earnings for 1984 and despite dispensations several big companies have indicated that dividend pay-ments would have been much

higher without the freeze. operating losses of SKr 217m, com-pared with SKr 237m profits in 1983. Sales rose to SKr 9.29bn from sign and manufacture of new prod-

SKr 7.45bn a year earlier. The radio communications division also showed an operating loss of SKr 32m, against a profit of SKr 31m in 1983.

In the U.S., which is Ericsson's big bope for growth, the company suffered losses of SKr 353m com pared with a loss of SKr 225m in 1983, but it has now disposed of two loss-making power cable companies and is concentrating operations on telecommunications cable.

Ericsson said that the sales in-crease during the second balf of 1984 had been limited by a shortage of components in many business areas. In addition, both information systems and radio communications based manufacturer, plummetted to had been hit by problems in the deDespite the freeze more than 80 Swedish corporations have re-ceived a dispensation to raise dividends, mainly on the grounds that higher payments had been promised in prospectuses issued to investors, chiefly ahroad.

The freeze on dividends was

introduced last spring as part of

a government package aimed at cutting inflation and encourag-

ing moderate wage agreements. The strategy failed, however, and Swedish inflation climbed by

more than 8 per cent last year, double the Government's official

has been reorganised and a new management appointed. Ericsson said that a comprehensive pro-gramme had been undertaken to improve profitability, partly by concentrating product and marketing

These measures should "gradual-ly improve income and will become fully effective during the latter part of the current year," the company

The group's equity to assets ratio has declined from 31 to 27 per cent, due partly to what the company claims was an "abnormally high level" of working capital at the end of last year, reflecting large deliveries during the final quarter.

## Taiwan minister quits over **Cathay**

By Bob King in Taipei

MR HSU LI-TEH, Taiwan's Minister of Economic Affairs, resigned yesterday after accepting some of the responsibility for events that played a part in the \$250m collapse of key members of the large Cathay group of companies. As Minister of Finance from 1982

to 1984, Mr Hsu accepted "moral responsibility" for developments during his term that have led to the country's biggest-ever financial scandal Members of parliament are also demanding the resignation of Mr Loh Jen-Kong, the current Finance Minister.

Four weeks ago the police arrested executives from Tenth CreditCooperative and from Cathay Plastic. Industries as cheques for payments made by them were not met by banks. Snbsequently the Taiwan Government has had to take over Cathay Investment and Trust which had been brought down by guarantees made to cover loans to the other companies.

A week ago Mr Tsai Chen-Chou, a member of parliament and chair-man of both Tenth Credit and Cathay Plastics, was detained and charged with issuing bad cheques, forgery and channelling funds from Tenth Credit to other members of the widely spread family business

Mr Hsu has been criticised in the ress and in parliament over the ast few weeks for not acting while Finance Minister to stop lending irregularities at the Tenth Credit Co-operative, one of roughly 70 companies that make up the mam-moth Cathay group.

#### If You Look at HNG Today, You'll Think You're Seeing Double.

And you'll be right.

Because recent strategic purchases have enabled us to double our pipeline network and become one of the top natural gas transmission companies in the country.

As our Chairman Kenneth Lay explains, "For years, the Houston Natural Gas intrastate pipeline system has been the largest natural gas supplier to Texas, the nation's largest natural gas market.

"Today, thanks to our newest acquisitions, the Transwestern Pipeline and the Florida Gas Transmission Company, we are a major interstate supplier, as well. We have in place a 14,000 mile pipeline network that spans the country. Not coincidentally, the principal markets served by our pipelines, California, Texas and Florida, are among the fastest-growing states in the country. And we intend to be the fastest-growing supplier of natural gas to these markets."

With a pipeline system that gives us access to almost every gas-producing area in the lower 48 states, a strong presence in strong markets, and a 60-year history of reliable service to our customers, our vision of the future looks twice as bright.

Which must be the reason so many people are now giving us a second look. For a copy of our annual report, contact our Corporate Communications Department at P.O. Box 1188, Drawer A, Houston, Texas 77001.

#### **Jardine** offshoot suffers decline

JARDINE Securities, a subsidiary of Jardine Matheson, suffered a fall in its net income in 1984 to HK\$18.3m (\$2.3m) from HK\$65.4m in the previous year, largely be-cause of a sharp decrease in divi-dend income. AP-Dow Jones re-

The Hong Kong-based company said its assets, after provisions for a final dividend, grew by 28 per cent in the year to HK\$1.4bn or HK\$12.22 a share, from HK\$888.7m

or HK\$12.22 a share, from HK\$888.7m or HK\$9.53 a share, in 1983. Gross revenue for 1984 was HK\$23m.

Jardine Securities has a 34 per cent stake in Hongkong Land Co, the share price of which grew to HK\$3.80 at the end of 1984 from HK\$2.90 at the end of 1983. Because Hongkong Land ceased paying div-Hong kong Land ceased paying dividends last year Jardine Securities income declined, the company said.

Jardine Securities declared a final dividend of 20 cents. It paid no interim dividend. In 1983, the company paid dividends totalling 70

 Wardley Holdings, a wholly-owned merciant banking subsid-iary of Hongkong and Shanghai Bank, reported a net profit for 1984 of HK\$83m, up from HK\$75m in the previous 12 months.

The company paid its parent dividends totalling HK\$60m, the same

as in 1983. Mr William Purves, Wardley's chairman, said the company's business remained at a high level. Nonetheless, he said, the company has moved to streamline its board structures and redefine its major businesses as investment manage-ment, corporate finance, capital markets, project finance and bro-

#### Sharp fall for **Singapore** property group

SINGAPORE - United Overseas Land (UOL), a 31 per cent owned associate of the United Overseas Bank group, plunged to a SS4.5m (U.S.S1.9m) net group loss in the second half to the end of December, from a S\$23m profit in the corre sponding period a year earlier.

The group said that, including its 55.6 per cent drop in first half earn-

ings, full year 1984 profit fell to S\$6.9m, down from S\$28.1m a year Turnover of the property development and botel management group slumped 38 per cent to S\$84.8m in

UOL said the outlook for the property and hotel sectors remained sluggish and that prospects for the current financial year did

not appear encouraging.

The sale of land at Jervois Road in Singapore contributed some S\$9.3m of after-tax group earnings: in 1983, the Jervois Road parcel had contributed S\$19.4m.

UOL declared a dividend of 6 cents, down from the previous fullyear payout of 11 cents. Issued capital grew to 126.7m shares at the end of 1984 from 117.2m a year earlier.

# Wm. Bedford to become first antique dealer with USM quote

William Bedford is set to beceme the first antique dealer quoted on the Stock Exchange. The company is being floated on the USM with e market capitalisation of £4.75-by means of an offer for sale by tender by broker Scrimgeour Kemp-Gee.

The business, which was started on e market stall in 1966, trades from a showroom near Camden Passage, North London, which is regarded as one of the centres of the antique trade in the 11K.

recession. However, in the past three years, profits bave grown from £125,000 pre-tax on sales of £258m in the year to last December.

A total of 1.5m shares are being offered for sale on the stock market — or 31.6 per cent of the enlarged equity. Half the shares are being sold on behalf of the company to raise £550,000. This will be used to widen the range of stock in particular in bigher-priced items, which might cost £10,000 or more epiece.

The remaining shares are being sold by the directors, including Mr John Bedford, the founder, chairman and chief executive, who will be left with a 51.6 per cent stake.

At the minimum tender price

Interim dividend is being raised from an effective 0.333p to 0.5p. The company's shares are traded on the USM.

in association with EB Savory Milln & Co.

Group sales rose from £25 68m to £36.4m, nearly flm better than the projection at the time of the placing last October. T&S operates a chain of shops selling cigarettes, confectionery and greetings cards, mainly in the Midlands.

The dividend of 1.575p net for the year is as forecast, with earn-ings per 5p share shown at 6.09p (4.15p).

The directors say that 10 stores were opened during 1984 to bring the total to 59 at the year end. Since then two new stores have

opened, in Bootle and Walton Vale, and a further three bave been sequired in Bulwell (Notts), Skelmersdale and Kirkby which are expected to open before Easter. Negotiations are "well advanced" to sequire five more.

The pace of expansion is such that T & S expects to have between 75 and 80 stores trading by the end of 1985—well on target to achieve or exceed the stated objective of 100 steres by mid-1987, say the directors. Most of the new stores will be opened in the North West

#### Parker Knoll spread gives £0.3m rise at halfway

IN A generally difficult market for furnishings, Parker Knoll has increased its pre-tax profit by £310,000 to £1.73m for the half year ended January 31 1985. And chairman Mr M. H. Jourdan continues to remain optimistic about prospects. about prospects.

He says the group's performance demonstrates once again how the spread of activities smooths out the fluctuations that occir in the markets. While Parker Knoll Furni-

while rarker knot rarniture and Nathan have performed at levels comparable with last year, the substantial investment made in new ranges for G. P. and J. Baker and Parkertex (textiles) is flowing through into profit. Low demand at Raymakers

(velvet weavers) has led to increased pressure on margins, which has been exacerbated by renewed imports from the Near East. Sales in the half year came

to £21.42m, against £20.26m, from which a trading profit of £1.78m (£1.46m) was earned, after depreciation charge £566,000 (£451.000). Earnings are shown to he up from 11.7p to 13.4p after tax £750,000 (£569,000), and the interim dividend is held at 3p net per share.

For the full year ended July 31 1984 the group made a pre-tax profit of £3.2m on turnover of £40.88m. Earnings appeared at 27.2p and the dividend total was 9p.

#### comment

objective view of An objective view of furniture manufacturing might well regard a prospective earnings multiple of under 6 as adequate given the industry's poor performance and unexciting outlook. Yet in Parker Knoll's case ret in Parier Mont's case that rating at 180p looks a touch harsh. Its upholstery operation remains a solid contributor, almost regardless of the underlying market and the management is working to expitalise on its quality image by attacking specialist niches — eg Parker Care. The Nathan acquisition three years ago, taking the company into cabinet farniture, remains a loss making exception but it could just about make a profit this year. Yet the reason for regarding Parker's rating as mean is not the underlying strength of its furniture side but that textiles are an important part of the business almost Last year furniture only produced £1.4m of the £2.3m trading profit. And in this first half all the growth came first hair all the growth came from textile designing and wholesaling. Further acquisitions in the furniture/furnishings sector may be made to give a broader coverage and Parker has the balance sheet strength to contemplate e deal though singed by the Nathan experience, management reexperience, management remains wary. If there is a drawback to the shares for City investors it is the limited

# Restructure benefits give Phicom a boost to £3.62m

THE FRUITS of restructuring carried out by Phicom in 1981-1982 are reflected in the group'a results for 1984 which show pretax profits at £3.62m, a rise of £1.26m over the figures for the previous wear.

the net total for 1984 from 0.75p to 1.1p.

During the 12 months the electronic enclosures division moved back into the black and group interest charges were more than balved due to the cash received from the rights issue at the end of 1983, and from the sale last August of the 50 per cent interest in the Rank Phicom Video Group.

Group turnover improved from £38.32m to £42.97m and operating profits from £3.11m to £3.87m. A divisional breakdown of profits et this level shows: (£3.14m), life sciences £549.000 (£475.000) and electronic enclosures £33.000 (£508.000 loss).

enclosures £130,000 (£508,000 loss).

Pre-tax profits were after deducting interest of £427,000 (£937,000) and adding in a £174,000 (£189,000) share of related companies' profits.

Tax accounted for £773,000 (£692,000) but below the line there were extraordinary credits this time of £1,93m (dehits £224,000), being e gain on the sale of shares in Rank Phicom Video, less certain costs.

Earnings on a net basis amounted to 4.8p (3.4p) per 10p share.

amounted to 4.8p (3.4p) per 10p share.
For 1985, outstanding order books are healty and spending on new product development is being substantially increased.
The first quarer, however, was edversely affected by low sales of telex machines to British Telecom and e delay in obtaining final technical clearance on e major defence printer contract.
Although this will cause e

**BOARD MEETINGS** 982 are reactive for 1984 with tax profits at 13.62m, a results for 1984 with tax profits at 13.62m, a results for 1984 for the previous year.

The directors expect a further bealthy improvement in 1985, but warn that figures for the opening six months will be edversely affected by low sales of telex machines in the first quarter.

A final dividend of 0.75p lifts the net total for 1984 from 0.75p the net total The lollowing companies have notified detes of board meetings to the Stock Exchange. Such meetings are usually hild for the outposes of considering dividends. Official ladications are not systiable as to whether the dividends are interirs or finals sad the subdivinions shown below are based mainly on that year's timetable.

FOLLOWING ITS "significant progress" in 1984, reflected by higher profits, the flotation of the shares in May and expansion into the West Midlands in August, the Greggs group of bakeries and bakery shops looks forward with confidence to the current year.

Chairman Mr Ian Gregg says it is boped to expand more rapidly in the West Midlands, building on the strong base afforded by Charles Bragg (Bakers), and financial resources are available for other opportunities either through acquisition. A satisfactory start has been made to thme year and profits are ahead of 1984. The return to work by the miners "removes e major concern," though it is likely to be some months before spending power return to normal.

In the second balf of 1984. The retire to normal.

The clairman says a high level of 3.4p, as a small independen bakery group, Greggs is not in the food sector. For no, its catchment area is in the less brownised in the prospectus. The chairman says a high level of investment was maintained and total capital expenditure, including acquisition, was £3.1m.

The chairman says a high level of investment was maintained and total capital expenditure, including acquisition, was £3.1m.

Stylo claims

it has close

company status

The directors of the shoe

retailer, Style, announced yester

day that after recent share deal-ings in the company they con-sidered Stylo to be a close com-

pany for tax purposes.

No Stylo director was available for comment yesterday.

However, the statement is believed to be a reference to last mouth's purchase of the Kuwaiti Investment Office's 18.4 per cent in Stylo by the Ziff family and

associates who control the company. The share transfer came after

the Ziffs thwarted a partial take-over from British Land. The

directors' statement suggests that they believe they control enough

of the company's equity and votes to warrant the special tax treatment conferred by close company status.

# Financier buys 29% of Goode Durrant and takes top post

Mr Michael Waring, a 38-year-old South African businessman, has bought a 29 per cent stake in Goode Durrant & Murray Group, the international trada finance group and licensed deposit taker, and has taken over

In a £12.3m deal announced In a £12.3m deal announced yesterday e 63.86 per cent stake in Goode was placed with Mr Waring and a number of City institutions. This move ends the equity control formerly exercised by a trust and an estate connected with Mr Lionel Robinson, the former chief executive who is staying on as chairman. The English Association Trust, a merchant bank, bought 15.34m Goode shares at 80p each and Goode shares at 80p each and placed 7m of them—a 29.14 per cent stake—with Infintraco Establishment, a company con-trolled by Mr Waring and family

Tha rest of the shares were placed with institutions, including the United Kingdom Temperance and General Provi-Temperance and General Provident Institution, which took 5m shares, or 20.82 per cent.

To give minority sharebolders in Goode the opportunity of selling et tha same price Infintraco will make an offer to purchase the balance of the shares at 80p.

With Goode's shares 3p firmer at 83p yesterday shareholders are

unlikely to accept this offer. The trust of which Mr Robinson is joint trustee and the estate of which he is joint executor have each retained 500,000 shares or

each retained 500,000 shares or 2.8 per cent.
Goode reported a marginal decline in pre-tax profits to £2.57m in the year ended October 1984 from £2.52m on turnover which rose to £67.6m from £64.5m. Earnings per share fell to 5.7p from 5.1p though the net dividend was maintained at 1.25p.

Mr Waring said: "I was look-ing for a business with a good financial base for growth. Goode has little or no gearing, an extremely sound balance sheet and a surplus of liquid assets." Mr Waring built up the F. R. Mr Waring built up the F. R. Waring group of companies, a Jobannesburg-based agricultural and soft commodity trading house from R5m to R250m turnover in the 1970s. He subsequently became a director and shareholder of Finansbank, e South African merchant bank, hefere selling these interest and before selling these interest and moving to London three years

ago.

Mr Selby Waterfall, a director of Goode, said Mr Robinson, who is 71, "felt it would be sensible to diversify a bit. Ha had a large chunk of his assets in Goode."

#### **Process** Systems' goal still in reach

DESPITE a slight reduction in net income for the six months to the end of 1984, the directors of Process Systems confirm their forecast of US\$2.9m (£2.69m) for

the full year.
The midway profit slip was because the North Carolina because the North Carolina based company, which gained e full London listing last December, invested heavily in additional personnel premises and research and development in anticipation of the substantial increase in sales projected for the year. Half year sales increased by 24 per cent from \$3.71m to \$4.6m (£4.26m).

The result also reflects the fact that sales and earnings are weighted towards the second half. Process Systems supplies microelectronics and recording

half. Process Systems supplies microelectronics and recording equipment for the electricity supply industry.

Costs and expenses totalled \$3.51m, against \$2.5m, with cost of goods solds at \$1.63m, against \$1.28m. Research and development accounted for \$566,023 (\$327,300), and selling, general and administration expenses took \$1.19m (\$228,000). Depreciation charges were \$26,144 ahead at \$60,144 and net interest expenses rose from \$39,000 to \$65,631.

After tax at \$487,576

After tax at \$487,576 (\$571,392) earnings per common share are quoted at 1.25 cents (1.68 cents).

Carbury Resources Carbury Resources, the Dublin-based oil and gas exploration group, cut pre-tax losses from 15330,000 to 1528,000 (£24,000) in the half year to June 30, 1984. The 1983 figure, however, in-cluded an exceptional debit of 15229 500

Operating revenue came out at 57,000 (£136,000). Losses per £1 share were shown down from 22.2p to 1.92p, after a tax credit last time of £5,000.

In December, 1984, the company modified its group structure to deploy its assets in North America more effectively. Carbury is actively seeking oil.

Carbury is actively seeking oil and gas proposals which can contribute to further growth.

# THF still keen on Savoy in spite of 'ridiculous' price tag

Trusthouse Forte is still keen to acquire the Savey Hotel and its prestigious chain of London botels, but not et the current asking price.

Lord Forte, the chairman of THF, yesterday told shareholders et the annual meeting that, "in view of the artificially high price of Savoy A and B ahares, any offer will not be much different from the original one."

one."
In 1981 the group made an unsuccessful bid to acquire the Savoy's key B shares and its limited voting A shares, culminlimited voting A shares, culminating in an offer worth aroun; 575m. The shares then traded in the region of 950p and 180p respectively, but last night closed et £85.50 and 361p. "I'd like to think we spurred them on to greeter things," said Lord Forte.

THE currently has 68 per cent

THE currently has 69 per cent THF currently has 69 per cent of the Savoy's equity, but because of the share structure can only command about 42 per cent of the total voting strength. Lord Forte said that the heavily-weighted B shares were "highly priced, held by a small group of people, and not beavily traded."

He went on to say thet the savey that the votice prices put e value on the Savoy Hotel which worked out to "about £25,000-30,000 per bedroom, which is quite ridiculous."

THF's requests for representation on the Savoy board bad repeatedly met with rejection, with Mr Eric Hartwell, THF's

Lord Forte (left) and Lord Thorneycroft, respectively chairman and president of Trusthouse Forte

He went on to say thet the

Savoy veto.

In snawer to a sharholder's question, Lord Forte said that the group would be interested in any proposals to privatise British Rail's catering operations, "as we are in any opportunities to expand business."

## Christy Hunt relocation going ahead

It is still too early to forecast future trading results for the Christy Hunt group, although nothing found to date bas changed the directors overall view of the merits of the merger.

Chairman Mr J. H. Dyer says

Chairman Mr J. H. Dyer says the group starts an exciting new in its history. At the beginning of this year Christy Bros, which make machines and machine systems, bought the engineering business of R. Hunt & Company for £455,000, satisfied by the issue of 1.5m ordinary shares in Christy—of those Im were placed at 29p each and the vendors agreed not to sel 1 the balance for at least one year.

prices. The sale is also in hand, year and contributed £120,000) of the Chelmsford premises for and a £280,000 drop in contract some £950,000 net of selling sales. Overall sales were £1.14m expenses; from that will be met the costs of relocation and some higher in the second balf. capital expenditure et Earls higher in the second balf.

capital expenditure et Earls
Colne.

Six months figures for Christy
Bros are published, covering the
period to December 31 1984.
Sales are lower, as expected,
because of the ebsence of Christy
Electrical (which was sold last

#### Goodwin production difficulties

at 29p each and the vendors agreed not to sel like balance for at least one year.

The foundry explosion in the profitability of the strong christy's business from Cheimsford to Earls Coine, and this should be completed by the autumn. The directors' estimated that the saving in overbead costs on full integration of the two businesses would be some £300,000 annually at present the withdrawal of stock relief and reduced capital allowances, the tax charge is £38,500 (£16,000). to leave earnings at the saving in overbead costs on full integration of the two businesses would be some £3.35m (£2.8m) and profit to the saving signs of improvement.

#### London Shop up to £3.2m at midway

With net property revenue up from £3.61m to £4.69m, pre-tax profits of London Shop Property Trust advanced to £3.2m for the half year to October 31 1984 against £2.59m last time.

Tax took £1.18m (£1.01m) and stated earnings per 25p share were 4.09p (adjusted 2.77p) basic, or 3.7p (adjusted 2.77p) tully dilnted. The net interim dividend is up from an equivalent 1.33p to 1.35p—last year's total payment was 4.41p after adjusting for the one-for-two scrip.

The continued improvement in property revenue resulted from rent reviews, lease renewals and income from property purchases. Property trading profits were markedly higher at £484,000 (£61,000), but are unlikely to contribute significantly in the second half, the board states. Housebuilding profits rose

second half, the board states.

Housebuilding profits rose from £280,000 to £330,000, but the board says this activity must inevitably be affected by the increase in interest rates and the very bad weather this winter.

Because of the change in arrangements for the management of the property portfolio, administration and other expenses of £449,000 (£277,000) included costs, which in previous years would have been reflected as reductions in net property revenue.

#### Granada ahead

At the annual meeting of the Granada Group, chairman Mr Alex Bernstein brought shareholders up to date on the prospects for the current year.

He said trading profits in the initial months had shown a satisfication of the current year. factory improvement over last year, despite disappointing tele-vision advertising revenue and the effect on some companies of the cold winter and miners'

strike. With the saving from the integration of Rediffusion still to come, he looked for an increase in profit and cash flow for the full year, "which would the full year, "which would sustain Granada in its ambition for growth this year and in the future,"

#### COMPANY NEWS IN BRIEF

Profit before tax from Instem, the electronics group, edvanced by 138 per cent to £646,000 in 1984. This represents e 5 per cent increase over that forecast in last November's prospectus—for entry to the USM—and the dividend is the promised 0.5p

Mr David Gare, the chairman, says the current year opened with e record order book, which has "given us an encouraging start to 1985." He is confident start to 1985." He is confident that the prospects will develop as the company expands into new sectors and increases penetration in its established markets. The strategy is to provide a broad range of hardware and software products to satisfy e wide range of applications. During the year Instem consolidated its position in its niche dated its position in its niche markets of industrial processing, scientific research, and mining.
Turnover in the year expanded

(3) At 31 December 1984, the exchange rates were K1=US\$0.447 and K1=£0.383 and on 4 March 1985 K1=US\$0.401 and K1=£0.374.

LUSAKA, 7 March 1985—Zambia Consolidated Copper Mines Limited (ZCCM) made a profit of K85 million before tax in the quarter ended 31 December 1984, compared with K7.2 million for the corresponding quarter of 1983.

A company spokesman said that after taking into account mineral export Tax, equity levy and income tax amounting to K37.3 million, ZCCM made a net profit of K47.7 million in the December 1984 quarter against a net loss of K24.4 million recorded in the same period of 1983.

recorded in the same period of 1983.

He explained that the company's improved financial results in the quarter anded 31 December 1984, reflected an increase in metal prices and sales, compared to those obtained in tha corresponding period of 1983.

For the nine months to 31 December 1984, the company made a net profit of K50.3 million compared with a net loss of K144 million for the corresponding period of 1983, the spokesman added.

spokesman added.

He said that it should be noted that the net profit for the nina months ended 31 December 1984, of K50.3 million exceeded the negetive reserves of K33.1 million brought forward at the commencement of this fiscal year, to report e positive reserve position at 31 December 1984 of K17.2 million. The last quarter to show a positive reserve position was thet ended 30 September 1982.

Copper production for the quarter ended 31 December 1984, et 129 230 tonnes, was 3 per cent lower than the production for the corresponding quarter of 1983. For the nine months to 31 December 1984, copper production was 394 283 tonnes, compared with a production of 423 612 tonnes in the same period of 1983.

The spokesman attributed the lower production to the continuing shortage of spares and consumables. He said copper sales for the quarter, at 151 517 tonnes, were 1214 tonnes higher than the sales for the December 1983 quarter, while for the nine months to 31 December 1984, the company echieved copper sales of 436 458 tonnes, compared with the 451 733 tonnes sold in the corresponding period of 1983. The average price of copper, at K2 819 per tonne for the quarter, was 35 per cent higher than the K2 083 per tonne for the same period in 1983.

Cobalt production, at 769 tonnes, was 43 per cent higher than

Cobalt production, at 769 tonnes, was 43 per cent higher than the production for the December 1983 quarter. Sales of cobalt, at 1307 tonnes, were also considerably higher than the 795 tonnes sold in the corresponding period of 1983. The average sales realisation for cobalt, at K50 324 per tonne, was significantly higher than the K17 653 per tonne realised in the December quarter of 1983.

December quarter of 1983.

The spokesman said that production of lead and zinc, at 1516 tonnes and 5 030 tonnes, respectively, was lower than the production for the corresponding period of 1983, mainly due to the overhaul of the Imperial smelting plant at Kebwe. Lead and zinc sales of 1579 tonnes and 6 577 tonnes, respectively, were also lower than in the December 1983 quarter. He said total sales revenue of K516.9 million, for the quarter represented an increase of 18 per cent over the K248.5 million for the corresponding quarter of 1983. The company recorded a profit on metal trading of K129.0 million for the quarter against e profit of K524 million in the quarter ended 31 December 1983.

The Board of Directors did not declare a dividend in respect

The Board of Directors did not declare e dividend in respect of the quarter ended 31 December 1984.

MICROCOMPUTERS WIDEN APPLICATION OF COMPUTER AIDED DESIGN

# Personal touch for industrial design

BY GEOFFREY CHARLISH

COMPUTER AIDED design COMPUTER AIDED design (CAD) continues to come down market, allowing engineers and others, armed only with a personal computer (PC), to do work that only a few years ago would have needed a large minicomputer.

Two year old Autodesk, for example, the Californian-based company with software called AutoCAD that will work on almost any PC, has already sold 1,000 systems in the UK and the world figure has reached 15,000.

In the spring learners and company with software called 15,000.

In the spring, it will introduce limited "three dimensional" software in the UK (the system is two dimensional at the moment). Soon it plans to offer micros with AntoCAD software as workstations for large scale CAD systems like those from Computervision and IBM — one of the reasons why IBM — one of the reasons why it expects its revenues to rise to \$40m in 1985.

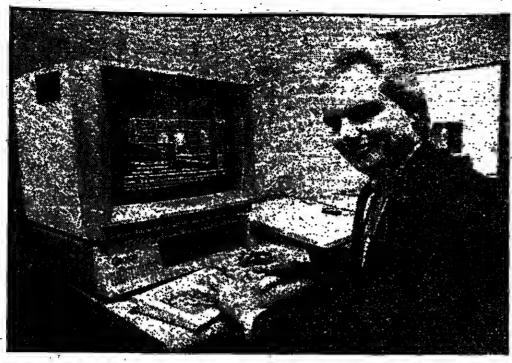

New horizons are being opened up for CAD by these small systems. For example, Smees Advertising, a London agency, is using AutoCAD to help sell office space in the New City Court complex near Longon City Court complex near London Bridge, for its property developer client, Chesterfield.

New horizons are being opened up for computer aided design by small systems.

Up to 14 programs of floor lay-onts in any of three buildings can be shown and modified to prospective occupiers' needs. According to market research company Daratech, Autodesk is set to capture 25 per cent of the PC-based CAD market in the U.S., with 1984 revenues put

at \$10m. It does not have the market to itself however. There are perhaps 50 two-dimensional draughting packages on offer in the UK. Robocom of London for example, claims to have sold-nearly 5,000 systems for use on Apple machines and the BBC

brands of micro, whereas many materials handling and process of the other offerings are for control company, produces one machine or one application. wiring diagrams. Industrial air For those who already have conditioning . manufacturer

director of Chesterfield Properties, uses an Autodesk computer-aided design system supplied by KGB of Windsor. Running on an IBM PC, the system shows floor layouts to potential tenants at the New City Court development near London Bridge

a suitable PC, the Autodesk software, called AntoCAD, costs between £1,000 and £2,000. Packages like this will find increasing application, provided that large scale design and engineering tasks with many highly detailed drawings are not involved more the pro-vince of the big suppliers.

One of Antodesk's eight main UK dealers is KGB Micros of Windsor which, with Riva Terminals of Woking, covars the aouth-east of England, KGB bas sold 54 systems so far, includ-ing two to the Stock Exchange which are being used to construct computer flow charts.

Applications tends to fall into three main categories; basic drawing, graphics design and

The first covers almost anything from the design of multimicro.

But Autodesk bas surprisingly sophisticated complete systems costing as little as f6,000 that will run on most while Redler of Stroud, a bulk

and the second s

A second group of prospects are graphics designers, who for a relatively small sum can produce advertisement layouts in colour and ring the changes on them for clients to consider on the spot. Similar treatment can be given to corporate graphics' projects, embracing visiting cards, letter beadings and company logotypes. AutoCAD has also gone to a

number of architects and the system has the blessing of RIBA, which has installed system. Applications in this area include botel room and office design where, once again, the client can directly consider the visual and user effect of

changes to layout,

It is easy for the designer to compile graphically and store the contents of an office or bed-

AutoCAD are available for some 20 brands of PC running on the MS-DOS/PC-DOS operating systems including ACT, DEC, IBM, NCR, Olivetti, Texas and Wang. Many IBM-compatible machines can also be accommodated. dated.

A roller-ball "mouse" is used to move a cross-hair cursor about the screen to mark points which the computer joins up to make lives. Items in a menu of activity choices down the right hand sida of the screen are also pin-pointed by the cursor and change according to the work in hard.

Items constructed can be stored for later re-call and use. They can be "dragged" around the screen for re-positioning; expanded or contracted. Particu-lar "windows" on a drawing can be saved and recalled as "named views" and text can be annotated to the drawing in a variety of founts. Exact positions can

#### Component insertion

HEWLETT PACKARD attempting to perfect hardware that will automatically insert electrical components into printed-circuit boards in a manner such that the type of component can be changed easily between hatches.

Engineers will be able to program the system, to be installed at a planl in South Queensferry, near Edinburgh, so that the type of component can be varied, thus making possible the production of small batches of boards.

In conventional insertion hardware for printed-circuit boards, the equipment receives companents from cassettes or bandollers in such a way that identical electrical devices are placed in the same positions in different hourds. It is normally difficult to vary

the type of components—as a result, such automation systems are of use only when manufac-turers require very long pro-duction runs of boards. This could he the case in the manufacture of electrical equipment sold to mass markets, bome compulers for instance.

Where a company wishes to make hoards to fit equipment that is customised to suit the needs of a specific customer, such automatic systems are generally useless. Insertion of components then has to be done

In collaboration with Taylor Hitec, a small company of engineers near Manchester, Hewlett Packard is installing a £500,000 manufacturing cell for printed-circuit boards at the South Queensferry plant. This could be followed by up to a dozen aimilar cells if the pilot version of the hardware works

satisfactorily.

The equipment should be useful in the production of the special kinds of goods made by the factory — telecommunica-tions-test hardware. The specification for these products may need to change frequently depending on the jobs for which

contains two robot arms, sup-plied by Siemens Mantec of take boards from a conveyor and load them into the main

hody of the cell.

The second robot feeds up to 600 different types of resistors into a sel of cassettes which, io turn, provide a store of components for an automatic insertion machine.

A NEW CONSUMER CRAZE?

# Flying objects

IS IT a bird? Is it a plane? Is it a frisbee? No. it's Aerohie, the invention of Stanford University Engineering lecturer Alan Adler. Aeroble holds the world'a record for distance flight by a thrown, heavier-than-air object—1.046 feet 11 inches—and makes the frisbee look like an inebriate dinner plate.

Designed using computer-aided design techniques, Aeroble is basically a ring-shaped, moulded plastic object with a spoiler lip. But look at it go! The average person can throw an aeroble three times as far as a frisbee, and it is easier to catch.

When not throwing rings into the air, Mr Adler teaches the engineering of sensors at Stanford. He is also a silicon valley consultant and inventor, holding 25 patents.

But Mr Adler has been disappointed by the lack of commercial success of his previous inventions, which include after flying objects and a new type of sailboat bull. So Mr Adler has formed his own company, Superflight Inc., to produce aerobles. Already the toys are proving a hit on the Stanford campus.

#### BUILDING MATERIALS Man-made granite

A £1.7M venture to produce advantages, the material's all man mada granite and marble slabs for cladning and floors, which claims to he respectively 90 per cent and 20 per cent cheaper than the natural pro-ducts, has just been launched lu Cwmtillery, Gwent, south

Wales. The re-constituted stona is being marketed under the trade name "Celtic Granite." It is produced by consolidating high grade quartz silica aggregate (quarried in Scotland's western they are intended. isles), and pigmented polyester
The component-insertion cell resin binders.

The performance specification of the new materials matches West Germany. One robot will the fire, weathering and abrasion standarda of polished granite and easily exceeds those of natural marble, according to Marmor Works, the new manufacturing company.

Mr Chris Watson, Marmor's capacity to produce around a sales and marketing manager, quarter of a million square says that as well as these

round parformance at lesser thicknesses, and its ease of application, makes it ideal as both an internal and external building material. The highly automated produc

EDITED BY ALAN CANE

tion process involves subjecting framed slabs of granite aggre gate and resin mixture to vacuumed and vibrated pressure of over 20 tonnes, to produce the consolidation before curing. The consolidated slabs are then ground, polished and cut to the sizes and finishes demanded by the customer, the price working ont at around

f12 per square metre.
As well as cladding and flooring, Marmor is offering the material as tiles, panels, sills, treads and skirtings.

The Welsb plant, which claims to be the first of its bind in the world, has a second of the second

There is also broad agreement
on the desirability of revising
Capital Gains and Capital
Transfer Taxes.
The Confederation of British

Industry, the Union of Independent Companies and the Association of Independent Businesses all want to see CGT removed from assets held for a long time (seven years, suggests the CBI) for non-speculative reasons. They argue that CTT should not be charged when

"This measure would be of particular value to small firms, where companies often have to be broken up to pay the tax incurred by a change of owner-ship," says the CBI in its budget submission to the Chancellor.

The tax position of unincorporated husinesses is another issue high on the lobbyists' agenda. The National Federation of Self-Employed and Small Businesses and the CBI

per cent, while directors' per-sinal drawings from the husi-ness should continue to attract allowed to attract deferred tax so that they can be ploughed hack into the husiness. Under

David Trippler (left): Will Nigel Lawson take beed ?

urging the Chancellor to restore sort of poverty trap," says the argues the AIB.

National Insurance is another hot issue for the lobbyists. The Forum of Private Business, the CBI and the AIR are the most vociferous in arguing that it is unreasonable for Notional Insurance to be charged at its full rate the instant someone's

agenda. The National Federation of Self-Employed and Small Businesses and the CBI for work in progress and unincorporated companies to lose capital allowances and stock relief in the last Budget without getting a compensating cut in tax rates.

The federation suggests that unincorporated companies' profits should he taxed of 30 per cent while diseases:

"The federation suggests that unincorporated companies' profits should he taxed of 30 process for a reduced rate of presses for a reduced rate of entry into income tax and unquoted companies, partnerships and sole traders. Measures which allow "o small business to save up and spend its own profits are more likely to develop the industrial energies of this sector than any adjustments to rates or allowances," argues the AIB. a proportionately heavier burden on small companies with lower paid employees, and deters entrepreneurs from tak-ing people onto their payrolls.

Putting lts overview of small firms' priorities for next week's Budget, the CBI asks for something which not even Lawson can provide easily. "Special measures are indeed hack into the husiness. Under present rules, unincorporated businesses are taxed according to their directors' personal income.

The Association of Independent Businesses, meanwhile, is the working of this particular form of help."

"Special measures are indeed needed to encourage a thriving small firms sector," it says in its budget document. "But a general improvement in the business climate and performance of all firms is the best dent Businesses, meanwhile, is the working of this particular form of help."

> Just over half of the Just over hair of me co-operatives are engaged in service businesses, ranging from computer software to printing to pregnancy advice. The next largest sector is retailing, which accounts for 22 per cent of the movement's

ales.

Not surprisingly, the problems faced by co-operatives
are very similar to those
cacountered by other small
businesses. A survey of the
sector carried out just over a
year ago showed that 28 per
cent of the co-operatives felt
lack of finance was the most
important obstacle to growth.

# Why small firms need big business

William Dawkins on a job creation conference

LARGE CORPORATIONS share a common belief that fostering small businesses is a desirable way of combating unemploy permises in people's pockets so ment in their markets, but they approach the problem in revealingly different ways.

Their contrasting approaches were highlighted at a two-day conference in Brussels last week, arranged by the Conference Board, a U.S. management information service. Entitled Joh Creation in Action: Methods et Work, the meeting brought together more than a hundred industrialists, academics, civil servants, and financiers to discussed in the property of the ground in Europe.

One strong theme to emerge together have been launched by 12

in Europe.

One strong theme to emerge was that public-sector attempts to assist entrepreneurs like the Manpower Services Commission's enterprise allowance scheme in the UK, or the Dutch system of state benefits for people starting self-employment — were not in themselves enough. They could become really effective only when backed up by the private sector as a source of advice, development finance, or premises.

At the same time, large num-

At the same time, large numbers of potential entrepreneurs throughout Europe were failing to make full use of the assistance available because it was

ance available because it was confusingly presented or because they were put off by official red tape.

"Most small firms quite simply don't know what is evailable." complained Christopher Hull, e research fellow at the International Institute of Management in Berlin Trutch husiagement in Berlin. Dutch businessmen are faced with o "con-

nessmen are faced with o "con-fusing and opaque" system for getting start-up belp, added Wubbo de Boer of the Nether-lands Economic Ministry. Moreover, the self-employed frequently eperate in the black economy, and are therafere fearful ef approaching govern-ment sources of advice. Alleyne Reynolds, managing director Reynolds, managing director of BAT Industries Small Businesses Ltd, which has financed two small business workshop conversions in Liverpool and London, recounted how some London, recounted how some small traders were unwilling to use the Department of Industry's Small Firms Service in Loverpool because it was housed in the same building as the Inland Revenue.

They felt more at ease taking

assistance from private sources like the tobacco company's low-rent managed workshops. "For

LARGE CORPORATIONS share - BAT, there is an element of a common belief that fostering enlightened self-interest. We

philanthropy.

A contrastingly less philanthropic and more commercial approach to helping entrepreneurs was taken by Elf Aquitaine, the French oil group, which over the past 12 years has developed a network of regional small business financing and technical advisory bodies. Between them, they have lent over \$100m to 800 projects, and similar organisations have been launched by 12 other big French companies. Ellas Agourt, director of the group's technical centre in the Aquitaine region, outlined four specific benefits arising from the network. It enabled Elf Aquitaine to increase its own knowledge of potentially attractive non-oil industries, to pick np a wide range of possible diversification opportunities, to make commercial contacts with future customers, and to study new markets more easily.

looking to use small companies to attract new ideas, Siemens, the West German electricals giant, has been looking to spinoff its own ideas to new independent ventures. Its decision last summer to allow four scientists to leave Siemens to start up their own integrated circuit-testing company was almost unprecedented among major German groups. The venture now employs 17 and Siemens is planning another spin-off.

Carl Bewerunge, head of Sie-mens' venture capital arm, ex-plained: "To establish spin-offs is in our own business interests. It frequently happens that pro-posals result from our research and development activities which do not fit in with our existing product lines."

By taking share options in the spin-off and by using it as a supplier, Siemens can share in its success, while at the same time finding a use fer an otherwhen maining a use fer an other-wise peripheral research idea.

That strategy is not new to
Europe, as the U.S.-owned Cam-bridge Consultants has shewn
in the UK. But it could be a
sign that risk-taking is becoming less of a dirty word among the more conservative Continen-tal countries

1

#### In brief ...

COMPANIES based in the North East which would wel-come some free advice might find Sunderland Polytechnie's Business Regeneration and Growth Programme useful.

The programme, which runs for 18 weeks starting on March 25, is funded by the Manpower Services Commission and will be run by Frank Patterson, co-ordinator of the polytechnic's small burnings control business centre.

It aims to help participating companies to expand hy identifying existing activities which can be improved potential growth areas, and gevernment grants which they might have overlooked. The programme consists of seminars which will be beld twice weekly—once in the afternoon and once in the evening—and is designed te

interfere as little as possible with the day-to-day running of the businesses taking part. In addition, consultates from the small business centre will visit the companies throughout the course, and will be available to give odvice and guidance. Participants will be asked to report back on the advice they have received.

advice they have received.

Details from Frank Patterson, Small Business Centre,
Department of Business
Maangement, 1-4 Thornhill
Park, Sunderland. ONE WAY to pick np useful contacts or to meet potential sources of finance is to tread the small business conference circuit. And there is no sbort-

conference-goer to put in his diary this year.

Starting a High-Tech Busi-ness in Scotland is the theme of a one-day ferum te he held at the National Engin-

age of dates for the roaming

eering Laboratory in East Kilhride on March 20, Details from Scottish Business In-sider, 10a St Colme Street, Edinburgh.

The National Federation of

Self Employed and Small Businesses will bold its national cooference in Ken-sington Town Hall from March 22-24. Speakers in-cinde Dr David Dowen, leader of the Social Democrats and John Moore, financial secre-

John Moore, financial secretary to the Treasury.

There will also be a small business debate between Ken Livingstone, the Greater London Council leader, Bill Sirs, former president of the Iron and Steel Trades Confederation; and a leading Tery politician, Details from the federation at 140 Lower Marsh, London SEL.

company refused SPILIADA MARITIME CORPORATION V CANSULEX LID Court of Appeal (Lord Justice Oliver and Lord Justice Neill): March 7, 1985 For the purpose of the present appeal, those illustrations were only examples of situations capable of tipping the balance in favour of the granting of leave (see The Ilyssia CA November 9 1984). A PLAINTIFF who seeks leave to serve a writ out of the jurisdiction on the sole ground that English law is the proper law of the contract sned upon, has a particularly heavy burden to prove that the English court is distinctly more suitable a forum than a foreign court. The appellate

At page 72 in Amin Ruskeed, Lord Wilberforce said that "the intention must be to impose on the plaintiff the burden of showing good reasons why service of a writ should..."be permitted upon a foreign defendant. The court must take into account the nature of the dispute, the legal and prectical issues involved, questions of local knowledge, availability of witnesses ledge, availability of witnesses and their evidence and expense."

Therefore, where the only ground relied on for granting leave was that English faw was the proper law of the contract a court must approach the question on the basis that the jurisdiction to grant leave the jurisdiction to grant leave. tion on the basis that the Juris-diction to grant leave was exor-bitant; the burden of showing "good reasons" rested on the plaintiff; the burden was par-ticularly heavy; and that all relevant facts and diremstances must be taken into account.

ings against the state of the shippers had submitted that the obvious place for litigation was Vancouver, where the relevent contract was made and the ship was loaded. Neither party had any connection with Ergland but the shippers hed a close connection with Canada, where they carried on husiness. The only connection with England was the fact that the bills of lading were governed by English law. In the end, however, the court's task was to do what in its discretion "it considers that justice demands" (MacShannon [1978] AC 795, 819): Mr Justice Staughton formu-

hated the test to be applied as "if the English court is shown to be distinctly more suitable for the ends of justice then the case bills of lading were

hy English law.

Order II rule 1 (1) (f) (iii) of
the Rules of the Snpreme Court
(RSC) provides that leave may
be granted to serve a writtout of
the jurisdiction where the contract sued upon is governed by
tract sued upon is governed by
English law.

That would not be faulted as
test if proper weight were
given to "distinctly." On the
jurisdiction."

That would not be faulted as
test if proper weight were
given to "distinctly." on the
convenience of parties and witnesses probably tilted the scales
towards British Columbia as the

Rule 4 (2) provides: "No such leave shall be granted unless it shall be made sufficiently to appear to the court that the case is a proper one for service out of the jurisdiction..." towards British Columbia as the forum, but certainly did not show that an English court would be "distinctly more suit-able for the ends of justice." The judge attached great to November 1980 the Spiliada loaded 19,644 metric tons of sulphur at Vancouver for carriage to India.

The shipowners contended that the cargo was wet when loaded and caused severe corrosion and pitting to the holds and tank-tops of the vessel. They claimed

pitting to the holds and tank-tops of the vessel. They claimed damages and the cost of was a legitimate factor to weight remedial work against the in the halance. The judge was shippers.

The only basis on which they in the halance. The judge was in a unique position to assess the effort which the owners could obtain leave to serve prosceedings out of the Jurisdiction tion of the action and the was that the contracts sued on expertise they had accumulated, were gowerned by English law Nikil was also it matter to be (see RSC Ord 11 (Rule 16 14) (1) weighed in the halance that (iii).

Teave was given to serve the London who hecause of their

(iii) ).

Leave was given to serve the London who because of their writ in Vancouver or elsewhere in Canada. The shippers applied to Mr Justice Staughton to discharge the order and set aside

solicitors were available in London who because of their experience in the other action, were well able to handle the shippers affairs.

The judge, however, attached charge the order and set aside The judge, however, attached the writ.

During the hearing of the heridgeshire factor. Other legal advisers would be available in Ganada. The fact that London solicitors had acquired detailed knowledge about shipment of sulphur from Vancouver was e Vancouver Evidence in that case was taken on commission pointer to trial in England, but should not be regarded as of before Mr Justice Staughton in decisive importance if other

factors tilted the balance the other way.

The Court of Appeal was entitled to interfere and to look et the matter afresh. It was impossible to conclude that the relevant factors, when taken together, showed that the English court was "distinctly more suitable for the ends of justice."

would be from concerns in Van-conver, and ship's officers, but that there were likely to be many witnesses from other places. As to expert witnesses he said "experts can travel, or be replaced by ther experts." The owners were concerned that action in British Columbia could be deteated by a stantory "Nevertheless," he concluded,
"Vancouver is not overall a
more suitable place for trial
than England in terms of convenience of witnesses." He recould be defeated by a statutory two-year limitation defence. In the Adolf Worsks [1978] I Lloyd's Rep 107 Mr Justice Brandon pointed to three possible views about the existence of a time-bar in a foreign jurisdiction. It could be said that the refusal of e stay of English proceedings would deprive the defendants of an accuracy defence abroad, that the grant of a stay would deprive the plaintiffs of a legitimate advantage in England or that because the position of It was clear from Hadmore [1983] 1 AC 191, 220 and Abidin Daver [1984] AC 398 that an appellate court must be very careful in dealing with an appeal judge's discretion.
On the other hand, it was plain from Lord Diplock's speech in Hadmore that though a judge or that because the position of both parties should be looked at the existence of a time-bar was neutral factor. might accurately formulate the principles he was seeking to apply, the appellate court had a duty to scrutinise the application of those principles in case he had given some factor inordinate weight or placed it in the scales on the servers side.

The shippers in the present case were resident and carried on business in British Columbia. Prime facie, it was in that juris-diction that a potential reginess should seek to sue them. Prime facie, the shippers were entitled to arrange their affairs so as to take advantage of limitation pre-visions enacted in British Columbia

serve a writ ont of the jurisdiction solely on the ground that the contract was governed by English law were recently considered in Amin Rasheed [1984] AC 50 65.

There Lord Diplock said that the jurisdiction exercised by an English court as a result of granting leave was "an exorbitant jurisdiction" in that under general conflict rules, it would not be recognised as possessed by any foreign court in the absence of treaty. He said: "Comity thus dictates that the judicial discretion to grant leave The two-year period was not unduly short and rould be extended under British Columbian law. Also that law enabled the court in British Columbia to apply the lamitation law of shother jurisdiction "if a more just result is produced." If one took account of the

ar one took account of the exorbitant nature of the jurisdiction which the degless were seeking to invoke, it would be wrong to ignore the disadvantage which the shippers might suffer if they were deprived of a potential limitation defence. On the facts of the present case the existence of the time-har was to be treated as a neutral factor. The appeals should be allowed.

Lord Justice Oliver gave a concurring judgment.

For the shippers: Peter Gold-smith (Linklaters and Paines). For the shipowners: Nicholas Legh Jones (Holman Femalch and Willan)

WALL STREET

# A subdued tone amid consolidation

FINANCIAL markets on Wall Street began the week in subdued form yesterday, with stocks easing back from their opening levels on volume lower than bas been seen in recent weeks, while bond prices consolidated after last Friday's surge, torites Michael Morgan in New

Stock prices opened marginally ahead but began to drift lower after the first hour's trading.

However, by 3pm, the Dow Jones industrial average was up 0.99 at 1,270.85. In the credit markets, prices of Treasury coupon issues were little changed in the wake of a federal funds rate that eased back to 8% per cent from its 8% per cent opening.

The price of the key long bond, the 11% per cent of 2015, fell 1/2 to 98%2. On Friday, it had risen almost 1% points after a decline in the level of manufacturing industry employment left analysts believing that the Fed was less likely to firm its credit stance in the near term.

In the money markets, yields continued to fall, narrowing the gap with bond market rates, head of results late in the day of the regular weekly auction of

Standard & Poors 500

\$14bn of bills. The three-month Treasury bill, yielding 8.49 per cent was 10 basis points lower while the six-month bill, yielding 8.80 per cent, was 7 basis points

Yields on Certificates of Deposit were

up to 15 basis points lower.
In the stock markets Asarco, the nonferrous metals groups put on \$% to \$26% as it began legal moves to block an at-tempt by the Bell Resources group, con-trolled by Australian investor, Mr Robert Holmes à Court, to raise its stake to

50 per cent.
American Natural Resources was 5% lower at \$61% ahead of today's board meeting which will review options aimed at avoiding a takeover by Coastal Corporation. Coastal was \$% higher at \$34 as it continued to hold nut the possibility of raising its \$60 a share offer if ANR agrees to negotiate a friendly bid.
Castle Cooke dipped \$1% to \$11%. The food products and property company which is facing cash flow problems and

tough terms from its major lenders on restructuring its debt has said it was talking with another, unidentified company about a possible merger. Unocal, the oil group whose stock has

been accumulated by a group led by Mr T. Boone Pickens, eased \$76 to \$46% after disclosing that it had tightened its rules on director nominations and sharehold-

J. M. Tull, the metal products group, surged \$6 to \$19% as Inland Steel begann a hostile hid of \$19 a share for all Tull's 5.1m shares. Inland Steel traded down \$1/2 at \$23%.

Coleco, the maker of Cabbage Patch Among actively traded stocks on the dolls which earlier this year announced New York Stock Exchange, Phillips Petroleum fell \$% to \$48% and Square D, plans to withdraw from the home com-

the electrical equipment manufacturer, traded unchanged at \$39%.
On the American Stock Exchange, ac-**KEY MARKET MONITORS** tive issues included Dome Petroleum, \$1/4 lower at \$1/4 and BAT Industries \$1/15

#### HONG KONG

ahead at \$41/14.

EXPECTATIONS of poor results for some large Hong Kong companies kept prices mostly lower and the Hang Seng index slipped 15.18 to 1,380.11 in moderate trading.

Hongkong Electric, expected today to announce poor results for 1984, eased 15 cents to HKS7.35. A substantial loss in 1984 at International Cities Holdings also depressed the market.

Hang Seng Bank eased 50 cents to HKS46.50 despite reporting better than expected profits for last year. Hongkong Land slipped 18 cents to HKS4.92, Hongkong and Kowloon Wharf 10 cents to HKS5.45, Jardine Matheson 30 cents to HKS9.35, while Henderson Land resisted the trend and rose 3 cents to HK\$1.72. Both Wheelock Marden and Hong-

kong and Shanghai Bank remained unchanged at HKS7.30 and HKS8.80 respectively.

Bank of East Asia, which is seen as having growth potential in China, put on 50 cents to HKS23, but Hutchison Whampoa lost 20 cents to HK520.30.

#### CANADA

LACKLUSTRE trading in Toronto led to a modest downturn, and the Composite index at one stage was 12.77 lower at

Daon Development traded up 20 cents at CS4.85 but Dome Petroleum lost 11 cents to CS2.65 and Bell Canada dropped CS% to CS38%.

The Montreal market portfolio index was off 0.58 at 130.15.

#### EUROPE

# **Diversity** induces caution

DIVERSE DEVELOPMENTS, ranging from local elections to corporate results and encompassing the demise of the Soviet president, led to a cautious start to the week on the European bourses yesterday. West Germany and the Netherlands, nevertheless, returned near to their recently established all-time peaks with small gains.

A narrowly mixed Amsterdam saw a 0.3 gain in the ANP-CBS index to 206.3 ahead of the announcement by Neder-landsche Middenstandsbank of a % percentage point rise in the surcharge on base lending fees to 1 per cent. This bad a depressing effect on sentiment as many viewed the move as confirmation that domestic and U.S. interest rates are

Some disappointment was registered with Heineken's results, and the brewer shed Fl 2.60 to Fl 157. Philips retreated 80 cents to FI 62.70 after details of its restructuring, and insurer Nat-Ned traded at F1 68.70 following its oneinto-four share split on Friday when it closed at Fl 275.

Among those managing gains were Bredero, Fl 3.50 higher at Fl 154 and VMF-Stork Fl 2 ahead at Fl 145. Oce van der Grinten continued the progress made last week with a 50-cent rise to Fl

314, a new high for the year.

Bonds firmed. The CBS-Bond index rose 1 point to 102.1 and the average yield for state bonds dropped to 8.05 from 8.19. Among key state issues, the latest 8 per cent loan added 60 hasis points to 99.3 and the previous 7.5 per cent issues rose 80 basis points to 96.5 per cent.

Subscriptions close today for the Fl 150m 8.75 per cent ABN subordinated capital bond issue at par. Yesterday's partial recovery in the bond market is expected to aid demand for the issue.

Regional and municipal elections in Germany had virtually no impact on quiet Frankfort trading. Interest shifted away from equities toward the bond market after Friday's surge in U.S. bond prices. Gains of up to 70 basis points were scored as fears faded that the Bundesbank will force interest rates higher. - Early bond trading was active with orders of up to DM 20m, but demand eased as the session progressed. The Bundes-bank sold DM 45m against purchases of DM 82.1m on Friday.

In the stock market, Siemens featured strongly with a DM 10 surge to DM 561, while Porsche stormed ahead to another all-time high of DM 1.388, up DM 10.

The tone of the session was reflected in the movements in the leading bourse indices. The Commerzbank index gained 2.2 to 1,205.3, just below its alltime high, while the FAZ index moved 0.12 higher to a record 417.72.

A firmer trade developed in Paris although local election results had little impact. Reports from Moscow about the death of the Soviet president failed to influence trading. The presence of institutional buying and a decline in shortterm interest rates underpinned the better performance.

#### Transport group Chargeurs hit a 12-month high with a FFr 22 rally to FFr 509 and Galeries Lafayette in stores managed a FFr 14 rise to FFr 320.

Caution dominated Zurich despite broad optimism over forthcoming corporate results

Banks were mixed with Credit Suisse SwFr 5 down at SwFr 2,415 while Dow Banking added SwFr 20 to SwFr 1,190. Food manufacturer Hero rose SwFr 250 to SwFr 4,000 after Friday's defensive move against a possible takeover.

Bonds closed mostly lower. Brussels and Madrid started the week higher while Milan retreated under technical pressure.

Stockholm was hit by the Government price freeze announced an Friday although trading was moderate. Ericsson fell SKr 13 to SKr 259 ahead of lower 1984 results. Electrolux moved against the trend with a SKr 5 rally to SKr 322, a new high for the year.

#### **AUSTRALIA**

LOWER prices and light trading in Sydney took the All-Ordinaries index down 4.1 to 783.9. Melbourne was closed for a Labour Day holiday.

Hooker, the property group which is subject to a A\$2.05 a share takeover offer by Sunshine Australia, traded beavily to close unchanged at A\$2.08. Bond Corporation, also actively traded, ended up 1 cent at A\$1.49.

Elsewhere, Comalco lost 10 cents to A\$2.50 and BHP fell 2 cents to A\$5.54. Bell Resources put on 4 cents to A\$5.74.

The group is interested in raising to 50 per cent its stake in Asarco, the mining company, which in turn has filed a law-suit against Bell Resources.

#### SINGAPORE

DISAPPOINTING news on corporate income tax in Singapore's 1985 budget dampened trading, and prices fell across the board on some profit taking. The Straits Times industrial index lost 7.64 to 841.98.

Although Sime Darby reported better than expected interim results, it slipped 4 cents to \$\$2.00. Consolidated Plantations, its subsidiary, followed suit, ending 2 cents lower at S\$2.88.

Elsewhere, Malayan Banking eased 5 cents to S\$6.25, Inchcape 8 cents to S\$2.80 and Genting 5 cents to S\$5.85.

#### LONDON

GILTS remained the dominant sector as London began the fortnightly trading ac-count which covers next Tuesday's budget. A strong rally in sterling also led tobeavier demand.

BTR, which announced an increasedoffer for Dunlop late Friday, advanced strongly. BTR put on 33p to 891p and Dunlop gained 15p to 66p. The clearing banks also moved up. The FT Ordinary sbare index ended 1.1 up at 989.2.

Chief price changes, Page 32, Details, Page 33, Share information service, Pages 34-45.

#### **SOUTH AFRICA**

DESPITE a steady bullion price, gold shares eased in Johannesburg, where buyers remained on the sidelines waiting for a clearer trend to develop in the price of gold and value of the rand.

Vaal Reefs dropped R3 to R172 and Southwaal lost R1 to R71.50. Randfontein gained R1.50 to R174.50 and Kloof ended unchanged at R70.50.

Diamond producer De Beers lost 7 cents to R9 and Rustenburg Platinum also slipped, shedding 35 cents to R15.

#### **TOKYO**

# **Sustained** retreat from peaks

Aluminium prices tumble

on surprise rise

in stocks, Page 38

GROWING investor concern about record price levels, coupled with the usual absence of incentives for the beginning of the week, drove the market down in Tokyo yesterday for the third straight session, writes Shigen Nishiwaki of Jiji

Only medium to low-priced basic materials and China-related issues attracted buying interest. Market activity

dwindled as the day progressed.

The Nikkei-Dow James market average sbed 83.68 to close at 12,263.85, posting a three-day loss of 234.82. Volume sharply to 285m shares from Friday's 355m. Declines outpaced advances

by 492 to 245 with 163 issues unchanged. The sustained setback had a number of causes: The margin debt on the three major exchanges hit an unprecedented high of Y3,000hn; the Dow Jones indus-trial average in New York failed to top 1,300, and corporate huying, mainly through trust accounts, which had been the driving force behind the recent price surge, weakened ahead of the closing of accounts at the end of March. Reports that Soviet President Konstantin Chernenko bad died were another dampener.

Pharmaceutical issues, which bad attracted buyers as leaders of hiotechnology-related stocks, fell sharply. Mochida Pharmaceutical moved the maximum Y500 down Y8,650. News that continuous use of a stomach-ulcer drug could cause cancer pushed Sankyo down Y100 to Y1,200, Dainippon Pharmaceutical Y250 to Y5,380 and Yamanouchi Pharmaceutical Y130 to Y3,790.

Mitsui Toatsu Chemicals topped the active list with 21.63m shares changing hands, on joint development of an antithrombosis agent with a U.S. company. The stock rose Y15 to Y210. Reports that Tsumura Juntendo had developed an anti-cancer drug sent the issue up Y160 to

Among selectively bought medium and low-priced shares, ranging from Y200 to Y500 per share, Mitsubishi Steel Manufacturing ranked fifth on the active list with 6.93m shares, spurred by the start of sample amorphous alloy supplies. The stock climbed Y46 to Y356.

Mitsubishi Chemical, second most active with 14.88m shares, gained on speculation of a possible resumption of dividend payments for the accounting year ending next January. The stock rose Y7 at one stage but closed Y4 down at Y453. Nippon Kinzoku also drew strength from its development of new materials such as amorphous alloys, gaining Y35

Elsewhere, Isuzu Motors opened firm but finished Y4 down at Y442 after late

The bond market behaved well, reflecting the good performance of the credit market in the U.S. But many institutional investors stayed on the sidelines, leaving bond dealing to securities firms. The yield on the benchmark 7.3 per cent 10-year government bond due in December 1993 slipped to 8.925 per cent from last Friday's 6.975 per cent.

# **Candidates** assemble for launch

WEST GERMANY

"THIS IS not just a passing fad. Companies will continue to be launched on the bourse even in less favourable stock market conditions."

As these remarks by a Frankfurt banker indicate, the West German stock market is assuming a greater role as a source of funds for medium-sized and privately owned companies prepared to go public writes John Davies in Frank-

Plans for stock market reform are being pushed ahead to consolidate this trend. The number of companies being launched on the stock market, however, is still very small by some foreign standards and the obstacles, psychological and financial, remain considerable. New bourse launches, which were no

more than a trickle for many years, built up to a peak of 21 last year, with the public share offers effortlessly raising a total of DM 1.7bn (\$495m). Deutsche Bank promoted most of last year's flotations, while Commerzbank was also prominent, along with BHF-Bank and

In banking circles, it is felt that the number of launchings this year could match or just fall short of last year's

So far this year, Fuchs Petrolub, a lubricants group founded more than 50 years ago, has raised DM 18m with an offer of non-voting preference shares through Deutsche Bank, while Brillantleuchten, a lighting manufacturer set up more than 30 years ago, has raised DM 10.5m in an ordinary share offer arranged through the co-operative DG

Bankers expect the wave of launches to gather more momentum later in the year, once businesses have finalised their 1984 results. The largest companies to go public

last year were Porsche, the sports car maker, and Nixdorf, the data processing concern, whose share offers totalling DM 874m raised more cash than all the other launchings put together. With bankers reluctant to disclose plans, there are indications of larger

concerns going public in the near future. FAG Kugelfischer, the bearings and engineering group, is among those ex-pected to join the list. Henkel, the detergents manufacturer, has also figured lately in renewed speculation about a stock market launch, although the family-owned company maintains there is no firm plan.

The improved stock market mood during the past 2% years, coming after corporation tax changes, bas made share buying more attractive for investors and has encouraged more West German businesses to initiate a public share offer. More companies have been launched on the stock market in the last three years than in the previous 20

"New launchings will continue as a normal process in the years ahead," according to one banker. There will perhaps not be as many as 20 companies a year coming to the bourse, but every year there will be quite a few." In an attempt to consolidate this

trend, the Bonn Government and bourse experts are pressing ahead with plans for stock market reform, with draft legislation possible within the next couple of months.

One widely accepted proposal is that there should be statutory recognition for a second tier of trading. Companies going public now have the choice of three tiers - official trading, geregelter Freiverkehr (over-the-counter market) or Telefonverkehr (unregulated free mar-

Although there is still debate about bow it will be achieved and about the implications, the intention is to put a second tier on a sounder footing. Specific requirements would be laid down for second-tier companies, but companies would still have easier access to this market than to an official listing. However, with West Germany's strong

tradition of private businesses, one problem for owners is the nagging worry that going public could mean losing some control, either to employees or shareholders. Once a business is restructured into

public company form employees theoretically gain a say in its running through representatives elected to the supervisory hoard. Reluctance to formalise such employee influence accounts for the caution of some businessmen, according to Many families which have managed

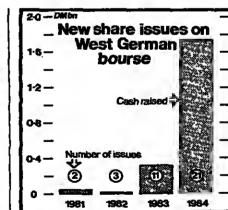

businesses for years are also reluctant to yield influence to sbareholders from outside, especially if the businesses are not in urgent need of capital. One way around this problem has been the issue of stock in the form of non-voting preference shares - the type of new shares is-sues by Porsche and Nixdorf, among others.

Some bankers, in fact, encourage en-terprises to take this course in order to overcome any hesistancy about going public. Although non-voting shares are frowned on in some stock market circles overseas, West German bankers tend to argue that investors, including foreigners, are not deterred by non-voting preference shares. "They want to make money, not to

vote," one prominent banker said. "The lack of voting rights is only a topic of conversation between journalists and bankers."

Another hindrance to stock market launchings is the cost, in both money terms and management time, which may be involved in reshaping companies

in preparation for going public.
"Some have a lot of parallel businesses," one bank executive said. "They

must restructure, and that takes a lot of Restructuring can also lead to tax bur-

dens as a result of realising property or financial assets in the process of moving them from one unit of a business to an-The Bundeshank has repeatedly sug-

gested that not enough is being done to improve the financial position of businesses through the stock market and to reduce their reliance on bank lending. But bankers react caustically to such

claims, pointing out that concern about possible outside interference and tax costs, as well as fear of excessive publicity, can be inhibiting factors. Bankers are also anxious to avoid

launching businesses on the bourse too hastily, without long and detailed consideration of their basic strength and prospects.

They are concerned to avoid the predicament of Portfolio Management, the Munich financial consultancy, which played a pioneer role in helping companies to go public only to see some of them slip into financial difficulties.

Despite the obstacles, however, the stock market evidently figures more prominently in the thinking of West German businessmen these days and reform proposals should underpin this trend in future years.

Mar 25 Apr 11 Apr 12 Apr 22

One from 2.30 am two business days

Bank of Scotland, up 18 last week on rumours of 2 stake build-up, rose 12 more to 270p.

Elsewhere, Risinwort Benson gained 10 to 490p in anticipation of today's preliminary figures.

Government stocks were again the dominant sector yesterday as London markets began the fortnightly trading Account which covers next Tuesday's Budget noticeably from the outset with buyers responding to a slightly more optimistic reading of the weekend financial columns. Heavier demand followed yesterday's strong rally in sterling as the dollar went lower against most other leading currencies.

Sharply easier UK money market rates—three months interbank dropped from 134 per cent to 134 per cent—insisted fresh enthusiasm. Capping the renewed show of confidence was the expectation of good news not only on UK money supply trends but also on clearing bank base rates. The announcement of February's banking statistics is scheduled for 2.30 pm today.

The authorities were bid for stock and sold all of the £200m transport to 500m per cent 2002, made available to the market only from 9.30 am.

The Government broker also

per cent 2002, made available to the market only from 9.30 am. The Government broker also supplied part of the £200m issue of Treasury 9 per cent 1994 and the short tap stock, £20-paid Exchequer 11 per cent 1990, the latter at 204, before withdrawing. The recent favourable trend in

U.S. bond prices reinforced the Gilt market's strong tone. Quotations continued to edgo higher in the after-hours' trade and longer-dated stocks settled at the session's best with gains stretching to I. The shorts were a maximum of A higher, while index-linked issues improved

following Press announcements or recommendations. BTR. which announced an increased offer for Dunlop lats Friday evening, advanced strongly, while the clearing Banks, despite being quoted ex their respective dividends, moved up well too. Many blue chip industrials were also traded in ex-dividend form; the combined deductions of six constituent stocks took around 31 points off the FT Ordinary Share index, which closed 1.1 up at 989.2.

#### RBS better

Press comment in the wake of the dividend season helped the major elegang banks start the, new Account firmly. Lioyils advanced 22 to 550p xd on further consideration of Friday's results, while NatWest added

arouse heavy demand for Gilts

mendation.

Regional Breweries featured fresh takeover speculation in Blackburn-based Matthew Brown which spuried 22 to 290p; the shares ettracted similar support over the New Year amid persistent talk of an offer from Scottish and Newcastle which later subsided as Whithread Investments announced that it bad acquired just over 5 per cent of Brown's equity. Brown's equity.

Dealers reported a firm undertons in the Building sector.

Most leading issues managed modest progress with Bine Circle hardening 3 to 515p and Rugby.

Portland Cement adding a couple more marginally, up 4 to 3849 and BPB Industries Equities presented many features, but they were usually good market last week following the result of selective support following Press announcements commant on its U.S. expansion plaus, moved up 8 more to 502p. Elsewhere, Taylor Woodrow firmed 4 to 361p on occasional interest, while Ward Holdings gained 7 to 165p, after 170p, in reply to a newsletter recommendation

> · ICI =ere a relatively subdued market and after opening at 823p xd, drifted back on lack of interest to close 9 cheaper at 813p xd.

#### Stores advance

Predictions of lower interest rates around Budget time gave leading Stores s fillip. The encouraging retail sales figures for last month also helped sentiment. Woolsworth closed 15 up at 708p and Habitat Mothercare at 708p and Habitat Mothercare a dearer at 325p. Marks and Spencer improved a few pence to 140p, while Burton put on 4

touching 405p around the time Al-Fayed Investment and Trust acquired e further 11.4m shares st 403 p, reacted to finish the day 4 lower on balance at 389p on the claim that the Egyptians had gained control, and that the 400p per share bid bad become unconditional. Earlier, Lombo moved up 7 to 166p following the disclosure that it bad sold 9.7m shares in House of Fraser for £39.1m.

Secondary Stores provided several firm features. Foster Bros, currently in receipt of a bld from Ward White, jumped 20 to 228p on news of an approach from a third party, rumoured to bo Sears. Martin rumoured to bo Sears. Martin Ford advanced 4 more to 42p following Press comment blginlighting bid possibilities, while Dixons rose 11 to 594p following details of the sale of Curry's television and video rental business to Electronic Rentals, 2 up at 43p. T. and S. Stores rose 7 to-126p following the results, while Freemans and Grattan while Freemans and Grattan gained 12 to the common level hams, to ing revived speculative support House of Fraser, after and Pittard gained 14 to 110p

Leading Engineers passed a relatively quiet trading session. GKN edged higher in anticipation of tomorrow's preliminary statement and closed 6 to the good at 227p, hut TI, scheduled to report annual results on Thursday, eased a couple of pence to 236p. Selective demand was evident for secondary issues. Further consideration of the half-year figures left Yarrow 15 higher at 485p, while Burgess Products were noteworthy for a rise of 11 to 147p. Takeover figures of 12 to 12 to

gained: 12 to the common level of 182p. Among Shoe concerns, Stylo jumped 17 to 200p following revived speculative support dearer at 111p, while bidders Williams Holdings rose 10 to 253p. Press comment also stimu-lated demand for RHP, up 7 at 104p, and 600 Group, 3 batter at

In a generally firm Food In a generally firm Food sector, Press comment highlighting bid possibilities stimulated support for Banks Hovis McDongall, 4 higher at 142p. Buyers also favoured Unigate, 3 dearer at 157p. Northern Foods, a firm counter last week, made fresh progress to 240p prior to closing a couple of pence dearer at 238p. Buying ahead of Thursday's annual figures lifted Needlers 8 to 102p.

definition of e sizeable U.S. acquisition. Invest Energy moved np 70 to 970p after comment on its Paris Rasin interests, while Falcon Resources drew fresh support and rose 23 to 428p.

Details of the agreed merger left Plantations and General, 10 higher at 337p. Barham rose 15 to 440p following recent lunches with institutional investors and weekend Press mention. Revived demand left Pentland 25 higher at 490p, while Rank Organisation responded to speculataive interest with a rise of 14 to 372p. Satisfactory intarim results prompted 8 gain of 5 to 180p in Parker Knoll, while Martin Industries closed a like amount dearer at 84p following a newsletter recommendation. News of the Joint negotiation. News of the Joint negotiation. News of the Joint negotiation with Bellway to acquire Falmont Ship Repair took Appledore up 2 to 104p, but Bellway gavs up 4 at 116p. Pentos barden5d 1; to 42p swalting today's preliminary statement. Intasun firmed 3 to 108p ton news that Therotravel had increased its stake to 83 per cent, while lats support left Saga 11; higher at 184p xd. Elsewhere in the Leisure sector, Medminster remained a firm counter in the wake of the good interim results and rose 9 to 185p xd.

Dunlop jumped 15 to 66p, after 69p, and BTR leapt 33 to 681p, after 707p, following Friday'e late news that the seven-week takenove hortle hed ended with e 2 late and by the death of prometry of the death of Soviet leader by the death

d the time tand Trust Leading by a report that System with the come of the time tand t

more attractive if the Chancellor snoounces a reform of capital gains tax in the Budget prompted selective demand for the Property leaders. Buyers favoured Land Securities and MEPC, both 4 dearse et 302p and 306p respectively. Elsewhers, Stock Conversion gained 23 to 473p on Press suggestions of a 500p per share consortium bid for the company. Stockley put on 5 to

comment on the merger situa-tion: prompted a rise of 14 to 125p in Barlow and a gain of 11 to 150p in Majedie. Elsewhere in Financial Trusts, Antofagasta jumped 45 to 265p on revived speculativo support.

#### Tricentrol good

Leading Oils attracted a reasonable business ahead of a couple of important trading statements dno later in the week, but quotetions usually closed a shado easier for choics as interest faded late in the sesclosing a couple of pence dearer at 238p. Buying ahead of Thursday's annual figures lifted Needlers 8 to 102p.

Christies up again

Apart from the sharp rise in BTR, movements in the BTR, movements in the miscellaneous industrials leaders were confined to a faw pence either way. Boots hardened 4 to 174p on its Store interests. Elsewhere, further Press suggestions of a bid prompted renewed demand for Christies International, which advanced 23 to 643p. Ingall Industries closed 12

#### **Ministers** agree to limit EEC farm grants

FINANCE ministers yesterday agreed to try to curb some of its farm spending by limiting a five year programme of structural subsidies for community farmers to 3.25bn European currency units (£3.15bn).

The move amounts to a 10 per cent cut in the spending pro-posed by the Commission for the agricultural structure fund, which provides direct cash grants to farmers in addition to the EEC price support system.

However, the deal, which has However, the deal, which has been under discussion for over a year, was only agreed on the understanding that it does not prejudice negotiations to set up additional spending programmes for poorer Mediterranean regions of the community. Even with such a provise the decision was not munity. Even with such a proviso, the decision was not unanimous, with Greece and Ireland seeking more cash.

It is now up to farm ministers to decide on the distribution of the Ecu 5.25bn for 1985 to 1989. This campares with Ecu 3.9bn for the last programme.

Meanwhile, community farm ministers staked out initial positions over this year's agricultural prices package, with British and West German ministers sticking firmly to radically different lines on

Herr Ignaz Kiechle, of West Germany, told the meeting he had no intention of agreeing an overall price cut and called tentatively for a cereal price

He also proposed the community should reverse its commitment to cut milk quotes by a further one per cent in trading.
Cocoa remained the most

But Mr Michael Jopling, the British minister, repeated his view that grain prices should be cut by the full five per cent automatically triggered by last year's record harvest, and that a three year price freeze should tract, with trading of only 9,855 follow. The Commission has proposed a 3.6 per cent cut.

# Aluminium prices tumble on surprise rise in stocks

BY JOHN EDWARDS, COMMODITIES EDITOR

ALUMINIUM prices fell sharply on the London Metal Exchange yesterday following news of an unexpected increase in western world stocks during January.

Market forecasts that extensive production cuts in aluminium output last year would reduce stocks by between 50,000 to 100,000 tonnes proved
"wildly wrong," as one trader
put it. Instead they rose by
over 30,000 tonnes. The International Primary
Aluminium Institute estimated

non-Communist world stocks of all forms of aluminium, including scrap, increased to 4.422m tonnes by the end of January, compared with 4.392m at end-December and 3.734m in January 1984.
Within that total, primary

aluminium stocks rose in January to 2.629m tonnes against 2.594m in December and 2.05m in January last year.

TURNOVER ON London's soft

from 343,885 last February. That figure was inflated some

heavily traded contract at 103,623 lots but this was well

down from the February 1984 figure of 148,269 lots. An even bigger proportionate fall was seen in the potatos futures con-

LONDON METAL EXCHANGE WAREHOUSE STOCKS (changes during week ending March 8)

-4,950 to 123,350 -5,300 to 99,475 +750 to 50,225 -384 to 5,580 -105 to 21,750 +1,025 to 34,225 Nickel

(ounces) Sliver 53,890,000 (unchanged)

ing Janary this year was in Oceania (Pacific basin countries) and Latin America. A further increase in North American stocks, in spite of the production cuts there, offset to

European holdings.

The rise in world stocks overshadowed the decline in LME
warehouse holdings of aluminium and the market came

the stronger trend in the value of sterling, forcing Londsu prices down more than dollar quotations. Three months aluminium closed £36.25 down at £1.038.5 a tonne after reaching a high of £1.078 in early ing a high of £1,078 in early trading

The stronger pound was the main influence depressing other base metal markets. Copper lost ground in spite of another befty decline in stocks pushing LME warehouse holdings below 100,000 tomes for the first time since October 1974

since October 1974.

The increase in zinc stocks was mainly in high grade zinc and therefore had a relatively small impact on the standard grade contract. However, prices were hit by the rise in sterling, which also brought a downturn in the nickel market.

#### Report on U.S. farm debt Soft commodity trading falls crisis contradicts Reagan By Richard Mooney

BY NANCY DUNNE IN WASHINGTON

TURNOVER ON London's soft (non-metal) commodity markets last month was 23.5 per cent down from February 1984.
Figures published by the International Commodities Clearing House (ICCH) show turnover at 276,347 lots, down MORE THAN eight per cent of American farmers are in serious financial difficulty, according to a report yesterday from the Economic Research Service of the U.S. Department of Agriculture.

The report directly contradicts President Reagan, who last week vetoed emergency farm credit legislation saying:
"The truth of the matter is, in need of immediate help are less than 4 per cent, or around 4 per That figure was inflated somewhat because there were 21 trading days against 20 this February, but the ICCH figure does not include 33,000 lots traded in the sterling raw sugar contract and 2,087 lots in the sterling soyabean meal contract, both of which have since ceased trading. cent at best, of all the farmers in the U.S."

Farms with sales of \$50,000 to \$500,000 annually, the "mainstream of family-sized commer-cial agriculture," are those in worst trouble, the report says.

An estimated 30,000 farms are now technically insolvent, having debt/asset ratios of more than 100 per cent. These owe 6,5 per cent of all farm debt.

Another 34,000, owing 7.5 per cent of all debt, have debt/
asset ratios between 70 and 100
per cent and "are rapidly
moving toward insolvency." About 114,000 farmers are highly leveraged and face serious financial problems.

farm debt. More than one-quarter of the 679,000 middle-size farms were found to face some degree of financial stress—from needing to extend loans to technical in-

These owe 22 per cent of total

Legislation to help these farmers and their hankers, many of whom are also facing disaster, sped through Congress and landed on the President's desk last week. The President vetoed the Bill, saying it was a "hudget-busting bail-out." and the Democrats who pushed it say they cannot secure enough votes to override the veto,

#### Bangladesh lifts curbs on jute exports

RANGLADESH has decided to relax restrictions on raw inte exports imposed last October. The curbs followed a poor crop and fears of a shortage of supplies for local mills.

With the new crop due to be harvested in July, and the need to plan shipments at least three months ahead, it has been decided to resume registration

of export sales.

However, only abippers who have already fulfilled at least balf their 1984-85 delivery contract commitments will be able to apply for registrations. London traders do not expect the move to have much impact on prices, since a world sbort-

age of jute will remain.

INDIA bas cut its minimum tea export prices in recognition of the recent decline in world The Commerce Ministry said

yesterday the new minimum for both South and North Indian types was 31 rupees a kilo for tea sold at suctions and 31.5 rupees for supplies sold direct

rupees for supplies sold direct from estates.

The old prices, set on October 16, were Rs35 (auction) and Rs36 (direct) for North Indian tea and Rs 33 and Rs 34 res-pectively for South Indian. Since then international prices had fallen Rs4 to Rs5 a kilo, a ministry official said.

At yesterday's weekly auction in London, tea prices continued their recent decline, though the Teehrokers Association said demand was fairly good for the 41,843 packages on offer.

The average price for quality tee was 290p a kilo (nominal), unchanged from last week Medium grade was 4p cheaper at 246p a kilo while low medium was 4p down at 194p a kilo. Some Assam offerings were withdrawn from an irregular but generally lower market, the

Africans were well supported but prices were often 4p to 8p kilo easier. Better Ceylons sold well and were dearer in some cases, but plainer types were 5p to 8p a kilo down. Farmers' viewpoint: by John Cherrington

# New Zealand's prized pests

was a price on their heads, or rather tails, of two shillings. The deer, like every other live import the early settlers brought in, flourished in the New Zealand environment and some made a living hunting them for the bounty and the skins. A dozen years ago, how-ever, these feral deer ceased to he seen as a nuisance, and began to be regarded as an

Someone had noticed that Koreans used the powdered residues of deer velvet as a health product. Veltet is the first growth when the stag renews its antiers annually. It forms the rough shape of the

eventual antler and after a few weeks hardens into horn.

The crucial collection time is while it is still growing and the blood supply, which is said the contain bera-ones, present.

I have seen no evidence of the
popular belief that the velvet
is an aphrodisiac, but the Koreans use it as a general tonic. Those I have met who

I HAVE JUST been driving through country where more than 50 years ago I was on a deer stalking expedition. Then it was mostly forest and scrub, the few tracks overgrown and hard to follow. It has now been cleared, has good roads, and is heavily stocked with sheep and cattle.

In these days deer were everywhere. They devoured the improved pastures and there was a price on their beads, or

ts he easily demesticated. Ney did well in the same pastures as sheep or cattle, and also reproduced well.

The pioneers flourished, although at first they were ridiculed by more orthodox farmers. But their prosperity is based not on the sale of velvet but on sales of breeding stock. Now that sheep are in decline here, everyone wants to Now that sneep are in the here, everyone wants to diversify. But exporting velvet is not easy, as both China and Russia are competing for the market. Venison too is exported, but the most promising sales are of live animals. There must be an insatiable demand, hecause during my travels here I have seen more Venison too

travels here I have seen more empty deer paddocks than stocked ones. New · Zealand Another New Zealand nuisance which is being turned into an asset is the common-or-garden goat. In the past goats were turned out to kill off hlackberry bushes originally brought in by homesick settlers and which had taken over great tracts of country. It is true that goats will eat blackberries, but

unfortunately they eat every-thing else as well. In some areas they ruined great stretches of country. Thousands were shot every year to keep them under control.

But now they are keenly sought for two purposes, mohair and cashmere. Mohair comes from the Angora breed, originating in Asia, and I have originating in Asia, and I have seen large flocks in Texas. There are a few pure bred Angoras in New Zealand, largely in the hands of hobby

Using modern techniques of Using modern techniques or embryo transfers, more and more pure-bred Angora goats can be produced by implanting in feral goats. Also, pure Angoras can be crossed with feral goats by artificial insemination. After five generations almost pure Angoras are produced.

Once worth almost nothing. Once worth almost nothing,

feral goats now fetch about NZ\$200 a head and are keenly sought, not only for breeding but for export to Australia. There they are used to produce cashmere, the soft underwool of the main fleece. New Zealand is the only country from which Australia will import goats because of disease restrictions. The goat boom is only in its early stages, and like the deer boom is still feeding on its own expansion. Only time will tell how well founded these new

imposed a week ago in protest at tax raids.

The move follows talks with

Ministry of Commerce officials at which a compromise over the tax raids was reached.

A spokesman for the mer-

of \$25m to \$35m of diamonds.

They will buy these on April 1.

The merchants have been raided 30 times in the past six chants said last night they had reached "quite a lot of under-standing" with the ministry. Tax inspectors would now accept forms of documentation months as India steps up its campaign against corruption and the black economy. Diamonds worth \$4m to \$5m have been selzed and about \$1m when conducting raids. This would mean that diamonds

INDIA'S diamond merchants dealer for inspection would not were being held until last week.

The release in the past few days of those diamonds, plus days of those diamonds, plus the talks last Friday, have eased a potential crisis. The merchants first cancelled their February sight and then threatened similar action against the current sight in order to put pressure on the Government. to the iamDond Trading Corporation of London, the market-ing arm of De Beers Consolidated Mines of South Africa, for immediate provision of the "sight," due last week.

#### **LONDON MARKETS**

IMPROVED HOPES for a successful outcome to talks in Geneva on a new Inter-national Cocoa Agreement helped lift prices on the London futures market yesterday. May delivery cocoa ended at £2,120 a tonne, up £28,50 from Friday's close, in spite of the relative strength of sterling against the

end tast Friday but extended for one week, the conference chairman yesterday proposed that prices should be stablised around a mid-point of 115 cents a lb, about half way between the 135 cents way between the 135 cents mid-point called for by pro-ducing countries and the 160 cents level proposed by consumers. Delegates thought a compromise somewhere between 105 cents and the chairman's suggestion might be possible this week.

# Confidence in dollar wanes

The dollar weakened quite sharply on the toreign exchanges yesterday, without any obvious move by central banks. Sentiment moved against the dollar as dealers reassessed the prosas dealers reassessed the prospects for the U.S. economy and interest rate trends. It is expected that U.S. industrial production figures, due for duction figures, due for publication Friday, will show a decline and forecasis for next week's first quarter flash gross national product figure have been downwards. A slight national product figure have been revised downwards. A slight easing of the Federal funds rate in New York also followed suggestions that the Federal Reserve will not tighten monetary policy, while the general interest rate picture was confused by speculation about a possible rise in German rates at this week's regular Bundesbank council meeting. News from Moscow about the Soviet leadership, following the death of President Chernenko, had no impact on the exchanges.

exchanges.

The dollar opened weak, before stabilising around DM. 3.36, but then falling again in the afternoon to close at DM 3.3385 compared with DM 3.4125 on Friday. It also fell to FFr 10.2050 from FFr 10.37; SwFr 2.8470 from SwFr 2.90; and Y259.15 from Y251.60.

On Bank of England figures lower rates had little impact yes-from 155.4.

STERLING — Trading range against the dollar in 1984.85 is 1.4940 to 1.0525. February aver-age 1.0833. Enchange rate index rose 0.5 to 71.6, the highest point of the day, after opening at 71.2. STERLING — Trading range against the deliar in 1984-85 is 1.4940 to 1.0525. February average 1.0833. Exchange rate index rose 0.5-to 71.6, the highest point of the day, after opening at 71.2. Six months ago the index was 77.9. Y278.75.

DMARK — Trading range against the dollar in 1984.83 is 3.4510 to 2.5535. February average 2.3008. Exchange rate index Tho D-mark improved against 118.6 against 121.8 six months

77.9. Sterling benefited from the weaker dollar and from a firmer weaker dollar and from a firmer tono to nil prices. Lower rates on the London money market led to speculation about lower bank base rates, but a cut is still regarded as unlikely given the garded as unlikely given the dollar in fairly active Frankfully to oil price movements. Today's UK money supply figures may give further guidance, but any thoughts ebout

#### MONEY MARKETS

# UK rates fall as sterling improves

Interest rates fell in London yesterday as sterling reacted favourably to a fall in the U.S. dollar. This gave rise to increased optimism over the possibility of a cut in clearing bank base rates to coincide with next week's UK Budget. However some sectors of the market were more cautious, suggesting that oil prices may decline over the next few months and so put renewed pressure on sterling. In addition it would appear to be ill solvised to a high of 16½ per cent.

To help alleviate the shortage of around f650m, before taking into of assistance but this did not result in any help being given. The forecast was later revised to a shortage of around the Bank offered an early round of assistance but this did not of assistance but this Bank offered an early round of assistance but this Bank offered an early round of assistance but this Bank offered an early round of assistance but this did not of assistance but this Bank gave assistance in the morning of £152m comprising purchases of £27m of the Bank offered an early round of assistance but this Bank gave assistance in the morning of £152m comprising burchases of £25m of eligible bank bills in band 1 (up to 14 days) at 13½ per cent. It is allowed the shortage of around £600m and the morning of £152m compr

UK clearing banks hase lending rate 14 per cent since January 28 to assume that the dollar had no further upward potential

Initial reaction to the Bank of England's offer of early help, subsequently declined by discount houses, was not necessarily a reflection of growing market optimism on interest rates but arose since a bulk of the shortage appeared to be in the interbank market, and many houses did not market, and many houses did not feel obliged to sell paper during the early part of the day. Three-month interbank money was quoted at 13\ddot 13\ddot 13\ddot 13\ddot per cent down from 13\ddot 13\ddot per cent while three-month eligible bank hills were bid at 13\ddot per cent compared with 13\ddot per cent. Overnight interbank money traded

# Better terms trigger \$1.22bn floating rate note bonanza

BY MAGGIE URRY IN LONDON

SUDDENLY everyone wanted to launch Eurodollar floating rate nnte issues yesterday. In all, six came to the market raising a total of \$1.22bn. Many of the deals had been discussed for some time and were triggered yesterday by better market conditions, including falls in

London interbank rates. Investors were offered a variety of the finer margins available in the

sole lead management of Credit price. Suisse First Boston. Investors have put options after 15, 20 and 25 per cent of par after five years, givyears. The deal pays interest sixmonthly at the London inter-bank mean rate (Limean), refixed month-ly - the "mis-match" formula popular at present while the yield curve is so steep. Front-end fees total 47 basis points and the bonds traded 15-year convertible for Toshiba Cearound 99.60.

Malaysia's previous FRN issue, last October, paid interest at 1/2 per cent over six month London interwell as more favourable market

is rising, but avoids the risk in cent over six month Libor.

The second is a straight The extra administrative cost of with a 10 year life. The pricing paying monthly was thought to be

ported the bonds riffered at 99.62, UBS Securities launched a \$125m

10-year issue for Aumar, the Spanish motorway company, which is guaranteed by Spain. There is an additional \$50m tap, to be sold over the next six months. The deal uses ing and pays of interest at he per par issue price. a straight forward six monthly fixcent over Libor. Front-end fees are 35 basis points and the bonds were trading just within that discount. Morgan Stanley conceived a nov-el structure for a \$100m, 10-year deal for National Bank of Canada,
